

# SHAKESPEARE'S PLAYS

## 'SWAN' EDITION

*With Introductions, Notes, and Illustrations. Crown 8vo, 1s. each Play*

**MACBETH.** Edited by R. McWILLIAM, B.A. With 15 Illustrations by GORDON BROWNE, etc.

**RICHARD II.** Edited by W. J. ABEL, B.A. With 15 Illustrations by H. M. BROCK, etc.

**JULIUS CÆSAR.** Edited by D. FORSYTH, D.Sc. With 15 Illustrations by GRENVILLE MANTON, etc.

**KING JOHN.** Edited by J. W. YOUNG. With 14 Illustrations by PATTEN WILSON, etc.

**AS YOU LIKE IT.** Edited by W. DYCHE. With 15 Illustrations by C. A. SHEPPERSON, etc.

**THE TEMPEST.** Edited by G. W. STONE, M.A. With 15 Illustrations by S. G. DAVIS, etc.

**THE MERCHANT OF VENICE.** Edited by JOHN BIDGOOD, B.Sc. With 15 Illustrations by C. A. SHEPPERSON, etc.

**HENRY V.** Edited by D. FERGUSON, M.A. With 15 Illustrations by R. WHEELWRIGHT, etc.

**TWELFTH NIGHT.** Edited by ALFRED L. CANN, B.A. With 10 Illustrations by GRENVILLE MANTON, etc.

**MUCH ADO ABOUT NOTHING.** Edited by ROBERT WILLIAMSON, M.A. With 10 Illustrations by H. R. MILLAR, etc.

**MIDSUMMER NIGHT'S DREAM.** Edited by J. W. LIEFFE, M.A. With 10 Illustrations by C. A. SHEPPERSON.

**THE WINTER'S TALE.** Edited by T. G. WRIGHT. With 10 Illustrations by R. WHEELWRIGHT.

**KING LEAR.** Edited by A. V. HOUGHTON. With 10 Illustrations by GORDON BROWNE.

---

**LONGMANS' SCHOOL SHAKESPEARE, consisting of Twelve of the most suitable Plays for School Reading.** Edited, with Glossary, by A. V. HOUGHTON, M.A. Crown 8vo, 2s. 6d.

## INTRODUCTION

"THE Life and Strange Surprising Adventures of Robinson Crusoe" (the first words of the original title) is the most popular work of fiction that was ever written in any language. It was first published in April, 1719, and by the following August had run through five editions, and nine editions were printed during the life of the author.

It has been published in several foreign languages, including Arabic, and new editions of the book have been brought out ever since. Both young and old are charmed by the homeliness of its style, the variety of incidents and the touch of reality which pervades the whole story. It has been thought by some that Defoe acquired the "lonely inhabitant" incident from the adventures of Alexander Selkirk, a Scottish mariner, who spent over four years, alone, on the island of Juan Fernandez in the Pacific, the account of which was published in 1712. There had been many similar well-authenticated cases, from any one of which Defoe might have borrowed the leading incident. But if it were borrowed, as Mr. Chalmers, in his life of Defoe, says, "he did not borrow the various events, the useful moralities, or the engaging style . . . he excelled in narrating adventures by sea with such felicities of language, such attractive varieties, such insinuating instruction, as have seldom been equalled, but never surpassed."

Of the instructive value of the book, the great French educational reformer, Rousseau, in his "Emile," says,

"Since we must have books, this is one which, in my opinion, is a most excellent treatise on natural education. This is the first my Emilius shall read; his whole library shall long consist of this work only, which shall preserve an eminent rank to the very last. It shall be the text to which all our conversations on natural science are to serve only as a comment. It shall be a guide during our progress to maturity of judgment: and so long as our taste is not adulterated, the perusal of this book will afford us pleasure."

### LIFE OF DEFOE

Daniel Defoe, the author of "Robinson Crusoe," was born in London in 1661. His parents intended him for the ministry, and with that object in view he attended an academy for the training of dissenting ministers, but when nineteen this design was given up, and he was apprenticed to a merchant hosier in the city, with whom he remained five years. He joined the forces under the Duke of Monmouth in his ill-fated insurrection in 1685, but fortunately escaped to London, where he started in the wholesale hosiery business for himself. In the way of trade he visited Portugal and Spain, remaining some time in the latter country, and becoming acquainted with the language. Business, however, was not Defoe's bent: he was a born writer, and from 1687, the date of his first serious publication—"An Essay on Projects"—he devoted more and more of his time to literary pursuits, at first on the current topics of the day, but later chiefly on the great religious and political questions which continued to disturb the nation during the reigns of James II., William III. and Anne. In those troublous times it was dangerous to express an opinion against the ruling party, but Defoe was an absolutely fearless writer and a true patriot, and

to the end of his life boldly pleaded the cause of religious and political freedom with untiring energy and unabated zeal. He supported the Revolution of 1688, and as a liveryman of the city of London joined in the mayoral welcome to King William. His literary labours evidently took his attention from his business, for he became bankrupt in 1692, but afterwards honourably paid his creditors in full. The publication in 1701 of a satirical poem—"The True-born Englishman"—written against those who had maliciously styled King William and his supporters "foreigners," was the means of him becoming known to the King, who had a high opinion of his talents, and employed him in various ways. Defoe never afterwards missed a favourable opportunity of writing in honour of "the immortal memory of that best and greatest of princes." The accession of Queen Anne was the beginning of a long and bitter strife between the High Church party and the Dissenters, and with the object of defending the latter, and to gain a greater amount of toleration for all sects, Defoe wrote a satirical work, "The Shortest Way with the Dissenters," which was at first misunderstood by both parties, but was eventually the very unjust cause of the author being imprisoned, fined, and placed for three days in the pillory. This treatment, which obtained for him a kind of triumph with the common people, caused the ruin of his fortunes a second time, as his brick and pantile works at Tilbury, which he had successfully conducted for some years, had to be given up. His imprisonment in Newgate, which lasted about eighteen months, was no hindrance to his pen, and during this time he wrote about thirty books and pamphlets on various subjects, besides a complete edition of his own works; but, more important still, he started the *Review*, which was brought out first as a weekly paper, afterwards published thrice weekly, and existed for nine years.

All sorts of questions were discussed in it, but chiefly those bearing upon the trade and commerce of the country, the social conditions of the people and the means for their improvement. In this class of work Defoe, who was the sole contributor, excelled all who had preceded him, and led the way for the *Tatlers*, *Spectators*, and *Guardians* which afterwards attained so much distinction. Through the influence of Harley, who became the Earl of Oxford Defoe was liberated by order of the Queen, who also paid his fine. In 1706-7 he was employed in the negotiations which brought about the union between England and Scotland; in the success of this great achievement he had no small share, and in 1709 he published a "History of the Union of Great Britain." This work stamped him as one of the best historians of his time, as it contains a full and accurate account of all that took place, and is written with great discretion, soundness of judgment, and due proportion respecting minute but important details. Further evidence of his ability as an historian was shown in his "Memoirs of the Church of Scotland," which is a valuable work. From 1709 to 1713, in addition to his work for the *Review*, he published some twenty works on trade, loans, public credit, political and religious differences and want of toleration amongst parties, but more particularly in favour of the succession of the House of Hanover. In this connection, owing to the active measures pursued by the friends of the Pretender, Defoe wrote three pamphlets in his most bantering style to show what might be expected if the House of Stuart were reinstated. Again it was his misfortune to be misunderstood, and for the second time his enemies had him most unjustly arrested and imprisoned, but only for a short time, as the absurdity of the charge against him was soon noticed by his former benefactor, the Earl of Oxford, and he was released before the day appointed for his trial. Whilst in Newgate this

time he completed the ninth and last volume of the *Review*, so that it was commenced and ended during the author's imprisonment. Although he wrote nothing of a controversial nature for a year after the Queen's death, his enemies continued to heap upon him, through the press, unmerited blame for publications with which he had no connection, and this doubtless led him, in 1715, before giving up direct party-writing, to publish his "Appeal to Honour and Justice," in which he sets forth in a manly, straightforward manner, and with due modesty, his line of conduct in public affairs, and shows that he always strove for moderation, "the only virtue by which the tranquility of the nation can be preserved." Before this work was published Defoe was struck down with apoplexy, and it seemed as if his life's work was ended, but before the end of the year he brought out "The Family Instructor," which contains in an attractive form very sound advice for fathers and children, masters and servants, husbands and wives. To inculcate lessons on manners and morals in the simplest and pleasantest style seems to have been one of Defoe's constant aims, and in this last work he excelled all his previous efforts. Three volumes of the book were published, and it was in great demand: it has since been reprinted many times.

It was not until 1719, when he was fifty-eight years of age, that he turned his attention to fiction and produced "Robinson Crusoe," the most popular of all his works, and the one which will hand down his name to posterity as long as books will be read or stories of adventure be told. The great success of this work induced Defoe to write other works of fiction, the most important being, "Further Adventures of Robinson Crusoe"; "Life of Captain Singleton"; "Memoirs of a Cavalier"; and "The Journal of the Plague Year." This last gives an account of the plague of London in 1664, and is supposed to be

told by a citizen who was an eye-witness of what he relates; Mr. Chalmers, in his life of Defoe, says it is of sufficient merit to have secured immortality for the author. Before the end of his long and very arduous life, Defoe published other works of great importance bearing upon the improvement of the laws, betterment of trade and commerce, and the uplifting of the social conditions of the people and in many instances in these and other works showed how much he was in advance of his times: his suggestion for the establishment of a University for London has only been realized in recent years. Amongst other books produced by him at this time may be mentioned "A Tour through Great Britain"; "A New Voyage Round the World"; "History of Discoveries in Arts and Sciences"; "The Complete English Tradesman"; and "A Plan of English Commerce." It has been conclusively shown by Mr. William Lee, who has written an admirable life of our author, that Defoe wrote more than two hundred and fifty books and pamphlets, the mere list of the titles of which would fill thirty pages of this book. With regard to the variety of the subjects dealt with by our author, Mr. Walter Wilson, in his excellent life of Defoe, says "he wrote upon almost every subject within the range of human speculation—politics and morals, history and fiction—and in the number and variety of his works he stands unrivalled." Besides being the most prolific writer of his time, he was one of the most brilliant. In his controversial writings he displays a keen wit, an acute intellect, sound judgment and clever reasoning powers. He acquired in the dear school of experience a thorough grasp of all questions relating to Trade and Commerce and took a leading place amongst his contemporaries as a writer on these subjects, which he treated in a comprehensive, interesting and original manner. In fiction he displayed great inventive power, was a true painter of

real life, and presented his quickly changing incidents in simple language and with a remarkable appearance of reality; but, above all, he possessed the ability to point the moral of his story in the most interesting and convincing manner.

He died in London, where he had spent the major portion of his life, in 1731. His varied life had more ups and downs of fortune than Crusoe, but through all he steadfastly held to his principles, and fearlessly fought for the rights of the subject, for greater liberty and toleration, and for the benefit of his country.

NOTE.—*The ship on the title-page is reproduced from the title-page of the second part of "Robinson Crusoe," published in 1719, at the sign of the "Ship," in Paternoster Row.*

# ADVENTURES OF ROBINSON CRUSOE

I WAS born in the year 1632, in the city of York, of a good family, though not of that country, my father being a foreigner of Bremen, who settled first at Hull. He got a good estate by merchandise, and leaving off his trade, lived afterward at York, from whence he had married my mother, whose relations were named Robinson, a very good family in that country, and from whom I was called Robinson Kreutznaer; but by the usual corruption of words in England we are now called, nay, we call ourselves, and write our name, Crusoe, and so my companions always called me.

Being the third son of the family, and not bred to any trade, my head began to be filled very early with rambling thoughts. My father, who was very ancient, had given me a competent share of learning, as far as house-education and a country free school generally goes, and designed me for the law; but I would be satisfied with nothing but going to sea; and my inclination to this led me so strongly against the will, nay, the commands, of my father, and against all the entreaties and persuasions of my mother and other friends, that there seemed to be something fatal in that propension of nature tending directly to the life of misery which was to befall me.

Being one day at Hull, where I went casually, and without any purpose of making an elopement; and one

of my companions being going by sea to London, in his father's ship, and prompting me to go with them, with the common allurements of seafaring men, viz., that it should cost me nothing for my passage, I consulted neither father or mother any more, nor so much as sent them word of it; but leaving them to hear of it as they might, without asking God's blessing, or my father's, without any consideration of circumstances or consequences, and in an ill hour, on the first of September, 1651, I went on board a ship bound for London.

Never any young adventurer's misfortunes, I believe, began sooner, or continued longer than mine. The ship was no sooner out of the Humber, but the wind began to blow, and the waves to rise in a most frightful manner; and as I had never been at sea before, I was most inexpressibly sick in body, and terrified in my mind. I began now seriously to reflect upon what I had done, and how justly I was overtaken by the judgment of heaven for my wicked leaving my father's house, and abandoning my duty.

These wise and sober thoughts continued all the while the storm continued, and indeed some time after; but the next day the wind was abated and the sea calmer, and I began to be a little inured to it. However, I was very grave for all that day, being also a little sea-sick still; but towards night the weather cleared up, the wind was quite over, and a charming fine evening followed; the sun went down perfectly clear, and rose so the next morning; and having little or no wind, and a smooth sea, the sun shining upon it, the sight was, as I thought, the most delightful that ever I saw.

I had slept well in the night, and was now no more sea-sick but very cheerful, looking with wonder upon the sea that was so rough and terrible the day before, and could be so calm and so pleasant in so little time after.

"I WENT ON BOARD A SHIP BOUND FOR LONDON."

And now, lest my good resolutions should continue, my companion, who had indeed enticed me away, comes to me: "Well, Bob," says he, clapping me on the shoulder, "how do you do after it? I warrant you were frightened, wa'n't you, last night, when it blew but a capful of wind?" "A capful, d'you call it?" said I; "'twas a terrible storm." "A storm, you fool you," replies he; "do you call that a storm? Why, it was nothing at all; give us but a good ship and sea-room, and we think nothing of such a squall of wind as that; but you're but a fresh-water sailor, Bob. Come, we'll forget all that; d'ye see what charming weather 'tis now?"

The sixth day of our being at sea we came into Yarmouth roads; the wind having been contrary and the weather calm, we had made but little way since the storm. Here we were obliged to come to an anchor, and here we lay, the wind continuing contrary, viz., at south-west, for seven or eight days, during which time a great many ships from Newcastle came into the same roads, as the common harbour where the ships might wait for a wind for the river.

We had not, however, ridden here so long, but should have tided it up the river, but that the wind blew too fresh; and after we had lain four or five days, blew very hard. However, the roads being reckoned as safe as a harbour, the anchorage good, and our ground-tackle very strong, our men were unconcerned, and, not in the least apprehensive of danger, but spent the time in rest and mirth, after the manner of the sea; but the eighth day in the morning the wind increased, and we had all hands at work to strike our topmasts, and make everything snug and close, that the ship might ride as easy as possible. By noon the sea ran very high indeed, and our ship rode fore-castle in, shipped several seas, and we thought once or twice our anchor had come home, upon which our master

ordered out the sheet-anchor, so that we rode with two anchors ahead, and the cables veered out to the end.

By this time it blew a terrible storm indeed, and now I began to see terror and amazement in the faces even of the seamen themselves. The master, though vigilant to the business of preserving the ship, yet as he went in and out of his cabin by me, I could hear him softly to himself say several times, "Lord, be merciful to us, we shall be all lost, we shall be all undone"; and the like. During these first hurries I was stupid, lying still in my cabin, which was in the steerage. But when the master himself came by me, as I said just now, and said we should be all lost, I was dreadfully frightened; I got up out of my cabin, and looked out. But such a dismal sight I never saw; the sea went mountains high, and broke upon us every three or four minutes; when I could look about, I could see nothing but distress around us. Two ships that rode near us we found had cut their masts by the board, being deep laden; and our men cried out that a ship which rode about a mile ahead of us was foundered. Two more ships being driven from their anchors were run out of the roads to sea at all adventures, and that with not a mast standing. The light ships fared the best, as not so much labouring in the sea; but two or three of them drove, and came close by us, running away with only their sprit-sail out before the wind.

Towards evening the mate and boatswain begged the master of our ship to let them cut away the foremast, which he was very unwilling to. But the boatswain protesting to him that if he did not the ship would founder, he consented; and when they had cut away the foremast, the mainmast stood so loose, and shook the ship so much, they were obliged to cut that away also, and make a clear deck.

But the worst was not come yet; the storm continued

with such fury, that the seamen themselves acknowledged they had never known a worse. We had a good ship, but she was deep laden, and wallowed in the sea, so that the seamen every now and then cried out she would founder. It was to my advantage in one respect, that I did not know what they meant by founder till I inquired. However, the storm was so violent, that I saw what is not often seen, the master, the boatswain, and some others more sensible than the rest, at their prayers, and expecting every moment that the ship would go to the bottom. In the middle of the night, and under all the rest of our distresses, one of the men who had been down on purpose to see cried out we had sprung a leak; another said there was four foot of water in the hold. Then all hands were called to the pump. At that very word my heart, as I thought, died within me, and I fell backwards upon the side of my bed where I sat, into the cabin. However, the men roused me, and told me, that I, who was able to do nothing before, was as well able to pump as another; at which I stirred up and went to the pump and worked very heartily. While this was doing, the master seeing some light colliers, who, not able to ride out the storm, were obliged to slip and run away to sea, and would come near us, ordered to fire a gun as a signal of distress. I, who knew nothing what that meant, was so surprised that I thought the ship had broken or some dreadful thing had happened. In a word I was so surprised that I fell down in a swoon. As this was a time when everybody had his own life to think of, nobody minded me, or what was become of me; but another man stepped up to the pump, and thrusting me aside with his foot, let me lie, thinking I had been dead; and it was a great while before I came to myself.

We worked on, but the water increasing in the hold, it was apparent that the ship would founder, and though the storm began to abate a little, yet as it was not possible

she could swim till we might run into a port, so the master continued firing guns for help; and a light ship, that had ridden it out just ahead of us, ventured a boat out to help us. It was with the utmost hazard the boat came near us, but it was impossible for us to get on board, or for the boat to lie near the ship's side, till at last the men rowing very heartily, and venturing their lives to save ours, our men cast them a rope over the stern with a buoy to it, and then veered it out a great length, which they after great labour and hazard took hold of, and we hauled them close under our stern, and got all into their boat. It was to no purpose for them or us after we were in the boat to think of reaching their own ship, so all agreed to let her drive, and only to pull her in towards shore as much as we could, and our master promised them that if the boat was staved upon shore he would make it good to their master; so partly rowing and partly driving, our boat went away to the nor'ward, sloping towards the shore almost as far as Winterton Ness.

While we were in this condition, the men yet labouring at the oars to bring the boat near the shore, we could see, when, our boat mounting the waves we were able to see the shore, a great many people running along the shore to assist us when we should come near. But we made but slow way towards the shore, nor were we able to reach the shore, till being past the lighthouse at Winterton, the shore falls off to the westward towards Cromer, and so the land broke off a little the violence of the wind. Here we got in, and though not without much difficulty got all safe on shore, and walked afterwards on foot to Yarmouth, where, as unfortunate men, we were used with great humanity as well by the magistrates of the town, who assigned us good quarters, as by particular merchants and owners of ships, and had money given us sufficient to carry us either to London or back to Hull, as we thought fit.

## 8 ADVENTURES OF ROBINSON CRUSOE.

It was my lot first of all to fall into pretty good company in London, which does not always happen to such loose and misguided young fellows as I then was. I first fell acquainted with the master of a ship who had been on the coast of Guinea, and who, having had very good success there, was resolved to go again; and who, taking a fancy to my conversation, which was not at all disagreeable at that time, hearing me say I had a mind to see the world, told me if I would go the voyage with him I should be at no expense; I should be his messmate and his companion; and if I could carry anything with me, I should have all the advantage of it that trade would admit, and perhaps I might meet with some encouragement.

I embraced the offer and entering into a strict friendship with this captain, who was an honest and plain-dealing man, I went the voyage with him, and carried a small adventure with me, which, by the disinterested honesty of my friend the captain, I increased very considerably, for I carried about £40 in such toys and trifles as the captain directed me to buy. This £40 I had mustered together by the assistance of some of my relations whom I corresponded with, and who, I believe, got my father, or at least my mother, to contribute to my first adventure.

This was the only voyage which I may say was successful in all my adventures, and this I owe to the integrity and honesty of my friend the captain; under whom also I got a competent knowledge of the mathematics and the rules of navigation, learned how to keep an account of the ship's course, take an observation, and, in short, to understand some things that were needful to be understood by a sailor. For, as he took delight to teach me, I took delight to learn; and, in a word, this voyage made me both a sailor and a merchant; for I brought home five pounds nine ounces of gold dust for my adventure, which yielded me in London at my return almost £300, and this

filled me with those aspiring thoughts which have since so completed my ruin.

I was now set up for a Guinea trader; and my friend, to my great misfortune, dying soon after his arrival, I resolved to go the same voyage again, and I embarked in the same vessel with one who was his mate in the former voyage, and had now got the command of the ship. This was the unhappiest voyage that ever man made; for though I did not carry quite £100 of my new-gained wealth, so that I had £200 left, which I lodged with my friend's widow, who was very just to me, yet I fell into terrible misfortunes in this voyage; and the first was this, viz., our ship making her course towards the Canary Islands, or rather between those islands and the African shore, was surprised in the grey of the morning by a Turkish rover of Sallee, who gave chase to us with all the sail she could make. We crowded also as much canvas as our yards would spread, or our masts carry, to have got clear; but finding the pirate gained upon us, and would certainly come up with us in a few hours, we prepared to fight, our ship having twelve guns, and the rogue eighteen. About three in the afternoon he came up with us, and bringing to, by mistake, just athwart our quarter, instead of athwart our stern, as he intended, we brought eight of our guns to bear on that side, and poured in a broadside upon him, which made him sheer off again, after returning our fire and pouring in also his small-shot from near 200 men whom he had on board. However, we had not a man touched, all our men keeping close. He prepared to attack us again, and we to defend ourselves; but laying us on board the next time upon our other quarter, he entered sixty men upon our decks, who immediately fell to cutting and hacking the decks and rigging. We plied them with small-shot, half-pikes, powder-chests, and such like, and cleared our deck of them twice. However, to cut short

## 10 *ADVENTURES OF ROBINSON CRUSOE.*

this melancholy part of our story, our ship being disabled, and three of our men killed and eight wounded, we were obliged to yield, and were carried, all prisoners into Sallee, a port belonging to the Moors.

The usage I had there was not so dreadful as at first I apprehended, nor was I carried up the country to the emperor's court, as the rest of our men were, but was kept by the captain of the rover as his proper prize, and made his slave, being young and nimble, and fit for his business.

As my new patron, or master, had taken me home to his house, so I was in hopes that he would take me with him when he went to sea again, believing that it would some time or other be his fate to be taken by a Spanish or Portugal man-of-war; and that then I should be set at liberty. But this hope of mine was soon taken away; for when he went to sea, he left me on shore to look after his little garden, and do the common drudgery of slaves about his house; and when he came home again from his cruise, he ordered me to lie in the cabin to look after the ship.

After about two years an odd circumstance presented itself, which put the old thought of making some attempt for my liberty again in my head. My patron lying at home longer than usual without fitting out his ship, which, as I heard, was for want of money, he used constantly, once or twice a week, sometimes oftener if the weather was fair, to take the ship's pinnace and go out into the road a-fishing; and as he always took me and a young Maresco with him to row the boat we made him very merry, and I proved very dexterous in catching fish; insomuch, that sometimes he would send me with a Moor, one of his kinsmen, and the youth the Maresco, as they called him, to catch a dish of fish for him.

It happened one time that, going a-fishing in a stark calm morning, a fog rose so thick, that though we were not half a league from the shore we lost sight of it; and

rowing we knew not whither or which way, we laboured all day, and all the next night, and when the morning came we found we had pulled off to sea instead of pulling in for the shore; and that we were at least two leagues from the shore. However, we got well in again, though with a great deal of labour, and some danger, for the wind began to blow pretty fresh in the morning; but particularly we were all very hungry.

But our patron, warned by this disaster, resolved to take more care of himself for the future; and having lying by him the long-boat of our English ship which he had taken, he resolved he would not go a-fishing any more without a compass and some provision; so he ordered the carpenter of his ship, who also was an English slave, to build a little state-room, or cabin, in the middle of the long-boat, like that of a barge, with a place to stand behind it to steer and haul home the mainsheet, and room before for a hand or two to stand and work the sails.

We went frequently out with this boat a-fishing, and as I was most dexterous to catch fish for him, he never went without me. It happened that he had appointed to go out in this boat, either for pleasure or for fish, with two or three Moors of some distinction in that place, and for whom he had provided extraordinarily; and had therefore sent on board the boat overnight a larger store of provisions than ordinary; and had ordered me to get ready three fuzees with powder and shot, which were on board his ship, for that they designed some sport of fowling as well as fishing.

I got all things ready as he had directed, and waited the next morning with the boat, washed clean, and every thing to accommodate his guests; when by-and-by my patron came on board alone, and told me his guests had put off going, upon some business that fell out, and ordered me with the man and boy, as usual, to go out with the

boat and catch them some fish, for that his friends were to sup at his house; and commanded that as soon as I had got some fish I should bring it home to his house; all which I prepared to do.

This moment my former notions of deliverance darted into my thoughts, for now I found I was like to have a little ship at my command; and my master being gone, I prepared to furnish myself, not for a fishing business, but for a voyage; though I knew not, neither did I so much as consider, whither I should steer; for anywhere, to get out of that place, was my way.

My first contrivance was to make a pretence to speak to this Moor, to get something for our subsistence on board; for I told him we must not presume to eat of our patron's bread. He said that was true; so he brought a large basket of rusk or biscuit of their kind, and three jars with fresh water, into the boat. I knew where my patron's case of bottles stood, which it was evident by the make were taken out of some English prize; and I conveyed them into the boat while the Moor was on shore, as if they had been there before for our master. I conveyed also a great lump of beeswax into the boat, which weighed above half a hundredweight, with a parcel of twine or thread, a hatchet, a saw, and a hammer, all which were of great use to us afterwards, especially the wax to make candles. Thus furnished with everything needful, we sailed out of the port to fish. The castle, which is at the entrance of the port, knew who we were, and took no notice of us; and we were not above a mile out of the port before we hauled in our sail, and set us down to fish. The wind blew from the N.N.E., which was contrary to my desire; for had it blown southerly I had been sure to have made the coast of Spain, and at least reached to the bay of Cadiz; but my resolutions were, blow which way it would, I would be gone from the horrid place where I was, and leave the rest to Fate.

After we had fished some time and caught nothing, for, when I had fish on my hook I would not pull them up ~~that~~ he might see them, I said to the Moor, "This will not do; our master will not be thus served; we must stand farther off." He, thinking no harm, agreed, and being in the head of the boat, set the sails; and as I had the helm I ran the boat out near a league farther, and then brought her to as if I would fish; when, giving the boy the helm, I stepped forward to where the Moor was, and making as if I stooped for something behind him, I took him by surprise with my arm under his waist, and tossed him clear overboard into the sea. He rose immediately, for he swam like a cork, and calling to me, begged to be taken in, and told me he would go all the world over with me. He swam so strong after the boat, that he would have reached me very quickly, there being but little wind; upon which I stepped into the cabin, and fetching one of the fowling-pieces, I presented it at him, and told him I had done him no hurt, and if he would be quiet I would do him none. "But," said I, "you swim well enough to reach the shore, and the sea is calm; make the best of your way to shore, and I will do you no harm; but if you come near the boat I'll shoot you through the head, for I am resolved to have my liberty." So he turned himself about, and swam for the shore, and I make no doubt but he reached it with ease, for he was an excellent swimmer.

I could have been content to have taken this Moor with me, and have drowned the boy, but there was no venturing to trust him. When he was gone I turned to the boy, whom they called Xury, and said to him, "Xury, if you will be faithful to me I'll make you a great man; but if you will not stroke your face to be true to me," that is, swear by Mahomet and his father's beard, "I must throw you into the sea too." The boy smiled in my face, and spoke so innocently, that I could not mistrust him, and

swore to be faithful to me, and go all over the world with me.

While I was in view of the Moor who was swimming, I stood out directly to sea with the boat, rather stretching to windward, that they might think me gone towards the straits' mouth.

But as soon as it grew dusk in the evening, I changed my course, and steered directly south and by east, bending my course a little toward the east, that I might keep in with the shore; and having a fair, fresh gale of wind, and a smooth, quiet sea, I made such sail that I believe by the next day at three o'clock in the afternoon, when I first made the land, I could not be less than 150 miles south of Sallee; quite beyond the Emperor of Morocco's dominions, or indeed of any other king thereabouts, for we saw no people.

Yet such was the fright I had taken at the Moors, and the dreadful apprehensions I had of falling into their hands, that I would not stop, or go on shore, or come to an anchor, the wind continuing fair, till I had sailed in that manner five days; and then the wind shifting to the southward, I concluded also that if any of our vessels were in chase of me, they also would now give over; so I ventured to make the coast, and came to an anchor in the mouth of a little river, I knew not what, or where; neither what latitude, what country, what nation, or what river. I neither saw, nor desired to see, any people; the principal thing I wanted was fresh water. We came into this creek in the evening, resolving to swim on shore as soon as it was dark, and discover the country; but as soon as it was quite dark we heard such dreadful noises of the barking, roaring, and howling of wild creatures of we knew not what kinds, that the poor boy was ready to die with fear, and begged of me not to go on shore till day.

Xury was dreadfully frightened, and indeed so was I

too; but we were both more frightened when we heard one of these mighty creatures come swimming towards our boat; we could not see him, but we might hear him by his blowing to be a monstrous, huge, and furious beast. Xury said it was a lion, and it might be so for aught I know; but poor Xury cried to me to weigh the anchor and row away. "No," says I, "Xury; we can slip our cable with the buoy to it, and go off to sea; they cannot follow us far." I had no sooner said so but I perceived the creature (whatever it was) within two oars' length, which something surprised me; however, I immediately stepped to the cabin door, and taking up my gun, fired at him, upon which he immediately turned about and swam towards the shore again.

But it is impossible to describe the horrible noises, and hideous cries and howlings, that were raised, as well upon the edge of the shore as higher within the country, upon the noise or report of the gun, a thing I have some reason to believe those creatures had never heard before. This convinced me that there was no going on shore for us in the night upon that coast; and how to venture on shore in the day was another question too; for to have fallen into the hands of any of the savages, had been as bad as to have fallen into the hands of lions and tigers; at least we were equally apprehensive of the danger of it.

Be that as it would, we were obliged to go on shore somewhere or other for water, for we had not a pint left in the boat; when or where to get to it, was the point. Xury said if I would let him go on shore with one of the jars, he would find if there was any water, and bring some to me. I asked him why he would go? why I should not go and he stay in the boat? The boy answered with so much affection, that made me love him ever after. Says he, "If wild mans come, they eat me, you go way." "Well, Xury," said I, "we will both go; and if the wild

mans come, we will kill them, they shall eat neither of us." So I gave Xury a piece of rusk bread to eat, and a dram out of our patron's case of bottles which I mentioned before; and we hauled in the boat as near the shore as we thought was proper, and so waded on shore, carrying nothing but our arms and two jars for water.

I did not care to go out of sight of the boat, fearing the coming of canoes with savages down the river; but the boy seeing a low place about a mile up the country, rambled to it, and by-and-by I saw him come running towards me. I thought he was pursued by some savage, or frightened by some wild beast, and I ran forward towards him to help him; but when I came nearer to him, I saw something hanging over his shoulders, which was a creature that he had shot, like a hare, but different in colour, and with longer legs. However, we were very glad of it, and it was very good meat; but the great joy that poor Xury came with was to tell me he had found good water, and seen no wild mans.

As I had been one voyage to this coast before, I knew very well that the islands of the Canaries, and the Cape de Verde Islands also, lay not far off from the coast. But as I had no instruments to take an observation to know what latitude we were in, and did not exactly know, or at least remember, what latitude they were in, I knew not where to look for them, or when to stand off to sea towards them; otherwise I might now easily have found some of these islands. But my hope was, that if I stood along this coast till I came to that part where the English traded, I should find some of their vessels upon their usual design of trade, that would relieve and take us in.

Once or twice in the daytime I thought I saw the Pico of Teneriffe, being the high top of the Mountain Teneriffe in the Canaries, and had a great mind to venture out, in hopes of reaching thither; but having tried twice, I was

forced in again by contrary winds, the sea also going too high for my little vessel; so I resolved to pursue my first design, and keep along the shore.

Several times I was obliged to land for fresh water after we had left this place; and once in particular, being early in the morning, we came to an anchor under a little point of land which was pretty high; and the tide beginning to flow, we lay still to go farther in. Xury, whose eyes were more about him than it seems mine were, calls softly to me, and tells me that we had best go farther off the shore; "For," says he, "look, yonder lies a dreadful monster on the side of that hillock fast asleep." I looked where he pointed, and saw a dreadful monster indeed, for it was a terrible great lion that lay on the side of the shore, under the shade of a piece of the hill that hung as it were a little over him. "Xury," says I, "you shall go on shore and kill him." Xury looked frightened, and said, "Me kill! he eat me at one mouth"; one mouthful he meant.

However, I said no more to the boy, but bade him lie still, and I took our biggest gun, and loaded it with a good charge of powder, and with two slugs, and laid it down; then I loaded another gun with two bullets; and the third (for we had three pieces) I loaded with five smaller bullets. I took the best aim I could with the first piece to have shot him in the head, but he lay so with his leg raised a little above his nose that the slugs hit his leg about the knee, and broke the bone. He started up growling at first, but finding his leg broken, fell down again, and then got up upon three legs and gave the most hideous roar that ever I heard. I was a little surprised that I had not hit him on the head. However, I took up the second piece immediately, and, though he began to move off, fired again, and shot him in the head, and had the pleasure to see him drop, and make but little noise,

but lay struggling for life. Then Xury took heart, and would have me let him go on shore. "Well, go," said I; so the boy jumped into the water, and taking a little gun in one hand, swam to shore with the other hand, and coming close to the creature, put the muzzle of the piece to his ear, and shot him in the head again, which despatched him quite.

This was game indeed to us, but it was not food; and I was very sorry to lose three charges of powder and shot upon a creature that was good for nothing to us. However, Xury said he would have some of him; so he came on board, and asked me to give him the hatchet. "For what, Xury?" said I. "Me cut off his head," said he. However, Xury could not cut off his head, but he cut off a foot, and brought it with him, and it was a monstrous great one.

I bethought myself, however, that perhaps the skin of him might one way or other be of some value to us; and I resolved to take off his skin if I could. So Xury and I went to work with him; but Xury was much the better workman at it, for I knew very ill how to do it. Indeed, it took us both the whole day, but at last we got off the hide of him, and spreading it on the top of our cabin, the sun effectually dried it in two days' time, and it afterwards served me to lie upon.

After this stop we made on to the southward continually for ten or twelve days, living very sparing on our provisions, which began to abate very much, and going no oftener into the shore than we were obliged to for fresh water. My design in this was to make the river Gambia or Senegal—that is to say, anywhere about the Cape de Verde—where I was in hopes to meet with some European ship; and if I did not, I knew not what course I had to take, but to seek for the islands, or perish there among the negroes. I knew that all the ships from Europe, which sailed either to the coast of Guinea or to Brazil, or to the

East Indies, made this cape, or those islands; and in a word, I put the whole of my fortune upon this single point, either that I must meet with some ship, or must perish.

When I had pursued this resolution about ten days longer, as I have said, I began to see that the land was inhabited; and in two or three places, as we sailed by, we saw people stand upon the shore to look at us; we could also perceive they were quite black, and stark naked. I was once inclined to have gone on shore to them; but Xury was my better counsellor, and said to me, "No go, no go." However, I hauled in nearer the shore that I might talk to them, and I found they ran along the shore by me a good way. I observed they had no weapons in their hands, except one, who had a long slender stick, which Xury said was a lance, and that they would throw them a great way with good aim. So I kept at a distance, but talked with them by signs as well as I could, and particularly made signs for something to eat; they beckoned to me to stop my boat, and that they would fetch me some meat. Upon this I lowered the top of my sail, and lay by, and two of them ran up into the country and in less than half an hour came back, and brought with them two pieces of dried flesh and some corn, such as is the produce of their country; but we neither knew what the one or the other was. However, we were willing to accept it, but how to come at it was our next dispute, for I was not for venturing on shore to them, and they were as much afraid of us; but they took a safe way for us all, for they brought it to the shore and laid it down, and went and stood a great way off till we fetched it on board, and then came close to us again.

I was now furnished with roots and corn, such as it was, and water; and leaving my friendly negroes, I made forward for about eleven days more, without offering to go near the shore, till I saw the land run out a great length into the sea, at about the distance of four or five leagues before me; and

the sea being very calm, I kept a large offing, to make this point. At length, doubling the point, at about two leagues from the land, I saw plainly land on the other side, to seaward; then I concluded, as it was most certain indeed, that this was the Cape de Verde, and those the islands, called from thence Cape de Verde Islands. However, they were at a great distance, and I could not well tell what I had best to do; for if I should be taken with a fresh of wind, I might neither reach one or other.

In this dilemma, as I was very pensive, I stepped into the cabin, and sat me down, Xury having the helm; when, on a sudden, the boy cried out, "Master, master, a ship with a sail!" and the foolish boy was frightened out of his wits, thinking it must needs be one of his master's ships sent to pursue us, when I knew we were far enough out of their reach. I jumped out of the cabin, and immediately saw, not only the ship, but what she was, viz., that it was a Portuguese ship, and, as I thought, was bound to the coast of Guinea, for negroes. But when I observed the course she steered, I was soon convinced they were bound some other way, and did not design to come any nearer to shore; upon which I stretched out to sea, as much as I could, resolving to speak with them, if possible.

With all the sail I could make, I found I should not be able to come in their way, but that they would be gone by before I could make any signal to them; but after I had crowded to the utmost, and began to despair, they, it seems, saw me by the help of their perspective glasses, and that it was some European boat, which, as they supposed, must belong to some ship that was lost, so they shortened sail to let me come up. I was encouraged with this; and as I had my patron's ancient on board, I made a waft of it to them for a signal of distress, and fired a gun, both which they saw; for they told me they saw the smoke, though they did not hear the gun. Upon these signals they kindly

brought to, and lay by for me; and in about three hours' time I came up with them.

They asked me what I was, in Portuguese, and in Spanish, and in French, but I understood none of them; but at last a Scots sailor, who was on board, called to me, and I answered him, and told him I was an Englishman, that I had made my escape out of slavery from the Moors, at Sallee. Then they bade me come on board, and very kindly took me in, and all my goods.

It was an inexpressible joy to me, that any one will believe, that I was thus delivered, as I esteemed it, from such a miserable, and almost hopeless, condition as I was in; and I immediately offered all I had to the captain of the ship, as a return for my deliverance. But he generously told me he would take nothing from me, but that all I had should be delivered safe to me when I came to the Brazils. "For," says he, "I have saved your life on no other terms than I would be glad to be saved myself, and it may, one time or other, be my lot to be taken up in the same condition. Besides," says he, "when I carry you to the Brazils, so great a way from your own country, if I should take from you what you have, you will be starved there, and then I only take away that life I have given. No, no, Seigneur Inglese," says he, "Mr. Englishman, I will carry you thither in charity, and those things will help you to buy your subsistence there, and your passage home again."

As he was charitable in his proposal, so he was just in the performance to a tittle; for he ordered the seamen that none should offer to touch anything I had; then he took everything into his own possession, and gave me back an exact inventory of them, that I might have them, even so much as my three earthen jars.

As to my boat, it was a very good one, and that he saw, and told me he would buy it of me for the ship's use, and asked me what I would have for it? I told him he

had been so generous to me in everything, that I could not offer to make any price of the boat, but left it entirely to him; upon which he told me he would give me a note of his hand to pay me eighty pieces of eight for it at Brazil, and when it came there, if any one offered to give more, he would make it up. He offered me also sixty pieces of eight more for my boy Xury, which I was loth to take; not that I was not willing to let the captain have him, but I was very loth to sell the poor boy's liberty, who had assisted me so faithfully in procuring my own. However, when I let him know my reason, he owned it to be just, and offered me this medium, that he would give the boy an obligation to set him free in ten years if he turned Christian. Upon this, and Xury saying he was willing to go to him, I let the captain have him.

We had a very good voyage to the Brazils, and arrived in the Bay de Todos los Santos, or All Saints' Bay, in about twenty-two days after. And now I was once more delivered from the most miserable of all conditions of life and what to do next with myself I was now to consider.

The generous treatment the captain gave, I can never enough remember. He would take nothing of me for my passage, gave me twenty ducats for the leopard's skin, and forty for the lion's skin, which I had in my boat, and caused everything I had in the ship to be punctually delivered to me; and what I was willing to sell he bought, such as the case of bottles, two of my guns, and a piece of the lump of beeswax—for I had made candles of the rest; in a word, I made about 220 pieces of eight of all my cargo, and with this stock I went on shore in the Brazils.

I had not been long here, but being recommended to the house of a good honest man like himself, who had an *ingenio* as they call it, that is, a plantation and a sugar-house, I lived with him some time, and acquainted myself by that means with the manner of their planting and

making of sugar; and seeing how well the planters lived, and how they grew rich suddenly, I resolved, if I could get licence to settle there, I would turn planter among them, resolving in the meantime to find out some way to get my money which I had left in London remitted to me. To this purpose, getting a kind of a letter of naturalisation, I purchased as much land that was uncured as my money would reach, and formed a plan for my plantation and settlement, and such a one as might be suitable to the stock which I proposed to myself to receive from England.

I had a neighbour, a Portuguese of Lisbon, but born of English parents, whose name was Wells, and in much such circumstances as I was. I call him my neighbour, because his plantation lay next to mine, and we went on very sociably together. My stock was but low, as well as his; and we rather planted for food than anything else, for about two years. However, we began to increase, and our land began to come into order; so that the third year we planted some tobacco, and made each of us a large piece of ground ready for planting canes in the year to come. But we both wanted help; and now I found more than before that I had done wrong in parting with my boy Xury.

I was in some degree settled in my measures for carrying on the plantation before my kind friend, the captain of the ship that took me up at sea, went back; for the ship remained there in providing his loading, and preparing for his voyage, near three months; when telling him what little stock I had left behind me in London, he gave me this friendly and sincere advice: "Seignior Inglese," says he, for so he always called me, "if you will give me letters, and a procuration here in form to me, with orders to the person who has your money in London to send your effects to Lisbon, to such persons as I shall direct, and in such goods as are proper for this country, I will bring you

the produce of them, God willing, at my return. But since human affairs are all subject to changes and disasters, I would have you give orders but for one hundred pounds sterling, which, you say, is half your stock, and let the hazard be run for the first; so that if it come safe, you may order the rest the same way; and if it miscarry, you may have the other half to have recourse to for your supply."

This was so wholesome advice, and looked so friendly, that I could not but be convinced it was the best course I could take; so I accordingly prepared letters to the gentlewoman with whom I had left my money, and a procuration to the Portuguese captain, as he desired.

I wrote the English captain's widow a full account of all my adventures; my slavery, escape, and how I had met with the Portugal captain at sea, the humanity of his behaviour and in what condition I was now in, with all other necessary directions for my supply. And when this honest captain came to Lisbon, he found means, by some of the English merchants there, to send over not the order only, but a full account of my story to a merchant at London, who represented it effectually to her; whereupon, she not only delivered the money, but out of her own pocket sent the Portugal captain a very handsome present for his humanity and charity to me.

The merchant in London vesting this hundred pounds in English goods, such as the captain had written for, sent them directly to him at Lisbon, and he brought them all safe to me to the Brazils; among which, without my direction (for I was too young in my business to think of them), he had taken care to have all sorts of tools, iron-work, and utensils necessary for my plantation, and these were of great use to me.

When this cargo arrived, I thought my fortune made, for I was surprised with joy of it; and my good steward,

the captain, had laid out the five pounds, which my friend had sent him for a present for himself, to purchase and bring me over a servant under bond for six years' service, and would not accept of any consideration, except a little tobacco, which I would have him accept, being of my own produce.

Neither was this all; but my goods being all English manufactures, such as cloth, stuffs, baize, and things particularly valuable and desirable in the country, I found means to sell them to a very great advantage; so that I may say I had more than four times the value of my first cargo, and was now infinitely beyond my poor neighbour, I mean in the advancement of my plantation; for the first thing I did, I bought me a negro slave, and an European servant also; I mean another besides that which the captain brought me from Lisbon.

But as abused prosperity is oftentimes made the very means of our greatest adversity, so was it with me. I went on the next year with great success in my plantation. I raised fifty great rolls of tobacco on my own ground, more than I had disposed of for necessities among my neighbours; and these fifty rolls, being each of above a hundredweight, were well cured, and laid by against the return of the fleet from Lisbon. And now, increasing in business and in wealth, my head began to be full of projects and undertakings beyond my reach, such as are, indeed, often the ruin of the best heads in business.

You may suppose, that having now lived almost four years in the Brazils, and beginning to thrive and prosper very well upon my plantation, I had not only learned the language, but had contracted acquaintance and friendship among my fellow-planters, as well as among the merchants of St. Salvador, which was our port, and that in my discourses among them I had frequently given them an account of my two voyages to the coast of Guinea, the

manner of trading with the negroes there, and how easy it was to purchase upon the coast for trifles—such as beads, toys, knives, scissors, hatchets, bits of glass, and the like—not only gold-dust, Guinea grains, elephants' teeth, etc., but negroes, for the service of the Brazils, in great numbers.

They listened always very attentively to my discourses on these heads, but especially to that part which related to the buying of negroes; which was a trade, at that time, not only not far entered into, but, as far as it was, had been carried on by the *assiento*, or permission, of the Kings of Spain and Portugal, so that negroes were brought, and those excessive dear.

It happened, being in company with some merchants and planters of my acquaintance, and talking of those things very earnestly, three of them came to me the next morning, and told me they had been musing very much upon what I had discoursed with them of, the last night, and they came to make a secret proposal to me. And after enjoining secrecy, they told me that they had a mind to fit out a ship to go to Guinea; that they all had plantations as well as I, and were straitened for nothing so much as servants; that as it was a trade that could not be carried on because they could not publicly sell the negroes when they came home, so they desired to make but one voyage, to bring the negroes on shore privately, and divide them among their own plantations; and, in a word, the question was, whether I would go as their supercargo in the ship, to manage the trading part upon the coast of Guinea; and they offered me that I should have my equal share of the negroes without providing any part of the stock.

This was a fair proposal, it must be confessed, had it been made to any one that had not had a settlement and plantation of his own to look after, which was in a fair

way of coming to be very considerable, and with a good stock upon it. But for me, that was thus entered and established, and had nothing to do but go on as I had begun, for three or four years more, and to have sent for the other hundred pounds from England; and who, in that time, and with that little addition, could scarce have failed of being worth three or four thousand pounds sterling, and that increasing too—for me to think of such a voyage, was the most preposterous thing that ever man, in such circumstances, could be guilty of.

But I, that was born to be my own destroyer, could not resist the offer, and I told them I would go with all my heart, if they would undertake to look after my plantation in my absence, and would dispose of it to such as I should direct if I miscarried. This they all engaged to do, and entered into writings or covenants to do so; and I made a formal will, disposing of my plantation and effects, in case of my death; making the captain of the ship that had saved my life, as before, my universal heir, but obliging him to dispose of my effects as I had directed in my will; one half of the produce being to himself, and the other to be shipped to England.

In short, I took all possible cause to preserve my effects, and keep up my plantation. Had I used half as much prudence to have looked into my own interest, and have made a judgment of what I ought to have done and not to have done, I had certainly never gone away from so prosperous an undertaking, leaving all the probable views of a thriving circumstance, and gone upon a voyage to sea, attended with all its common hazards, to say nothing of the reasons I had to expect particular misfortunes to myself.

But I was hurried on, and obeyed blindly the dictates of my fancy rather than my reason. And accordingly, the ship being fitted out, and the cargo furnished, and all

things done as by agreement by my partners in the voyage, I went on board in an evil hour [the first of September 1659], being the same day eight years that I went from my father and mother at Hull, in order to act the rebel to their authority, and the fool to my own interest.

Our ship was about 120 tons burthen, carried six guns and fourteen men, besides the master, his boy, and myself. We had on board no large cargo of goods, except of such toys as were fit for our trade with the negroes—such as beads, bits of glass, shells, and odd trifles, especially little looking-glasses, knives, scissors, hatchets, and the like.

The same day I went on board we set sail, standing away to the northward upon our own coast, with design to stretch over for the African coast, when we came to about ten or twelve degrees of northern latitude. We passed the line in about twelve days' time, and were, by our last observation, in seven degrees twenty-two minutes northern latitude, when a violent tornado, or hurricane, took us quite out of our knowledge. It began from the south-east, came about to the north-west, and then settled into the north-east, from whence it blew in such a terrible manner, that for twelve days together we could do nothing but drive, and, scudding away before it, let it carry us wherever fate and the fury of the winds directed; and during these twelve days, I need not say that I expected every day to be swallowed up, nor, indeed, did any in the ship expect to save their lives.

In this distress we had, besides the terror of the storm, one of our men die of the calenture, and one man and the boy washed overboard. About the twelfth day, the weather abating a little, the master made an observation as well as he could, and found that he was upon the coast of Guiana, or the north part of Brazil, beyond the river Amazon, toward the river Orinoco, commonly called the

Great River, and began to consult with me what course we should take, for the ship was leaky and very much disabled, and he was for going directly back to the coast of Brazil.

- I was positively against that; and looking over the charts of the sea-coast of America with him, we concluded there was no inhabited country for us to have recourse to till we came within the circle of the Caribbee Islands, and therefore resolved to stand away for the Barbadoes, which by keeping off at sea, to avoid the indraft of the Bay or Gulf of Mexico, we might easily perform, as we hoped, in about fifteen days' sail; whereas we could not possibly make our voyage to the coast of Africa without some assistance, both to our ship and to ourselves.

With this design we changed our course, and steered away N.W. by W. in order to reach some of our English islands, where I hoped for relief. But our voyage was otherwise determined, for a second storm came upon us, which carried us away with the same impetuosity westward, and drove us so far out of the very way of all human commerce, that had all our lives been saved, as to the sea, we were rather in danger of being devoured by savages than ever returning to our own country.

In this distress, the wind still blowing very hard, one of our men early in the morning cried out, "Land!" and we had no sooner run out of the cabin to look out, in hopes of seeing whereabouts in the world we were, when the ship struck upon a sand, and in a moment, her motion being so stopped, the sea broke over her in such a manner, that we expected we should all have perished immediately; and we were immediately driven into our close quarters, to shelter us from the very foam and spray of the sea.

It is not easy for any one, who has not been in the like condition, to describe or conceive the consternation of men in such circumstances. We knew nothing where we were,

or upon what land it was we were driven, whether an island or the main, whether inhabited or not inhabited; and as the rage of the wind was still great, though rather less than at first, we could not so much as hope to have the ship hold many minutes without breaking in pieces, unless the winds, by a kind of miracle, should turn immediately about. In a word, we sat looking one upon another, and expecting death every moment, and every man acting accordingly, as preparing for another world; for there was little or nothing more for us to do in this. That which was our present comfort, and all the comfort we had, was that, contrary to our expectation, the ship did not break yet, and that the master said the wind began to abate.

Now, though we thought that the wind did a little abate, yet the ship having thus struck upon the sand, and sticking too fast for us to expect her getting off, we were in a dreadful condition indeed, and had nothing to do but to think of saving our lives as well as we could. We had a boat at our stern just before the storm, but she was first staved by dashing against the ship's rudder, and in the next place, she broke away, and either sank, or was driven off to sea, so there was no hope from her; we had another boat on board, but how to get her off into the sea was a doubtful thing. However, there was no room to debate, for we fancied the ship would break in pieces every minute, and some told us she was actually broken already.

In this distress, the mate of our vessel laid hold of the boat, and with the help of the rest of the men they got her slung over the ship's side; and getting all into her, let go, and committed ourselves, being eleven in number, to God's mercy, and the wild sea; for though the storm was abated considerably, yet the sea went dreadfully high upon the shore.

And now our case was very dismal indeed, for we all

saw plainly that the sea went so high, that the boat could not live, and that we should be inevitably drowned. However, we committed our souls to God in the most earnest manner; and the wind driving us towards the shore, we hastened our destruction with our own hands, pulling as well as we could towards land.

What the shore was, whether rock or sand, whether steep or shoal, we knew not; the only hope that could rationally give us the least shadow of expectation was, if we might happen into some bay or gulf, or the mouth of some river, where by great chance we might have run our boat in, or got under the lee of the land, and perhaps made smooth water. But there was nothing of this appeared, and as we made nearer and nearer the shore, the land looked more frightful than the sea.

After we had rowed, or rather driven, about a league and a half, as we reckoned it, a raging wave, mountain-like, came rolling astern of us, and plainly bade us expect the *coup de grâce*. In a word, it took us with such fury, that it overset the boat at once; and separating us, as well from the boat as from one another, we were all swallowed up in a moment.

Nothing can describe the confusion of thought which I felt when I sank into the water; for though I swam very well, yet I could not deliver myself from the waves so as to draw breath, till that wave having driven me, or rather carried me, a vast way on towards the shore, and having spent itself, went back, and left me upon the land almost dry, but half dead with the water I took in. I had so much presence of mind, as well as breath left, that seeing myself nearer the mainland than I expected, I got upon my feet, and endeavoured to make on towards the land as fast as I could, before another wave should return and take me up again. But I soon found it was impossible to avoid it; for I saw the sea come after me as high as a

great hill, and as furious as an enemy, which I had no means or strength to contend with. My business was to hold my breath, and raise myself upon the water, if I could; and so by swimming, to preserve my breathing, and pilot myself towards the shore, if possible; my greatest concern now being, that the sea, as it would carry me a great way towards the shore when it came on, might not carry me back again with it when it gave back towards the sea.

The wave that came upon me again, buried me at once 20 or 30 feet deep in its own body, and I could feel myself carried with a mighty force and swiftness towards the shore a very great way; but I held my breath, and assisted myself to swim still forward with all my might. I was ready to burst with holding my breath, when, as I felt myself rising up, so, to my immediate relief, I found my head and hands shoot out above the surface of the water; and though it was not two seconds of time that I could keep myself so, yet it relieved me greatly, gave me breath and new courage. I was covered again with water a good while, but not so long but I held it out; and finding the water had spent itself and began to return, I struck forward against the return of the waves, and felt ground again with my feet. I stood still a few moments to recover breath, and till the water went from me, and then took to my heels and ran with what strength I had farther towards the shore. But neither would this deliver me from the fury of the sea, which came pouring in after me again, and twice more I was lifted up by the waves and carried forwards as before, the shore being very flat.

The last time of these two had well near been fatal to me; for the sea, having hurried me along as before, landed me, or rather dashed me, against a piece of a rock, and that with such force, as it left me senseless, and indeed helpless, as to my own deliverance; for the blow taking

my side and breast, beat the breath as it were quite out of my body; and had it returned again immediately, I must have been strangled in the water. But I recovered a little before the return of the waves, and seeing I should be covered again with the water, I resolved to hold fast by a piece of the rock, and so to hold my breath, if possible, till the wave went back. Now as the waves were not so high as at first, being near land, I held my hold till the wave abated, and then fetched another run, which brought me so near the shore, that the next wave, though it went over me, yet did not so swallow me up as to carry me away, and the next run I took I got to the mainland, where, to my great comfort, I clambered up the cliffs of the shore, and sat me down upon the grass, free from danger, and quite out of the reach of the water.

I was now landed, and safe on shore, and began to look up and thank God that my life was saved in a case wherein there was some minutes before scarce any room to hope.

I walked about on the shore, lifting up my hands, and my whole being, as I may say, wrapt up in the contemplation of my deliverance, reflecting upon all my comrades that were drowned, and that there should not be one soul saved but myself; for, as for them, I never saw them afterwards, or any sign of them, except three of their hats, one cap, and two shoes that were not fellows.

After I had solaced my mind with the comfortable part of my condition, I began to look round me to see what kind of place I was in, and what was next to be done, and I soon found my comforts abate, and that, in a word, I had a dreadful deliverance; for I was wet, had no clothes to shift me, nor anything either to eat or drink to comfort me, neither did I see any prospect before me but that of perishing with hunger, or being devoured by wild beasts; and that which was particularly afflicting to me was, that I had no weapon either to hunt and kill any

creature for my sustenance, or to defend myself against any other creature that might desire to kill me for theirs. In a word, I had nothing about me but a knife, a tobacco-pipe, and a little tobacco in a box. This was all my provision; and this threw me into such terrible agonies of mind, that for a while I ran about like a madman. Night coming upon me, I began, with a heavy heart, to consider what would be my lot if there were any ravenous beasts in that country, seeing at night they always come abroad for their prey.

All the remedy that offered to my thoughts at that time was, to get up into a thick bushy tree like a fir, but thorny, which grew near me, and where I resolved to sit all night, and consider the next day what death I should die, for as yet I saw no prospect of life. I walked about a furlong from the shore, to see if I could find any fresh water to drink, which I did, to my great joy; and having drunk, and put a little tobacco in my mouth to prevent hunger, I went to the tree, and getting up into it, endeavoured to place myself so that if I should sleep I might not fall; and having cut me a short stick, like a truncheon, for my defence, I took up my lodging, and having been excessively fatigued, I fell fast asleep, and slept as comfortably as, I believe, few could have done in my condition, and found myself the most refreshed with it that I think I ever was on such an occasion.

When I awoke it was broad day, the weather clear, and the storm abated, so that the sea did not rage and swell as before. But that which surprised me most was, that the ship was lifted off in the night from the sand where she lay, by the swelling of the tide, and was driven up almost as far as the rock which I first mentioned, where I had been so bruised by dashing against it. This being within about a mile from the shore where I was, and the ship seeming to stand upright still, I wished myself on

board, that, at least, I might have some necessary things for my use.

When I came down from the tree I looked about me again, and the first thing I found was the boat, which lay as the wind and the sea had tossed her up upon the land, about two miles on my right hand. I walked as far as I could upon the shore to have got to her, but found a neck or inlet of water between me and the boat, which was about half a mile broad; so I came back for the present, being more intent upon getting at the ship, where I hoped to find something for my present subsistence.

A little after noon I found the sea very calm, and the tide ebbed so far out, that I could come within a quarter of a mile of the ship; and here I found a fresh renewing of my grief, for I saw evidently, that if we had kept on board we had been all safe, that is to say, we had all got safe on shore, and I had not been so miserable as to be left entirely destitute of all comfort and company, as I now was. This forced tears from my eyes again; but as there was little relief in that, I resolved, if possible, to get to the ship; so I pulled off my clothes, for the weather was hot to extremity, and took to the water. But when I came to the ship, my difficulty was still greater to know how to get on board; for as she lay aground, and high out of the water, there was nothing within my reach to lay hold of. I swam round her twice, and the second time I spied a small piece of a rope, which I wondered I did not see at first, hang down by the fore-chains so low, as that with great difficulty I got hold of it, and by the help of that rope got up into the fore-castle of the ship. Here I found that the ship was bulged, and had a great deal of water in her hold, but that she lay so on the side of a bank of hard sand, or rather earth, that her stern lay lifted up upon the bank, and her head low almost to the water. By this means all her quarter was free, and all that was in that

part was dry ; for you may be sure my first work was\*to search and to see what was spoiled and what was free. And first I found that all the ship's provisions were dry and untouched by the water ; and being very well disposed to eat, I went to the bread-room and filled my pockets with biscuit, and ate it as I went about other things, for I had no time to lose. I also found some rum in the great cabin, of which I took a large dram, and which I had indeed need enough of to spirit me for what was before me. Now I wanted nothing but a boat, to furnish myself with many things which I foresaw would be very necessary to me.

It was in vain to sit still and wish for what was not to be had, and this extremity roused my application. We had several spare yards, and two or three large spars of wood, and a spare top-mast or two in the ship. I resolved to fall to work with these, and flung as many of them overboard as I could manage, tying every one with a rope, that they might not drive away. When this was done I went down the ship's side, and, pulling them to me, I tied four of them fast together at both ends as well as I could, in the form of a raft ; and laying two or three short pieces of plank upon them crossways, I found I could walk upon it very well, but that it was not able to bear any great weight, the pieces being too light. So I went to work, and with the carpenter's saw I cut a spare top-mast into three lengths, and added them to my raft, with a great deal of labour and pains ; but the hope of furnishing myself with necessaries encouraged me to go beyond what I should have been able to have done upon another occasion.

My raft was now strong enough to bear any reasonable weight. My next care was what to load it with, and how to preserve what I laid upon it from the surf of the sea ; but I was not long considering this. I first laid all the planks or boards upon it that I could get, and having considered well what I most wanted, I first got three of the

seamen's chests, which I had broken open, and emptied, and lowered them down upon my raft. The first of these I filled with provisions, viz., bread, rice, three Dutch cheeses, five pieces of dried goat's flesh, which we lived much upon, and a little remainder of European corn, which had been laid by for some fowls which we brought to sea with us, but the fowls were killed. There had been some barley and wheat together, but, to my great disappointment, I found afterwards that the rats had eaten or spoiled it all. As for liquors, I found several cases of bottles belonging to our skipper, in which were some cordial waters, and, in all, about five or six gallons of rack. These I stowed by themselves, there being no need to put them into the chest, nor any room for them.

While I was doing this, I found the tide began to flow, though very calm, and I had the mortification to see my coat, shirt, and waistcoat, which I had left on shore upon the sand, swim away; as for my breeches, which were only linen, and open-kneed, I swam on board in them and my stockings. However, this put me upon rummaging for clothes, of which I found enough, but took no more than I wanted for present use; for I had other things which my eye was more upon, as first tools to work with on shore; and it was after long searching that I found out the carpenter's chest, which was indeed a very useful prize to me, and much more valuable than a shiploading of gold would have been at that time. I got it down to my raft, even whole as it was, without losing time to look into it, for I knew in general what it contained.

My next care was for some ammunition and arms; there were two very good fowling-pieces in the great cabin, and two pistols; these I secured first, with some powder-horns, and a small bag of shot, and two old rusty swords. I knew there were three barrels of powder in the ship, but knew not where our gunner had stowed them; but with

AND NOW I THOUGHT MYSELF PRETTY WELL FREIGHTED.

much search I found them, two of them dry and good, the third had taken water; those two I got to my raft with the arms. And now I thought myself pretty well freighted, and began to think how I should get to shore with them, having neither sail, oar, nor rudder; and the least capful of wind would have upset all my navigation.

I had three encouragements. 1. A smooth calm sea. 2. The tide rising and setting in to the shore. 3. What little wind there was blew me towards the land. And thus, having found two or three broken oars belonging to the boat, and besides the tools which were in the chest, I found two saws, an axe, and a hammer, and with this cargo I put to sea. For a mile or thereabouts my raft went very well, only that I found it drive a little distance from the place where I had landed before, by which I perceived that there was some indraft of the water, and consequently I hoped to find some creek or river there, which I might make use of as a port to get to land with my cargo.

As I imagined, so it was; there appeared before me a little opening of the land, and I found a strong current of the tide set into it, so I guided my raft as well as I could to keep in the middle of the stream. But here I had like to have suffered a second shipwreck, which, if I had, I think verily would have broken my heart; for knowing nothing of the coast, my raft ran aground at one end of it upon a shoal, and not being aground at the other end, it wanted but a little that all my cargo had slipped off towards that end that was afloat, and so fallen into the water. I did my utmost by setting my back against the chests to keep them in their places, but could not thrust off the raft with all my strength, neither durst I stir from the posture I was in, but holding up the chests with all my might, stood in that manner nearly half-an-hour, in which time the rising of the tide brought me a little more upon a level; and a little after, the water still rising, my raft

floated again, and I thrust her off with the oar I had into the channel, and then driving up higher, I at length found myself in the mouth of a little river, with land on both sides, and a strong current or tide running up. I looked on both sides for a proper place to get to shore, for I was not willing to be driven too high up the river, hoping in time to see some ship at sea, and therefore resolved to place myself as near the coast as I could.

At length I spied a little cove on the right shore of the creek, to which, with great pain and difficulty, I guided my raft, and at last got so near that reaching ground with my oar, I could thrust her directly in; but here I had liked to have dipped all my cargo in the sea again; for that shore lying pretty steep, that is to say, sloping, there was no place to land but where one end of my float, if it ran on shore, would lie so high and the other sink lower, as before, that it would endanger my cargo again. All that I could do was to wait till the tide was at the highest, keeping the raft with my oar like an anchor to hold the side of it fast to the shore, near a flat piece of ground, which I expected the water would flow over; and so it did. As soon as I found water enough, for my raft drew about a foot of water, I thrust her on upon that flat piece of ground, and there fastened or moored her by sticking my two broken oars into the ground; one on one side near one end, and one on the other side near the other end; and thus I lay till the water ebbed away, and left my raft and all my cargo safe on shore.

My next work was to view the country and seek a proper place for my habitation, and where to stow my goods to secure them from whatever might happen. Where I was, I yet knew not; whether on the continent, or on an island; whether inhabited or not inhabited; whether in danger of wild beasts, or not. There was a hill, not above a mile from me, which rose up very steep

and high, and which seemed to overtop some other hills, which lay as in a ridge from it, northward. I took out one of the fowling-pieces and one of the pistols, and a horn of powder ; and thus armed, I travelled for discovery up to the top of that hill, where, after I had with great labour and difficulty got to the top, I saw my fate to my great affliction, viz., that I was on an island environed every way with the sea, no land to be seen, except some rocks which lay a great way off, and two small islands less than this, which lay about three leagues to the west.

I found also that the island I was in was barren, and, as I saw good reason to believe, uninhabited, except by wild beasts, of whom, however, I saw none ; yet I saw abundance of fowls, but knew not their kinds ; neither, when I killed them, could I tell what was fit for food, and what not. At my coming back, I shot at a great bird which I saw sitting upon a tree on the side of a great wood. I believe it was the first gun that had been fired there since the creation of the world. I had no sooner fired, but from all the parts of the wood there arose an innumerable number of fowls of many sorts, making a confused screaming, and crying every one according to his usual note ; but not one of them of any kind that I knew. As for the creature I killed, I took it to be a kind of a hawk, its colour and beak resembling it, but had no talons or claws more than common ; its flesh was carrion, and fit for nothing.

Contented with this discovery, I came back to my raft, and fell to work to bring my cargo on shore, which took me up the rest of that day ; and what to do with myself at night I knew not, nor indeed where to rest ; for I was afraid to lie down on the ground, not knowing but some wild beast might devour me, though, as I afterwards found, there was really no need for those fears. However, as well as I could, I barricaded myself round with the chests and

boards that I had brought on shore, and made a kind of a hut for that night's lodging; as for food, I yet saw not which way to supply myself, except that I had seen two or three creatures like hares run out of the wood where I shot the fowl.

I now began to consider that I might yet get a great many things out of the ship which would be useful to me, and particularly some of the rigging and sails and such other things as might come to land; and I resolved to make another voyage on board the vessel, if possible. And as I knew that the first storm that blew must necessarily break her all in pieces, I resolved to set all other things apart till I got everything out of the ship that I could get. Then I called a council, that is to say, in my thoughts, whether I should take back the raft, but this appeared impracticable; so I resolved to go as before, when the tide was down; and I did so, only that I stripped before I went from my hut, having nothing on but a chequered shirt and a pair of linen drawers, and a pair of pumps on my feet.

I got on board the ship as before, and prepared a second raft, and having had experience of the first, I neither made this so unwieldy, nor loaded it so hard; but yet I brought away several things very useful to me; as, first, in the carpenter's stores I found two or three bags full of nails and spikes, a great screw-jack, a dozen or two of hatchets, and above all, that most useful thing called a grindstone. All these I secured, together with several things belonging to the gunner, particularly two or three iron crows, and two barrels of musket bullets, seven muskets, and another fowling-piece, with some small quantity of powder more; a large bag full of small-shot, and a great roll of sheet lead; but this last was so heavy, I could not hoist it up to get it over the ship's side. Besides these things, I took all the men's clothes that I could find, and a spare fore-top

sail, a hammock, and some bedding; and with this I loaded my second raft, and brought them all safe on shore, to my very great comfort.

I was under some apprehensions during my absence from the land, that at least my provisions might be devoured on shore; but when I came back, I found no sign of any visitor, only there sat a creature like a wild cat upon one of the chests, which, when I came towards it, ran away a little distance, and then stood still. She sat very composed and unconcerned, and looked full in my face, as if she had a mind to be acquainted with me. I presented my gun at her, but as she did not understand it, she was perfectly unconcerned at it, nor did she offer to stir away; upon which I tossed her a bit of biscuit, though, by the way, I was not very free of it, for my store was not great. However, I spared her a bit, I say, and she went to it, smelled of it, and ate it, and looked for more; but I thanked her, and could spare no more, so she marched off.

Having got my second cargo on shore, though I was fain to open the barrels of powder and bring them by parcels, for they were too heavy, being large casks, I went to work to make me a little tent with the sail and some poles which I cut for that purpose; and into this tent I brought everything that I knew would spoil either with rain or sun. I piled all the empty chests and casks up in a circle round the tent, to fortify it from any sudden attempt, either from man or beast.

When I had done this I blocked up the door of the tent with some boards within, and an empty chest set up on end without; and spreading one of the beds upon the ground, laying my two pistols just at my head, and my gun at length by me, I went to bed for the first time, and slept very quietly all night, for I was very weary and heavy, for the night before I had slept little, and had

laboured very hard all day, as well to fetch all those things from the ship, as to get them on shore.

I had the biggest magazine of all kinds now that ever was laid up, I believe, for one man; but I was not satisfied, for while the ship sat upright in that posture, I thought I ought to get everything out of her that I could. So every day at low water I went on board, and brought away something or other; but, particularly, the third time I went I brought away as much of the rigging as I could, as also all the small ropes and rope-twine I could get, with a piece of spare canvas, which was to mend the sails upon occasion, and the barrel of wet gunpowder; in a word, I brought away all the sails first and last, only that I was fain to cut them in pieces, and bring as much at a time as I could; for they were no more useful as sails, but as mere canvas only.

But that which comforted me more still was, that at last of all, after I had made five or six such voyages as these, and thought I had nothing more to expect from the ship that was worth my meddling with; I say, after all this, I found a great hogshead of bread, and three large runlets of rum or spirits, and a box of sugar, and a barrel of fine flour. This was surprising to me, because I had given over expecting any more provisions, except what was spoilt by the water. I soon emptied the hogshead of the bread, and wrapped it up parcel by parcel in pieces of the sails, which I cut out; and, in a word, I got all safe on shore also.

The next day I made another voyage. And now, having plundered the ship of what was portable and fit to hand out, I began with the cables; and cutting the great cable into pieces, such as I could move, I got two cables and a hawser on shore, with all the iron-work I could get; and having cut down the sprit-sail yard, and the mizzen yard, and everything I could to make a large

raft, I loaded it with all those heavy goods, and came away. But my good luck began now to leave me; for this raft was so unwieldy, and so overladen, that after I had entered the little cove where I had landed the rest of my goods, not being able to guide it so handily as I did the other, it overset, and threw me and all my cargo into the water. As for myself, it was no great harm, for I was near the shore; but as to my cargo, it was great part of it lost, especially the iron, which I expected would have been of great use to me. However, when the tide was out I got most of the pieces of cable ashore, and some of the iron, though with infinite labour; for I was fain to dip for it into the water, a work which fatigued me very much. After this I went every day on board, and brought away what I could get.

I had been now thirteen days on shore, and had been eleven times on board the ship; in which time I had brought away all that one pair of hands could well be supposed capable to bring, though I believe verily, had the calm weather held, I should have brought away the whole ship piece by piece. But preparing the twelfth time to go on board, I found the wind begin to rise. However, at low water I went on board, and though I thought I had rummaged the cabin so effectually that nothing more could be found, yet I discovered a locker with drawers in it, in one of which I found two or three razors, and one pair of large scissors, with some ten or a dozen of good knives and forks; in another, I found about thirty-six pounds value in money, some European coin, some Brazil, some pieces of eight, some gold, and some silver.

I smiled to myself at the sight of this money. "O drug!" said I aloud, "what art thou good for? Thou art not worth to me, no, not the taking off of the ground; one of those knives is worth all this heap. I have no manner of use for thee; remain where thou art, and

go to the bottom as a creature whose life is not worth saving."

However, upon second thoughts, I took it away; and wrapping all this in a piece of canvas, I began to think of making another raft; but while I was preparing this, I found the sky overcast, and the wind began to rise, and in a quarter of an hour it blew a fresh gale from the shore. It presently occurred to me that it was in vain to pretend to make a raft with the wind off shore, and that it was my business to be gone before the flood tide began, otherwise I might not be able to reach the shore at all. Accordingly I let myself down into the water, and swam across the channel, which lay between the ship and the sands, and even that with difficulty enough, partly with the weight of the things I had about me, and partly the roughness of the water; for the wind rose very hastily, and before it was quite high water it blew a storm.

But at length I reached my little tent, where I lay with all my wealth about me very secure. It blew very hard all that night, and in the morning, when I looked out, behold, no more ship was to be seen. I was a little surprised, but recovered myself with this satisfactory reflection, viz., that I had lost no time, nor abated diligence, to get everything out of her that could be useful to me, and that indeed there was little left in her that I was able to bring away if I had had more time.

I now gave over any more thoughts of the ship, or of anything out of her, except what might drive on shore from her, as indeed divers pieces of her afterwards did; but those things were of small use to me.

My thoughts were now wholly employed about securing myself against either savages, if any should appear, or wild beasts, if any were in the island; and I had many thoughts of the method how to do this, and what kind of dwelling to make, whether I should make me a cave in the earth, or

a tent upon the earth ; and, in short, I resolved upon both, the manner and description of which it may not be out of place to give an account of.

I soon found that my present position was not the best for my settlement, as it was upon a low marshy ground near the sea, and I believed would not be wholesome ; and more particularly because there was no fresh water near it. So I resolved to find a more healthy and more convenient spot of ground.

I considered several things in my situation, which I found would be proper for me. First, health and fresh water, I just now mentioned. Secondly, shelter from the heat of the sun. Thirdly, security from ravenous creatures, whether men or beasts. Fourthly, a view of the sea, that if God sent any ship in sight I might not lose any advantage for my deliverance, of which I was not willing to banish all my expectation yet.

In search of a place proper for this, I found a little plain on the side of a rising hill, whose front towards this little plain was steep as a house-side, so that nothing could come down upon me from the top ; on the side of this rock there was a hollow place, worn a little way in, like the entrance or door of a cave ; but there was not really any cave, or way into the rock at all.

On the flat of the green, just before this hollow place, I resolved to pitch my tent. This plain was not above an hundred yards broad, and about twice as long, and lay like a green before my door, and at the end of it descended irregularly every way down into the low grounds by the seaside. It was on the N.N.W. side of the hill, so that I was sheltered from the heat every day, till it came to a W. and by S. sun, or thereabouts, which in those countries is near the setting.

Before I set up my tent, I drew a half-circle before the hollow place, which took in about ten yards in its

CRUSOE SEARCHES FOR A PROPER PLACE IN WHICH TO MAKE  
HIS HOME.

semi-diameter from the rock, and twenty yards in its diameter from its beginning and ending. In this half-circle I pitched two rows of strong stakes, driving them into the ground till they stood very firm like piles, the biggest end being out of the ground about five feet and a half, and sharpened on the top. The two rows did not stand above six inches from one another.

Then I took the pieces of cable which I had cut in the ship, and laid them in rows one upon another, within the circle, between these two rows of stakes, up to the top, placing other stakes in the inside leaning against them, about two feet and a half high, like a spur to a post; and this fence was so strong, that neither man nor beast could get into it, or over it. This cost me a great deal of time and labour, especially to cut the piles in the woods, bring them to the place, and drive them into the earth.

The entrance into this place I made to be not by a door, but by a short ladder to go over the top; which ladder, when I was in, I lifted over after me, and so I was completely fenced in, and fortified, as I thought, from all the world, and consequently slept secure in the night, which otherwise I could not have done; though as it appeared afterward, there was no need of all this caution from the enemies that I apprehended danger from.

Into this fence or fortress, with infinite labour, I carried all my riches, all my provisions, ammunition, and stores, of which you have the account above; and I made me a large tent, which, to preserve me from the rains that in one part of the year are very violent there, I made double, viz., one smaller tent within, and one larger tent above it, and covered the uppermost with a large tarpaulin, which I had saved among the sails. And now I lay no more for a while in the bed which I had brought on shore, but in a hammock, which was indeed a very good one, and belonged to the mate of the ship.

Into this tent I brought all my provisions, and everything that would spoil by the wet; and having thus enclosed all my goods, I made up the entrance, which, till now, I had left open, and so passed and repassed, as I said, by a short ladder.

When I had done this, I began to work my way into the rock; and bringing all the earth and stones that I dug down out through my tent, I laid them up within my fence in the nature of a terrace, so that it raised the ground within about a foot and a half; and thus I made me a cave just behind my tent, which served like a cellar to my house.

It cost me much labour and many days, before all these things were brought to perfection, and therefore I must go back to some other things which took up some of my thoughts. At the same time it happened, after I had laid my scheme for the setting up my tent, and making the cave, that a storm of rain falling from a thick dark cloud, a sudden flash of lightning happened, and after that a great clap of thunder, as is naturally the effect of it. I was not so much surprised with the lightning, as I was with a thought which darted into my mind as swift as the lightning itself. Oh my powder! My very heart sank within me when I thought that at one blast all my powder might be destroyed, on which, not my defence only, but the providing me food, as I thought, entirely depended. I was nothing near so anxious about my own danger; though had the powder taken fire, I had never known who had hurt me.

Such an impression did this make upon me, that after the storm was over I laid aside all my works, my building, and fortifying, and applied myself to make bags and boxes to separate the powder, and keep it a little and a little in a parcel, in hope that whatever might come it might not all take fire at once, and to keep it so apart, that it should

not be possible to make one part fire another. I finished this work in about a fortnight, and I think my powder, which ~~is~~ all was about 240 pounds' weight, was divided in not less than a hundred parcels. As to the barrel that had been wet, I did not apprehend any danger from that, so I placed it in my new cave, which in my fancy I called my kitchen, and the rest I hid up and down in holes among the rocks, so that no wet might come to it, marking very carefully where I laid it.

In the interval of time while this was doing, I went out once, at least, every day with my gun, as well to divert myself, as to see if I could kill anything fit for food, and as near as I could to acquaint myself with what the island produced. The first time I went out, I presently discovered that there were goats in the island, which was a great satisfaction to me; but then it was attended with this misfortune to me, viz., that they were so shy, so subtle, and so swift of foot, that it was the most difficult thing in the world to come at them. But I was not discouraged at this, not doubting but I might now and then shoot one, as it soon happened; for after I had found their haunts a little, I laid wait in this manner for them. I observed if they saw me in the valleys, though they were upon the rocks, they would run away as in a terrible fright; but if they were feeding in the valleys, and I was upon the rocks, they took no notice of me, from whence I concluded that, by the position of their optics, their sight was so directed downward, that they did not readily see objects that were above them. So afterward I took this method; I always climbed the rocks first to get above them, and then had frequently a fair mark. The first shot I made among these creatures I killed a she-goat, which had a little kid by her, which she gave suck to and this grieved me heartily; but when the old one fell, the kid stood stock still by her till I came and took her up; and

not only so, but when I carried the old one with me upon my shoulders, the kid followed me quite to my enclosure; upon which I laid down the dam, and took the kid in my

I HAD ON A GREAT SHAPELESS CAP OF GOAT'S SKIN.

arms, and carried it over my pale, in hopes to have bred it up tame; but it would not eat, so I was forced to kill it, and eat it myself. These two supplied me with flesh a

great while, and saved my provisions, my bread especially, which I spared as much as possibly I could.

After I had been there about ten or twelve days, it came into my thoughts that I should lose my reckoning of time for want of books and pen and ink, and should even forget the Sabbath days from the working days; but to prevent this, I cut it with my knife upon a large post, in capital letters; and making it into a great cross, I set it up on the shore where I first landed, viz., "I came on shore here on the 30th of September 1659." Upon the sides of this square post I cut every day a notch with my knife, and every seventh notch was as long again as the rest, and every first day of the month as long again as that long one; and thus I kept my calendar, of weekly, monthly, and yearly reckoning of time.

In the next place we are to observe, that among the many things which I brought out of the ship in the several voyages I made to it, I got several things of less value, but not all less useful to me, which I omitted setting down before; as in particular, pens, ink, and paper, several parcels in the captain's, mate's, gunner's, and carpenter's keeping, three or four compasses, some mathematical instruments, dials, perspectives, charts, and books of navigation, all which I huddled together, whether I might want them or no. Also I found three very good Bibles, which came to me in my cargo from England, and which I had packed up among my things; some Portuguese books also, and among them two or three prayer-books, and several other books, all which I carefully secured. And I must not forget, that we had in the ship a dog and two cats, of whose history I may have occasion to say something in its place; for I carried both the cats with me; and as for the dog, he jumped out of the ship of himself, and swam on shore to me the day after I went on shore

with my first cargo, and was a trusty servant to me many years. I wanted nothing that he could fetch me, nor any company that he could make up to me; I only wanted to have him talk to me, but that he could not do. As I observed before, I found pen, ink, and paper, and I husbanded them to the utmost; and I shall show that while my ink lasted, I kept things very exact; but after that was gone, I could not, for I could not make any ink by any means that I could devise.

And this put me in mind that I wanted many things, notwithstanding all that I had amassed together; and of these, ink was one, as were also spade, pickaxe, and shovel, to dig or remove the earth, needles, pins, and thread; as for linen, I soon learned to want that without much difficulty.

This want of tools made every work I did go on heavily; and it was near a whole year before I had entirely finished my little pale or surrounded habitation. The piles or stakes, which were as heavy as I could well lift, were a long time in cutting and preparing in the woods, and more by far in bringing home; so that I spent sometimes two days in cutting and bringing home one of those posts, and a third day in driving it into the ground; for which purpose I got a heavy piece of wood at first, but at last bethought myself of one of the iron crows, which, however, though I found it, yet it made driving those posts or piles very laborious and tedious work.

I have already described my habitation, which was a tent under the side of a rock, surrounded with a strong pale of posts and cables; but I might now rather call it a wall, for I raised a kind of wall up against it of turfs, about two feet thick on the outside, and after some time—I think it was a year and a half—I raised rafters from it leaning to the rock, and thatched or covered it with boughs of trees and such things as I could get to keep out

the rain, which I found at some times of the year very violent.

I have already observed how I brought all my goods into this pale, and into the cave which I had made behind me. But I must observe, too, that at first this was a confused heap of goods, which as they lay in no order, so they took up all my place; I had no room to turn myself. So I set myself to enlarge my cave farther into the earth; for it was a loose sandy rock, which yielded easily to the labour I bestowed on it. And so, when I found I was pretty safe as to beasts of prey, I worked sideways to the right hand into the rock; and then, turning to the right again, worked quite out, and made me a door to come out on the outside of my pale or fortification. This gave me not only a back-way to my tent and to my storehouse, but gave me room to stow my goods.

And now I began to apply myself to make such necessary things as I found I most wanted, as particularly a chair and table; for without these I was not able to enjoy the few comforts I had in the world. I could not write or eat, or do several things with so much pleasure without a table.

I had never handled a tool in my life; and yet in time, by labour, application, and contrivance, I found at last that I wanted nothing but I could have made it, especially if I had had tools. However, I made abundance of things even without tools, and some with no more tools than an adze and a hatchet, which, perhaps, were never made that way before, and that with infinite labour. For example, if I wanted a board, I had no other way but to cut down a tree, set it on an edge before me, and hew it flat on either side with my axe, till I had brought it to be thin as a plank, and then cut it smooth with my adze. It is true, by this method I could make but one board out of a whole tree; but this I had no remedy for but patience,

any more than I had for the prodigious deal of time and labour which it took me to make a plank or board. But my time or labour was little worth, and so it was as well employed one way as another.

I BEGAN TO APPLY MYSELF TO MAKE NECESSARY THINGS.

However, I made me a table and a chair, as I observed above, and this I did out of the short pieces of boards that I brought on my raft from the ship. But when I had wrought out some boards, I made large

shelves of the breadth of a foot and a half, one over another, all along one side of my cave, to lay all my tools, nails, and iron-work; and, in a word, to separate everything at large in their places, that I might come easily at them. I knocked pieces into the wall of the rock to hang my guns and all things that would hang up; so that my cave looked like a general magazine of all necessary things; and I had everything so ready at my hand, that it was a great pleasure to me to see all my goods in such order, and especially to find my stock of all necessaries so great.

And now it was that I began to keep a journal of every day's employment; for, indeed, at first, I was in too much hurry, and not only hurry as to labour, but in too much discomposure of mind; and my journal would have been full of many dull things.

But having got over these things in some measure, and having settled my household stuff and habitation, made me a table and a chair, and all as handsome about me as I could, I began to keep my journal, of which I shall here give you the copy (though in it will be told all these particulars over again) as long as it lasted; for, having no more ink, I was forced to leave it off.

### EXTRACTS FROM THE JOURNAL

*Nov. 4.*—This morning I began to order my times of work, of going out with my gun, time of sleep, and time of diversion, viz., every morning I walked out with my gun for two or three hours, if it did not rain; then employed myself to work till about eleven o'clock; then eat what I had to live on; and from twelve to two I lay down to sleep, the weather being excessively hot; and then in the

evening to work again. The working part of this day and of the next were wholly employed in making my table; for I was yet but a very sorry workman, though time and necessity made me a complete natural mechanic soon after, as I believe it would do any one else.

*Nov. 5.*—This day went abroad with my gun and my dog, and killed a wild cat; her skin pretty soft, but her flesh good for nothing. Every creature I killed, I took off the skins and preserved them. Coming back by the sea-shore, I saw many sorts of sea-fowls, which I did not understand; but was surprised, and almost frightened, with two or three seals, which, while I was gazing at, not well knowing what they were, got into the sea, and escaped me for that time.

*Nov. 6.*—After my morning walk I went to work with my table again, and finished it, though not to my liking; nor was it long before I learned to mend it.

*Nov. 7.*—Now it began to be settled fair weather. The 7th, 8th, 9th, 10th, and part of the 12th (for the 11th was Sunday) I took wholly up to make me a chair, and with much ado, brought it to a tolerable shape, but never to please me; and even in the making, I pulled it in pieces several times.

*Nov. 17.*—This day I began to dig behind my tent into the rock, to make room for my farther conveniency. Note, three things I wanted exceedingly for this work, viz., a pick-axe, a shovel, and a wheelbarrow or basket; so I desisted from my work, and began to consider how to supply that want, and make me some tools. As for a pick-axe, I made use of the iron crows, which were proper enough, though heavy; but the next thing was a shovel or spade. This was so absolutely necessary, that indeed I could do nothing effectually without it; but what kind of one to make, I knew not.

*Nov. 18.*—The next day, in searching the woods, I

found a tree of that wood, or like it, which in the Brazils they call the iron-tree, for its exceeding hardness; of this, with great labour, and almost spoiling my axe, I cut a piece, and brought it home, too, with difficulty enough, for it was exceeding heavy.

The excessive hardness of the wood, and having no other way, made me a long while upon this machine, for I worked it effectually, by little and little, into the form of a shovel or spade, the handle exactly shaped like ours in England, only that the broad part having no iron shod upon it at bottom, it would not last me so long.

I still wanted a basket or a wheelbarrow. A basket I could not make by any means, having no such things as twigs that would bend to make wicker ware, at least none yet found out. And as to a wheelbarrow, I fancied I could make all but the wheel, but that I had no notion of, neither did I know how to go about it; besides, I had no possible way to make the iron gudgeons for the spindle or axis of the wheel to run in, so I gave it over; and so for carrying away the earth which I dug out of the cave, I made me a thing like a hod which the labourers carry mortar in, when they serve the bricklayers.

*Nov. 23.*—My other work having now stood still because of my making these tools, when they were finished I went on, and working every day, as my strength and time allowed, I spent eighteen days entirely in widening and deepening my cave, that it might hold my goods commodiously.

Note: During all this time I worked to make this room or cave spacious enough to accommodate me as a warehouse or magazine, a kitchen, a dining-room, and a cellar; as for my lodging, I kept to the tent, except that sometimes in the wet season of the year it rained so hard, that I could not keep myself dry, which caused me afterwards to cover all my place within my pale with long poles, in

the form of rafters, leaning against the rock, and load them with flags and large leaves of trees, like a thatch.

*December 10.*—I began now to think my cave—or vault finished, when on a sudden (it seems I had made it too large) a great quantity of earth fell down from the top and one side, so much, that, in short, it frightened me, and not without reason too; for if I had been under it, I had never wanted a gravedigger. Upon this disaster I had a great deal of work to do over again; for I had the loose earth to carry out, and, which was of more importance, I had the ceiling to prop up so that I might be sure no more would come down.

*Dec. 11.*—This day I went to work with it accordingly, and got two shores or posts pitched upright to the top, with two pieces of boards across over each post. This I finished the next day; and setting more posts up with boards, in about a week more I had the roof secured; and the posts standing in rows served me for partitions to part of my house.

*Dec. 17.*—From this day to the twentieth I placed shelves, and knocked up nails on the posts to hang everything up that could be hung up; and now I began to be in some order within doors.

*Dec. 20.*—Now I carried everything into the cave, and began to furnish my house, and set up some pieces of boards, like a dresser, to order my victuals upon; but boards began to be very scarce with me; also I made me another table.

*Dec. 27.*—Killed a young goat, and lamed another, so that I caught it, and led it home in a string. When I had it home, I bound and splintered up its leg, which was broken. I took such care of it, that it lived, and the leg grew well and as strong as ever; but by my nursing it so long it grew tame, and fed upon the little green at my door, and would not go away. This was the first time

that I entertained a thought of breeding up some tame creatures, that I might have food when my powder and shot were all spent.

*January 1.*—Very hot still, but I went abroad early and late with my gun, and lay still in the middle of the day. This evening, going farther into the valleys which lay towards the centre of the island, I found there was plenty of goats, though exceeding shy, and hard to come at. However, I resolved to try if I could not bring my dog to hunt them down.

*Jan. 2.*—Accordingly, the next day, I went out with my dog, and set him upon the goats; but I was mistaken, for they all faced about upon the dog; and he knew his danger too well, for he would not go near them.

*Jan. 3.*—I began my fence or wall; which, being still jealous of my being attacked by somebody, I resolved to make very thick and strong.

All this time I worked very hard, the rains hindering me many days, nay, sometimes weeks together; but I thought I should never be perfectly secure till this wall was finished. And it was scarce credible what inexpressible labour everything was done with, especially the bringing piles out of the woods, and driving them into the ground; for I made them much bigger than I need to have done.

When this wall was finished, and the outside double-fenced with a turf-wall raised up close to it, I persuaded myself that if any people were to come on shore there, they would not perceive anything like a habitation; and it was very well I did so, as may be observed hereafter upon a very remarkable occasion.

During this time, I made my rounds in the woods for game every day, when the rain admitted me, and made frequent discoveries in these walks of something or other to my advantage; particularly I found a kind of wild pigeons, who built, not as wood pigeons in a tree, but

rather as house pigeons, in the holes of the rocks. And taking some young ones, I endeavoured to breed them up tame, and did so; but when they grew older they flew away, which, perhaps, was at first for want of feeding them, for I had nothing to give them. However, I frequently found their nests, and got their young ones, which were very good meat.

And now in the managing my household affairs I found myself wanting in many things, which I thought at first it was impossible for me to make, as indeed, as to some of them, it was. For instance, I could never make a cask to be hooped; I had a small runlet or two, as I observed before, but I could never arrive to the capacity of making one by them, though I spent many weeks about it. I could neither put in the heads, or joint the staves so true to one another, as to make them hold water; so I gave that over also.

In the next place, I was at a great loss for candle; so that as soon as ever it was dark, which was generally by seven o'clock, I was obliged to go to bed. I remembered the lump of beeswax with which I made candles in my African adventure, but I had none of that now. The only remedy I had was, that when I had killed a goat I saved the tallow, and with a little dish made of clay, which I baked in the sun, to which I added a wick of some oakum, I made me a lamp; and this gave me light, though not a clear steady light like a candle.

In the middle of all my labours it happened, that rummaging my things, I found a little bag, which, as I hinted before, had been filled with corn for the feeding of poultry, not for this voyage, but before, as I suppose, when the ship came from Lisbon. What little remained of the corn that had been in the bag was all devoured with the rats, and I saw nothing in the bag but husks and dust; and being willing to have the bag for some other use, I think it was

to put powder in, when I divided it for fear of the lightning, or some such use, I shook the husks of corn out of it on one side of my fortification, under the rock. It was a little before the great rains, just now mentioned, that I threw this stuff away, taking no notice of anything, and not so much as remembering that I had thrown anything there; when, about a month after, or thereabout, I saw some few stalks of something green shooting out of the ground, which I fancied might be some plant I had not seen; but I was surprised, and perfectly astonished, when, after a little longer time, I saw about ten or twelve ears come out, which were perfect green barley of the same kind as our European, nay, as our English barley.

I carefully saved the ears of this corn, you may be sure, in their season, which was about the end of June; and laying up every grain, I resolved to sow them all again, hoping in time to have some quantity sufficient to supply me with bread. But it was not till the fourth year that I could allow myself the least grain of this corn to eat, and even then but sparingly, as I shall say afterwards in its order. I lost all that I sowed the first season, by not observing the proper time, for I sowed it just before the dry season, so that it never came up at all, at least not as it would have done; of which in its place.

Besides this barley, there were twenty or thirty stalks of rice, which I preserved with the same care, and whose use was of the same kind, or to the same purpose, viz., to make me bread, or rather food; for I found ways to cook it up without baking, though I did that also after some time. But to return to my journal.

I worked hard these three or four months to get my wall done; and on the 14th of April I closed it up, contriving to go into it, not by a door, but over the wall by a ladder, that there might be no sign in the outside of my habitation.

*April 16.*—I finished the ladder, so I went up with the ladder to the top, and then pulled it up after me, and let it down on the inside. This was a complete enclosure to me; for within I had room enough, and nothing could come at me from without, unless it could first mount my wall.

The very next day after this wall was finished, I almost had all my labour overthrown at once, and myself killed. The case was thus: As I was busy in the inside of it, behind my tent, just in the entrance into my cave, I was terribly frightened with a most dreadful surprising thing indeed; for all on a sudden I found the earth come crumbling down from the roof of my cave, and from the edge of the hill over my head, and two of the posts I had set up in the cave cracked in a frightful manner. I was heartily scared, but thought nothing of what was really the cause, only thinking that the top of my cave was falling in, as some of it had done before; and for fear I should be buried in it, I ran forward to my ladder; and not thinking myself safe there neither, I got over my wall for fear of the pieces of the hill which I expected might roll down upon me. I was no sooner stepped down upon the firm ground, but I plainly saw it was a terrible earthquake; for the ground I stood on shook three times at about eight minutes' distance, with three such shocks, as would have overturned the strongest building that could be supposed to have stood on the earth; and a great piece of the top of a rock, which stood about half a mile from me next the sea, fell down with such a terrible noise, as I never heard in all my life. I perceived also the very sea was put into violent motion by it; and I believe the shocks were stronger under the water than on the island.

After the third shock was over, and I felt no more for some time, I began to take courage; and yet I had not heart enough to go over my wall again, for fear of being

buried alive, but sat still upon the ground, greatly cast down and disconsolate, not knowing what to do.

While I sat thus, I found the air overcast, and grow cloudy, as if it would rain. Soon after that the wind rose by little and little, so that in less than half-an-hour it blew a most dreadful hurricane. The sea was all on a sudden covered over with foam and froth; the shore was covered with the breach of the water; the trees were torn up by the roots; and a terrible storm it was. This held about three hours, and then began to abate; and in two hours more it was stark calm, and began to rain very hard.

I was forced to go into my cave, though very much afraid and uneasy, for fear it should fall on my head.

This violent rain forced me to a new work, viz., to cut a hole through my new fortification, like a sink, to let the water go out, which would else have drowned my cave. After I had been in my cave some time, and found no more shocks of the earthquake follow, I began to be more composed. And now to support my spirits, which indeed wanted it very much, I went to my little store, and took a small sup of rum, which, however, I did then, and always, very sparingly, knowing I could have no more when that was gone.

It continued raining all that night and great part of the next day, so that I could not stir abroad; but my mind being more composed, I began to think of what I had best do, concluding that if the island was subject to these earthquakes, there would be no living for me in a cave, but I must consider of building me some little hut in an open place, which I might surround with a wall, as I had done here, and so make myself secure from wild beasts or men; but concluded, if I stayed where I was, that I should certainly, one time or other, be buried alive.

With these thoughts I resolved to remove my tent from the place where it stood, which was just under the hanging

precipice of the hill, and which, if it should be shaken again, would certainly fall upon my tent; and I spent the two next days, being the 19th and 20th of April, in contriving where and how to remove my habitation.

The fear of being swallowed up alive made me that I never slept in quiet; and yet the apprehension of lying abroad without any fence was almost equal to it. But still, when I looked about and saw how everything was put in order, how pleasantly concealed I was, and how safe from danger, it made me very loth to remove.

In the meantime it occurred to me that it would require a vast deal of time for me to do this, and that I must be contented to run the venture where I was, till I had formed a camp for myself, and had secured it so as to remove to it. So with this resolution I composed myself for a time, and resolved that I would go to work with all speed to build me a wall with piles and cables, etc., in a circle as before, and set my tent up in it when it was finished, but that I would venture to stay where I was till it was finished, and fit to remove to. This was the 21st.

*April 22.*—The next morning I began to consider means to put this resolve in execution; but I was at a great loss about my tools. I had three large axes, and abundance of hatchets (for we carried the hatchets for traffic with the Indians), but with much chopping and cutting knotty hard wood, they were all full of notches and dull; and though I had a grindstone, I could not turn it and grind my tools too. This cost me as much thought as a statesman would have bestowed upon a grand point of politics, or a judge upon the life and death of a man. At length I contrived a wheel with a string, to turn it with my foot, that I might have both my hands at liberty. Note, I had never seen any such thing in England, or at least not to take notice how it was done, though since I have observed it is very common there; besides that, my grindstone was

very large and heavy. This machine cost me a full week's work to bring it to perfection.

*April* 28, 29.—These two whole days I took up in grinding my tools, my machine for turning my grindstone performing very well.

*May* 1.—In the morning, looking towards the seaside, the tide being low, I saw something lie on the shore bigger than ordinary, and it looked like a cask. When I came to it, I found a small barrel, and two or three pieces of the wreck of the ship, which were driven on shore by the late hurricane; and looking towards the wreck itself, I thought it seemed to lie higher out of the water than it used to do. I examined the barrel which was driven on shore, and soon found it was a barrel of gunpowder; but it had taken water, and the powder was caked as hard as a stone. However, I rolled it farther on shore for the present, and went on upon the sands as near as I could to the wreck of the ship to look for more.

When I came down to the ship I found it strangely removed. The fore-castle, which lay before buried in sand, was heaved up at least six feet; and the stern, which was broken to pieces, and parted from the rest by the force of the sea soon after I had left rummaging her, was tossed, as it were, up, and cast on one side, and the sand was thrown so high on that side next her stern, that whereas there was a great place of water before, so that I could not come within a quarter of a mile of the wreck without swimming, I could now walk quite up to her when the tide was out. I was surprised with this at first, but soon concluded it must be done by an earthquake. And as by this violence the ship was more broken open than formerly, so many things came daily on shore, which the sea had loosened, and which the winds and water rolled by degrees to the land.

This wholly diverted my thoughts from the design of

removing my habitation; and I busied myself mightily, that day especially, in searching whether I could make any way into the ship. But I found nothing was to be expected of that kind, for all the inside of the ship was choked up with sand. However, as I had learned not to despair of anything, I resolved to pull everything to pieces that I could of the ship, concluding that everything I could get from her would be of some use or other to me.

*May 3-17.*—Went every day to the wreck and got a great deal of pieces of timber, and boards, or plank, and two or three hundredweight of iron.

*May 24.*—Every day to this day I worked on the wreck, and with hard labour I loosened some things so much with the crow, that at the first high tide several casks floated out, and two of the seamen's chests. But the wind blowing from the shore, nothing came to land that day but pieces of timber, and a hogshead, which had some pork in it, but the salt water and the sand had spoiled it.

I continued this work every day to the 15th of June, except the time necessary to get food, which I always appointed, during this part of my employment, to be when the tide was up, that I might be ready when it was ebbed out. And by this time I had gotten timber, and plank, and ironwork enough to have built a good boat, if I had known how; and also, I got at several times, and in several pieces, near one hundredweight of the sheet lead.

*June 16.*—Going down to the seaside, I found a large tortoise, or turtle. This was the first I had seen, which it seems was only my misfortune, not any defect of the place, or scarcity; for had I happened to be on the other side of the island, I might have had hundreds of them every day, as I found afterwards.

*June 17* I spent in cooking the turtle. I found in her

three-score eggs ; and her flesh was to me, at that time, the most savoury and pleasant that ever I tasted in my life, having had no flesh, but of goats and fowls, since I landed in this horrid place.

*June 18*—Rained all day, and I stayed within. I thought at this time the rain felt cold, and I was something chilly, which I knew was not usual in that latitude.

*June 25.*—An ague very violent ; the fit held me seven hours ; cold fit, and hot with faint sweats after it.

*June 26.*—Better ; and having no victuals to eat, took my gun, but found myself very weak. However, I killed a she-goat, and with much difficulty got it home, and broiled some of it which I ate. I would fain have stewed it, and made some broth, but had no pot.

*June 27.*—The ague again so violent that I lay abed all day, and could neither eat nor drink. I was ready to perish for thirst, but I was so weak that I had not strength to stand up, or to get myself any water to drink, till the fit wearing off, I fell asleep, and did not wake till far in the night. When I awoke, I found myself much refreshed, but weak, and exceeding thirsty. However, as I had no water in my whole habitation, I was forced to lie till morning, and went to sleep again.

*June 28.*—Having been somewhat refreshed with the sleep I had had, and the fit being entirely off, I got up ; I considered that the fit of the ague would return again the next day, and now was my time to get something to refresh and support myself when I should be ill. The first thing I did I filled a large square case-bottle with water, and set it upon my table in reach of my bed ; and to take off the chill or aguish disposition of the water, I put about a quarter of a pint of rum into it and mixed them together. Then I got me a piece of the goat's flesh, and broiled it on the coals, but could eat very little. I walked about, but was very weak, and withal very sad and

heavy-hearted in the sense of my miserable condition, dreading the return of my distemper the next day. At night I made my supper of three of the turtle's eggs, which I roasted in the ashes, and ate in the shell; and this was the first bit of meat I had ever asked God's blessing to, even as I could remember, in my whole life.

After I had eaten, I tried to walk, but found myself so weak, that I could hardly carry the gun (for I never went out without that); so I went but a little way, and sat down upon the ground, looking out upon the sea, which was just before me, and very calm and smooth. I fell into a sound sleep, and awoke no more, till, by the sun, it must necessarily be near three o'clock in the afternoon the next day.

When I awoke I found myself exceedingly refreshed, and my spirits lively and cheerful. When I got up, I was stronger than I was the day before, and my stomach better, for I was hungry; and, in short, I had no fit the next day, but continued much altered for the better. This was the 29th.

The 30th was my well day, of course, and I went abroad with my gun, but did not care to travel too far. I killed a sea-fowl or two, something like a brant-geese, and brought them home, but was not very forward to eat them; so I ate some more of the turtle's eggs, which were very good. However, I was not so well the next day, which was the first of July, as I hoped I should have been; for I had a little spice of the cold fit, but it was not much.

From the 4th of July to the 14th, I was chiefly employed in walking about with my gun in my hand, a little and a little at a time, as a man that was gathering up his strength after a fit of sickness; for it is hardly to be imagined how low I was, and to what weakness I was reduced.

It was the 15th of July that I began to take a more particular survey of the island itself. I went up the creek

first, where, as I hinted, I brought my rafts on shore. I found, after I came about two miles up, that the tide did not flow any higher, and that it was no more than a little brook of running water, and very fresh and good; but this being the dry season, there was hardly any water in some parts of it, at least, not enough to run in any stream, so as it could be perceived.

On the bank of this brook I found many pleasant savannas or meadows, plain, smooth, and covered with grass; and on the rising parts of them, next to the higher grounds, where the water, as might be supposed, never overflowed, I found a great deal of tobacco, green, and growing to a great and very strong stalk. There were divers other plants, which I had no notion of, or understanding about, and might perhaps have virtues of their own which I could not find out.

I searched for the cassava root, which the Indians, in all that climate, make their bread of, but I could find none. I saw large plants of aloes, but did not then understand them. I saw several sugar-canes, but wild, and, for want of cultivation, imperfect. I contented myself with these discoveries for this time, and came back, musing with myself what course I might take to know the virtue and goodness of any of the fruits or plants which I should discover; but could bring it to no conclusion; for, in short, I had made so little observation while I was in the Brazils, that I knew little of the plants in the field, at least very little that might serve me to any purpose now in my distress.

The next day, the 16th, I went up the same way again; and after going something farther than I had gone the day before, I found the brook and the savannas began to cease, and the country became more woody than before. In this part I found different fruits, and particularly I found melons upon the ground in great abundance, and grapes upon the trees. The vines had spread indeed over the

trees, and the clusters of grapes were just now in their prime, very ripe and rich. This was a surprising discovery, and I was exceeding glad of them; but I was warned by my experience to eat sparingly of them, remembering that when I was ashore in Barbary the eating of grapes killed several of our Englishmen, who were slaves there, by throwing them into fluxes and fevers. But I found an excellent use for these grapes; and that was, to cure or dry them in the sun, and keep them as dried grapes or raisins are kept, which I thought would be, as indeed they were, as wholesome as agreeable to eat, when no grapes might be had.

I spent all that evening there, and went not back to my habitation; which, by the way, was the first night, as I might say, I had lain from home. In the night, I took my first contrivance, and got up into a tree, where I slept well; and the next morning proceeded upon my discovery, travelling near four miles, as I might judge by the length of the valley, keeping still due north, with a ridge of hills on the south and north side of me.

At the end of this march I came to an opening, where the country seemed to descend to the west; and a little spring of fresh water, which issued out of the side of the hill by me, ran the other way, that is, due east. The country appeared so fresh, so green, so flourishing, everything being in a constant verdure or flourish of spring, that it looked like a planted garden.

I descended a little on the side of that delicious vale, surveying it with a secret kind of pleasure, though mixed with my other afflicting thoughts, to think that this was all my own; that I was king and lord of all this country indefeasibly, and had a right of possession; and, if I could convey it, I might have it in inheritance as completely as any lord of a manor in England. I saw here abundance of cocoa trees, orange, and lemon, and citron trees; but all wild, and very few bearing any fruit, at least not then.

However, the green limes that I gathered were not only pleasant to eat, but very wholesome; and I mixed their juice afterwards with water, which made it very wholesome, and very cool and refreshing.

I found now I had business enough to gather and carry home; and I resolved to lay up a store, as well of grapes as limes and lemons to furnish myself for the wet season, which I knew was approaching.

In order to this, I gathered a great heap of grapes in one place, and a lesser heap in another place, and a great parcel of limes and lemons in another place. Taking a few of each with me, I travelled homeward and resolved to come again, and bring a bag or sack, or what I could make, to carry the rest home.

Accordingly, having spent three days in this journey, I came home (so I must now call my tent and my cave); but before I got thither, the grapes were spoiled; the richness of the fruits, and the weight of the juice, having broken them and bruised them; they were good for little or nothing: as to the limes, they were good, but I could bring but a few.

The next day, being the 19th, I went back, having made me two small bags to bring home my harvest; but I was surprised, when, coming to my heap of grapes, which were so rich and fine when I gathered them, I found them all spread about, trod to pieces, and dragged about, some here, some there, and abundance eaten and devoured. By this I concluded there were some wild creatures thereabouts, which had done this; but what they were, I knew not.

However, as I found that there was no laying them up in heaps, and no carrying them away in a sack, but that one way they would be destroyed, and the other way they would be crushed with their own weight, I took another course; for I gathered a large quantity of the grapes, and hung them up upon the out-branches of the trees, that

they might cure and dry in the sun; and as for the limes and lemons, I carried as many back as I could well stand under.

When I came home from this journey, I contemplated with great pleasure the fruitfulness of that valley, and the pleasantness of the situation; the security from storms on that side the water and the wood; and concluded that I had pitched upon a place to fix my abode, which was by far the worst part of the country. Upon the whole, I began to consider of removing my habitation, and to look out for a place equally safe as where I now was situate, if possible, in that pleasant fruitful part of the island.

I was so enamoured of this place, that I spent much of my time there for the whole remaining part of the month of July; and though, upon second thoughts, I resolved, as above, not to remove, yet I built me a little kind of a bower, and surrounded it at a distance with a strong fence, being a double hedge as high as I could reach, well staked, and filled between with brushwood. And here I lay very secure, sometimes two or three nights together, always going over it with a ladder, as before; so that I fancied now I had my country house and my sea-coast house, and this work took me up to the beginning of August.

I had but newly finished my fence, and began to enjoy my labour, when the rains came on, and made me stick close to my first habitation; for though I had made me a tent like the other, with a piece of a sail, and spread it very well, yet I had not the shelter of a hill to keep me from storms, nor a cave behind me to retreat into when the rains were extraordinary.

About the beginning of August I had finished my bower, and began to enjoy myself. The 3rd of August, I found the grapes I had hung up were perfectly dried, and indeed were excellent good raisins of the sun; so I began to take them down from the trees. And it was very happy that I did so, for the rains which followed

would have spoiled them, and I should have lost the best part of my winter food ; for I had above two hundred large bunches of them. No sooner had I taken them all down, and carried most of them home to my cave, but it began to rain ; and from thence, which was the 14th of August, it rained, more or less, every day till the middle of October, and sometimes so violently, that I could not stir out of my cave for several days.

In this season, I was much surprised with the increase of my family. I had been concerned for the loss of one of my cats, which ran away from me, or, as I thought, had been dead, and I heard no more tale or tidings of her, till, to my astonishment, she came home about the end of August with three kittens. But from these three cats I afterwards came to be so pestered with cats, that I was forced to kill them like vermin, or wild beasts, and to drive them from my house as much as possible.

From the 14th of August to the 26th, incessant rain, so that I could not stir, and was now very careful not to be much wet. In this confinement, I began to be straitened for food ; but venturing out twice, I one day killed a goat, and the last day, which was the 26th, found a very large tortoise, which was a treat to me, and my food was regulated thus : I ate a bunch of raisins for my breakfast, a piece of the goat's flesh, or of the turtle, for my dinner, broiled, for, to my great misfortune, I had no vessel to boil or stew anything ; and two or three of the turtle's eggs for my supper.

During this confinement in my cover by the rain, I worked daily two or three hours at enlarging my cave, and by degrees worked it on towards one side, till I came to the outside of the hill, and made a door, or way out, which came beyond my fence or wall ; and so I came in and out this way. But I was not perfectly easy at lying so open ; for as I had managed myself before, I was in a perfect

enclosure; whereas now, I thought I lay exposed, and open for anything to come in upon me; and yet I could not perceive that there was any living thing to fear, the biggest creature that I had yet seen upon the island being a goat.

*Sept. 30.*—I was now come to the unhappy anniversary of my landing. I cast up the notches on my post, and found I had been on shore three hundred and sixty-five days. I kept this day as a solemn fast, setting it apart to religious exercise.

The rainy season and the dry season began now to appear regular to me, and I learned to divide them so as to provide for them accordingly; but I bought all my experience before I had it, and this I am going to relate was one of the most discouraging experiments that I made at all. I have mentioned that I had saved the few ears of barley and rice, which I had so surprisingly found spring up, as I thought, of themselves, and believe there were about thirty stalks of rice and about twenty of barley; and now I thought it a proper time to sow it after the rains, the sun being in its southern position, going from me.

Accordingly I dug up a piece of ground as well as I could with my wooden spade, and dividing it into two parts, I sowed my grain; but as I was sowing, it casually occurred to my thoughts that I would not sow it all at first, because I did not know when was the proper time for it, so I sowed about two-thirds of the seed, leaving about a handful of each.

It was a great comfort to me afterwards that I did so, for not one grain of that I sowed this time came to anything, for the dry months following, the earth having had no rain after the seed was sown, it had no moisture to assist its growth, and never came up at all till the wet season had come again, and then it grew as if it had been but newly sown.

Finding my first seed did not grow, which I easily

imagined was by the drought, I sought for a moister piece of ground to make another trial in, and I dug up a piece of ground near my new bower, and sowed the rest of my seed in February, a little before the vernal equinox. And this having the rainy months of March and April to water it, sprung up very pleasantly, and yielded a very good crop; but having part of the seed left only, and not daring to sow all that I had, I had but a small quantity at last, my whole crop not amounting to above half a peck of each kind. But by this experiment I was made master of my business, and knew exactly when the proper season was to sow, and that I might expect two seed-times and two harvests every year.

While this corn was growing, I made a little discovery which was of use to me afterwards. As soon as the rains were over, and the weather began to settle, which was about the month of November, I made a visit up the country to my bower, where, though I had not been for some months, yet I found all things just as I left them. The circle or double hedge that I had made was not only firm and entire, but the stakes which I had cut out of some trees that grew thereabouts were all shot out, and grown with long branches, as much as a willow-tree usually shoots the first year after lopping its head. I could not tell what tree to call it that these stakes were cut from. I was surprised, and yet very well pleased to see the young trees grow, and I pruned them, and led them up to grow as much alike as I could. And it is scarce credible how beautiful a figure they grew into in three years; so that though the hedge made a circle of about twenty-five yards in diameter, yet the trees, for such I might now call them, soon covered it, and it was a complete shade, sufficient to lodge under all the dry season.

This made me resolve to cut some more stakes, and make me a hedge like this, in a semicircle round my wall

(I mean that of my first dwelling), which I did; and placing the trees or stakes in a double row, at about eight yards' distance from my first fence, they grew presently, and were at first a fine cover to my habitation, and afterward served for a defence also, as I shall observe in its order.

I found now that the seasons of the year might generally be divided, not into summer and winter, as in Europe, but into the rainy seasons and the dry seasons. After I had found by experience the ill consequence of being abroad in the rain, I took care to furnish myself with provisions beforehand, that I might not be obliged to go out; and I sat within doors as much as possible during the wet months.

In this time I found much employment, and very suitable also to the time, for I found great occasion of many things which I had no way to furnish myself with but by hard labour and constant application; particularly, I tried many ways to make myself a basket; but all the twigs I could get for the purpose proved so brittle, that they would do nothing. It proved of excellent advantage to me now, that when I was a boy I used to take a great delight in standing at a basket-maker's in the town where my father lived, to see them make their wicker-ware; and being, as boys usually are, very officious to help, and a great observer of the manner how they worked those things, and sometimes lending a hand, I had by this means full knowledge of the methods of it, that I wanted nothing but the materials; when it came into my mind that the twigs of that tree from whence I cut my stakes might possibly be as tough as the salallows, and willows, and osiers in England, and I resolved to try.

Accordingly, the next day, I went to my country house, as I called it; and cutting some of the smaller twigs, I found them to my purpose as much as I could desire; whereupon I came the next time prepared with a hatchet

to cut down a quantity, which I soon found, for there was great plenty of them. These I set up to dry within my circle or hedge, and when they were fit for use, I carried them to my cave; and here during the next season I employed myself in making, as well as I could, a great many baskets, both to carry earth, or to carry or lay up anything as I had occasion. Though I did not finish them very handsomely, yet I made them sufficiently serviceable for my purpose. And thus, afterwards, I took care never to be without them; and as my wicker-ware decayed, I made more, especially I made strong deep baskets to place my corn in, instead of sacks, when I should come to have any quantity of it.

Having mastered this difficulty, and employed a world of time about it, I bestirred myself to see, if possible, how to supply two wants. I had no vessels to hold anything that was liquid, except two runlets, which were almost full of rum, and some glass bottles, some of the common size, and others which were case-bottles square, for the holding of waters, spirits, etc. I had not so much as a pot to boil anything, except a great kettle, which I saved out of the ship, and which was too big for such use as I desired it, viz., to make broth, and stew a bit of meat by itself. The second thing I would fain have had was a tobacco-pipe; but it was impossible to me to make one. However, I found a contrivance for that, too, at last.

I employed myself in planting my second rows of stakes or piles and in this wicker-working all the summer or dry season, when another business took me up more time than it could be imagined I could spare.

I now resolved to travel quite across to the seashore on the other side of the island; so taking my gun, a hatchet, and my dog, and a larger quantity of powder and shot than usual, with two biscuit-cakes and a great bunch of raisins in my pouch for my store, I began my

journey. When I had passed the vale where my bower stood, as above, I came within view of the sea to the west; and it being a very clear day, I fairly descried land, whether an island or a continent I could not tell; but it lay very high, extending from the west to the W.S.W. at a very great distance; by my guess, it could not be less than fifteen or twenty leagues off.

I saw abundance of parrots, and fain I would have caught one, if possible, to have kept it to be tame, and taught it to speak to me. I did, after some painstaking, catch a young parrot, for I knocked it down with a stick, and having recovered it, I brought it home; but it was some years before I could make him speak. However, at last I taught him to call me by my name very familiarly. But the accident that followed, though it be a trifle, will be very diverting in its place.

I was exceedingly diverted with this journey. I found in the low grounds hares, as I thought them to be, and foxes; but they differed greatly from all the other kinds I had met with, nor could I satisfy myself to eat them, though I killed several. But I had no need to be venturous, for I had no want of food, and of that which was very good too; especially these three sorts, viz., goats, pigeons, and turtle or tortoise; which, added to my grapes, Leadenhall Market could not have furnished a table better than I, in proportion to the company. And though my case was deplorable enough, yet I had great cause for thankfulness, and that I was not driven to any extremities for food, but had plenty, even to dainties.

As soon as I came to the seashore, I was surprised to see that I had taken up my lot on the worst side of the island, for here indeed the shore was covered with innumerable turtles; whereas, on the other side, I had found but three in a year and a half. Here was also an infinite number of fowls of many kinds, some which I had seen,

and some which I had not seen before, and many of them very good meat, but such as I knew not the names of, except those called penguins.

I could have shot as many as I pleased, but was very sparing of my powder and shot, and therefore had more mind to kill a she-goat, if I could, which I could better feed on; and though there were many goats here, more than on my side of the island, yet it was with much more difficulty that I could come near them, the country being flat and even, and they saw me much sooner than when I was on the hill.

I confess this side of the country was much pleasanter than mine; but yet I had not the least inclination to remove, for as I was fixed in my habitation, it became natural to me, and I seemed all the while I was here to be as it were upon a journey, and from home. However, I travelled along the shore of the sea towards the east, I suppose about twelve miles, and then setting up a great pole upon the shore for a mark, I concluded I would go home again, and that the next journey I took should be on the other side of the island, east from my dwelling, and so round till I came to my post again; of which in its place.

I took another way to come back than that I went, thinking I could easily keep all the island so much in my view, that I could not miss finding my first dwelling by viewing the country. But I found myself mistaken. I wandered about very uncomfortably, and at last was obliged to find out the seaside, look for my post, and come back the same way I went; and then by easy journeys I turned homeward, the weather being exceeding hot, and my gun, ammunition, hatchet, and other things very heavy.

In this journey my dog surprised a young kid, and seized upon it, and I running in to take hold of it, caught it, and saved it alive from the dog. I had a great mind to bring it home if I could, for I had often been musing

whether it might not be possible to get a kid or two, and so raise a breed of tame goats, which might supply me when my powder and shot should be all spent.

I made a collar to this little creature, and with a string, which I made of some rope-yarn, which I always carried about me, I led him along, though with some difficulty, till I came to my bower, and there I enclosed him and left him, for I was very impatient to be at home, from whence I had been absent above a month.

I cannot express what a satisfaction it was to me to come into my old hutch, and lie down in my hammock-bed. This little wandering journey, without settled place of abode, had been so unpleasant to me, that my own house, as I called it to myself, was a perfect settlement to me compared to that; and it rendered everything about me so comfortable, that I resolved I would never go a great way from it again, while it should be my lot to stay on the island.

I reposed myself here a week to rest and regale myself after my long journey; during which most of the time was taken up in the weighty affair of making a cage for my Poll, who began now to be a mere domestic, and to be mighty well acquainted with me. Then I began to think of the poor kid which I had penned in within my little circle, and resolved to go and fetch it home, or give it some food. Accordingly I went, and found it where I left it, for indeed it could not get out, but was almost starved for want of food. I went and cut boughs of trees, and branches of such shrubs as I could find, and threw them over, and having fed it, I tied it as I did before, to lead it away; but it was so tame with being hungry, that I had no need to have tied it, for it followed me like a dog. And as I continually fed it, the creature became so loving, so gentle, and so fond, that it became from that time one of my domestics also, and would never leave me afterwards.

The rainy season of the autumnal equinox was now come, and I kept the 30th of September in the same solemn manner as before, being the anniversary of my landing on the island, having now been there two years, and no more prospect of being delivered than the first day I came there. I spent the whole day in humble and thankful acknowledgments of the many wonderful mercies which my solitary condition was attended with, and without which it might have been infinitely more miserable.

Thus, and in this disposition of mind, I began my third year; and though I have not given the reader the trouble of so particular account of my works this year as the first, yet in general it may be observed, that I was very seldom idle, but having regularly divided my time, according to the several daily employments that were before me, such as, first, my duty to God, and the reading the Scriptures, which I constantly set apart some time for, thrice every day; secondly, the going abroad with my gun for food, which generally took me up three hours in every morning, when it did not rain; thirdly, the ordering, curing, preserving, and cooking what I had killed or caught for my supply; these took up great part of the day; also, it is to be considered that the middle of the day, when the sun was in the zenith, the violence of the heat was too great to stir out; so that about four hours in the evening was all the time I could be supposed to work in, with this exception, that sometimes I changed my hours of hunting and working, and went to work in the morning, and abroad with my gun in the afternoon.

To this short time allowed for labour, I desire may be added the exceeding laboriousness of my work; the many hours which, for want of tools, want of help, and want of skill, everything I did took up out of my time. For example, I was full two and forty days making me a board for a long shelf, which I wanted in my cave; whereas two

sawyers, with their tools and a sawpit, would have cut six of them out of the same tree in half a day.

My case was this: it was to be a large tree which was to be cut down, because my board was to be a broad one. This tree I was three days a-cutting down, and two more cutting off the boughs, and reducing it to a log, or piece of timber. With inexpressible hacking and hewing, I reduced both the sides of it into chips till it began to be light enough to move; then I turned it, and made one side of it smooth and flat as a board from end to end; then turning that side downward, cut the other side, till I brought the plank to be about three inches thick, and smooth on both sides. Any one may judge the labour of my hands in such a piece of work; but labour and patience carried me through that, and many other things. I only observe this in particular to show the reason why so much of my time went away with so little work, viz., that what might be a little to be done with help and tools, was a vast labour, and required a prodigious time to do alone, and by hand. But notwithstanding this, with patience and labour, I went through many things, and, indeed, everything that my circumstances made necessary for me to do, as will appear by what follows.

I was now, in the months of November and December, expecting my crop of barley and rice. The ground I had manured or dug up for them was not great; for as I observed, my seed of each was not above the quantity of half a peck; for I had lost one whole crop by sowing in the dry season. But now my crop promised very well, when on a sudden I found I was in danger of losing it all again by enemies of several sorts, which it was scarce possible to keep from it; as, first the goats and wild creatures which I called hares, who, tasting the sweetness of the blade, lay in it night and day, as soon as it came up, and ate it so close, that it could get no time to shoot up into stalk.

This I saw no remedy for but by making an enclosure about it with a hedge, which I did with a great deal of toil, and the more, because it required speed. However, as my arable land was but small, I got it well fenced in about three weeks' time, and shooting some of the creatures in the daytime, I set my dog to guard it in the night, tying him up to a stake at the gate, where he would stand and bark all night long; so in a little time the enemies forsook the place, and the corn grew very strong and well, and began to ripen apace.

I saw my little crop surrounded with fowls, of I know not how many sorts, who stood, as it were, watching till I should be gone. I immediately let fly among them, for I always had my gun with me. I had no sooner shot, but there rose up a little cloud of fowls, which I had not seen at all, from among the corn itself.

This touched me sensibly, for I foresaw that in a few days they would devour all my hopes, that I should be starved, and never be able to raise a crop at all, and what to do I could not tell. However, I resolved not to lose my corn, if possible, though I should watch it night and day. In the first place, I went among it to see what damage was already done, and found they had spoiled a good deal of it; but that as it was yet too green for them, the loss was not so great but that the remainder was like to be a good crop if it could be saved.

I stayed by it to load my gun, and then coming away, I could easily see the thieves sitting upon all the trees about me, as if they only waited till I was gone away. And the event proved it to be so; for as I walked off, as if I was gone, I was no sooner out of their sight but they

dropped down, one by one, into the corn again. I was so provoked, that I could not have patience to stay till more came on, knowing that every grain that they ate now was, as it might be said, a peck-loaf to me in the consequence: but coming up to the hedge, I fired again, and killed three of them. This was what I wished for; so I took them up, and served them as we serve notorious thieves in England, viz, hanged them in chains, for a terror to others. It is impossible to imagine almost that this should have such an effect as it had, for the fowls would not only not come at the corn, but, in short, they forsook all that part of the island, and I could never see a bird near the place as long as my scarecrows hung there.

This I was very glad of, you may be sure; and about the latter end of December, which was our second harvest of the year, I reaped my crop.

I was sadly put to it for a scythe or a sickle to cut it down, and all I could do was to make one as well as I could out of one of the broadswords, or cutlasses, which I saved among the arms out of the ship. However, as my first crop was but small, I had no great difficulty to cut it down; in short, I reaped it my way, for I cut nothing off but the ears, and carried them away in a great basket which I had made, and so rubbed the grain out with my hands; and at the end of all my harvesting, I found that out of my half peck of seed I had near two bushels of rice, and above two bushels and a half of barley, that is to say, by my guess, for I had no measure at that time.

However, this was a great encouragement to me, and I foresaw that, in time, it would please God to supply me with bread. And yet here I was perplexed again, for I neither knew how to grind or make meal of my corn, or indeed how to clean it and part it; nor, if made into meal, how to make bread of it, and if how to make it, yet I knew not how to bake it. These things being added to

my desire of having a good quantity for store, and to secure a constant supply, I resolved not to taste any of this crop, but to preserve it all for seed against the next season, and, in the meantime, to employ all my study and hours of working to accomplish this great work of providing myself with corn and bread.

Within doors, that is, when it rained, and I could not go out, I found employment on the following occasions; always observing, that all the while I was at work, I diverted myself with talking to my parrot, and teaching him to speak, and I quickly taught him to know his own name, and at last to speak it out pretty loud, "Poll," which was the first word I ever heard spoken in the island by any mouth but my own. This, therefore, was not my work, but an assistant to my work; for now, as I said, I had a great employment upon my hands, as follows, viz., I had long studied, by some means or other, to make myself some earthen vessels, which indeed I wanted sorely, but knew not where to come at them. However, considering the heat of the climate, I did not doubt but if I could find out any such clay, I might botch up some such pot as might, being dried in the sun, be hard enough and strong enough to bear handling, and to hold anything that was dry, and required to be kept so; and as this was necessary in the preparing corn, meal, etc., which was the thing I was set upon, I resolved to make some as large as I could, and fit only to stand like jars, to hold what should be put into them.

It would make the reader pity me, or rather laugh at me, to tell how many awkward ways I took to raise this paste; what odd, misshapen, ugly things I made; how many of them fell in, and how many fell out, the clay not being stiff enough to bear its own weight; how many cracked by the over-violent heat of the sun, being set out too hastily; and how many fell in pieces with only

removing, as well before as after they were dried; and, in a word, how, after having laboured hard to find the clay, to dig it, to temper it, to bring it home, and work it, I could not make above two large earthen ugly things (I cannot call them jars) in about two months' labour.

However, as the sun baked these two very dry and hard, I lifted them very gently up, and set them down again in two great wicker baskets, which I had made on purpose for them that they might not break; and as between the pot and the basket there was a little room to spare, I stuffed the space full of the rice and barley straw, and these two pots being to stand always dry, I thought would hold my dry corn, and perhaps the meal, when the corn was bruised.

Though I miscarried so much in my design for large pots, yet I made several smaller things with better success; such as little round pots, flat dishes, pitchers, and pipkins, and any thing my hand turned to; and the heat of the sun baked them strangely hard. But all this would not answer my end, which was to get an earthen pot to hold what was liquid, and bear the fire, which none of these could do. It happened after some time, making a pretty large fire for cooking my meat, when I went to put it out after I had done with it, I found a broken piece of one of my earthenware vessels in the fire, burnt as hard as a stone, and red as a tile. I was agreeably surprised to see it, and said to myself, that certainly they might be made to burn whole, if they would burn broken.

This set me to studying how to order my fire, so as to make it burn me some pots. I had no notion of a kiln, such as the potters burn in, or of glazing them with lead, though I had some lead to do it with; but I placed three large pipkins, and two or three pots in a pile, one upon another, and placed my firewood all round it, with a great heap of embers under them. I plied the fire with fresh

fuel round the outside, and upon the top, till I saw the pots in the inside red-hot quite through, and observed that they did not crack at all. When I saw them clear red, I let them stand in that heat about five or six hours, till I found one of them, though it did not crack, did melt or run, for the sand which was mixed with the clay melted by the violence of the heat, and would have run into glass, if I had gone on; so I slacked my fire gradually till the pots began to abate of the red colour; and watching them all night, that I might not let the fire abate too fast, in the morning I had three very good, I will not say handsome, pipkins, and two other earthen pots, as hard burnt as could be desired, and one of them perfectly glazed with the running of the sand.

After this experiment, I need not say that I wanted no sort of earthenware for my use; but I must needs say, as to the shapes of them, they were very indifferent, as any one may suppose, when I had no way of making them but as the children make dirt pies, or as a woman would make pies that never learned to raise paste.

No joy at a thing of so mean a nature was ever equal to mine, when I found I had made an earthen pot that would bear the fire; and I had hardly patience to stay till they were cold, before I set one upon the fire again, with some water in it, to boil me some meat, which it did admirably well; and with a piece of a kid I made some very good broth, though I wanted oatmeal and several other ingredients requisite to make it so good as I would have had it been.

My next concern was to get me a stone mortar to stamp or beat some corn in; for as to the mill, there was no thought at arriving to that perfection of art with one pair of hands. I spent many a day to find out a great stone big enough to cut hollow, and make fit for a mortar, and could find none at all, except what was in the solid

rock, and which I had no way to dig or cut out; nor indeed were the rocks in the island of hardness sufficient, but were all of a sandy crumbling stone, which neither would bear the weight of a heavy pestle, nor would break the corn without filling it with sand. So, after a great deal of time lost in searching for a stone, I gave it over, and resolved to look out for a great block of hard wood, which I found indeed much easier; and getting one as big as I had strength to stir, I rounded it, and formed it in the outside with my axe and hatchet, and then, with the help of fire, and infinite labour, made a hollow place in it, as the Indians in Brazil make their canoes. After this, I made a great heavy pestle, or beater, of the wood called the iron-wood; and this I prepared and laid by against I had my next crop of corn, when I proposed to myself to grind, or rather pound, my corn into meal, to make my bread.

My next difficulty was to make a sieve to dress my meal, and to part it from the bran and the husk, without which I did not see it possible I could have any bread. This was a most difficult thing, so much as but to think on, for to be sure I had nothing like the necessary thing to make it; I mean fine thin canvas or stuff, to search the meal through. And here I was at a full stop for many months, nor did I really know what to do; linen I had none left, but what was mere rags; I had goats'-hair, but neither knew I how to weave it or spin it; and had I known how, there were no tools to work it with. All the remedy that I found for this was, that at last I did remember I had, among the seamen's clothes which were saved out of the ship, some neckcloths of calico or muslin; and with some pieces of these I made three small sieves, but proper enough for the work; and thus I made shift for some years. How I did afterwards, I shall show in its place.

The baking part was the next thing to be considered, and how I should make bread when I came to have corn; for, first, I had no yeast. As to that part, as there was no supplying the want, so I did not concern myself much about it; but for an oven I was indeed in great pain. At length I found out an experiment for that also, which was this: I made some earthen vessels very broad, but not deep, that is to say, about two feet diameter, and not above nine inches deep; these I burned in the fire, as I had done the other, and laid them by; and when I wanted to bake, I made a great fire upon my hearth, which I had paved with some square tiles, of my own making and burning also; but I should not call them square.

When the firewood was burned pretty much into embers, or live coals, I drew them forward upon this hearth, so as to cover it all over, and there I let them lie till the hearth was very hot; then sweeping away all the embers, I set down my loaf, or loaves, and wheeling down the earthen pot upon them, drew the embers all round the outside of the pot, to keep in and add to the heat. And thus, as well as in the best oven in the world, I baked my barley-loaves, and became, in little time, a mere pastry-cook into the bargain; for I made myself several cakes of the rice, and puddings; indeed I made no pies, neither had I anything to put into them, supposing I had, except the flesh either of fowls or goats.

It need not be wondered at, if all these things took me up most part of the third year of my abode here; for it is to be observed, that in the intervals of these things I had my new harvest and husbandry to manage; for I reaped my corn in its season, and carried it home as well as I could, and laid it up in the ear, in my large baskets, till I had time to rub it out, for I had no floor to thrash it on, or instrument to thrash it with.

And now, indeed, my stock of corn increasing, I really

wanted to build my barns bigger. I wanted a place to lay it up in, for the increase of the corn now yielded me so much, that I had of the barley about twenty bushels, and of the rice as much, or more, insomuch that now I resolved to begin to use it freely; for my bread had been quite gone a great while; also, I resolved to see what quantity would be sufficient for me a whole year, and to sow but once a year.

Upon the whole, I found that the forty bushels of barley and rice was much more than I could consume in a year; so I resolved to sow just the same quantity every year that I sowed the last, in hopes that such a quantity would fully provide me with bread, etc.

All the while these things were doing, you may be sure my thoughts ran many times upon the prospect of land which I had seen from the other side of the island, and I was not without secret wishes that I were on shore there, fancying the seeing the mainland, and in an inhabited country, I might find some way or other to convey myself farther, and perhaps at last find some means of escape.

But all this while I made no allowance for the dangers of such a condition, and how I might fall into the hands of savages, and perhaps such as I might have reason to think far worse than the lions and tigers of Africa; that if I once came into their power, I should run a hazard more than a thousand to one of being killed, and perhaps of being eaten; for I had heard that the people of the Caribbean coasts were cannibals, or man-eaters, and I knew by the latitude that I could not be far off from that shore. That suppose they were not cannibals, yet that they might kill me, as many Europeans who had fallen into their hands had been served, even when they had been ten or twenty together, much more I, that was but one, and could make little or no defence; all these things, I say, which I ought to have considered well of,

and did cast up in my thoughts afterwards, yet took up none of my apprehensions at first, but my head ran mightily upon the thought of getting over to the shore.

Now<sup>3</sup> I wished for my boy Xury, and the long-boat with the shoulder-of-mutton sail, with which I sailed above a thousand miles on the coast of Africa; but this was in vain. Then I thought I would go and look at our ship's boat, which, as I have said, was blown up upon the shore a great way, in the storm, when we were first cast away. She lay almost where she did at first, but not quite; and was turned, by the force of the waves and the winds, almost bottom upward, against a high ridge of beachy rough sand, but no water about her, as before.

If I had had hands to have refitted her, and to have launched her into the water, the boat would have done well enough, and I might have gone back into the Brazils with her easily enough; but I might have foreseen that I could no more turn her and set her upright upon her bottom, than I could remove the island. However, I went to the woods, and cut levers and rollers, and brought them to the boat, resolved to try what I could do; suggesting to myself that if I could but turn her down, I might easily repair the damage she had received, and she would be a very good boat, and I might go to sea in her very easily.

I spared no pains, indeed, in this piece of fruitless toil, and spent, I think, three or four weeks about it. At last, finding it impossible to heave it up with my little strength, I fell to digging away the sand, to undermine it, and so to make it fall down, setting pieces of wood to thrust and guide it right in the fall. But when I had done this, I was unable to stir it up again, or to get under it, much less to move it forward towards the water; so I was forced to give it over. And yet, though I gave over the hopes of the boat, my desire to venture over to the main

increased, rather than decreased, as the means for it seemed impossible.

This at length put me upon thinking whether it was not possible to make myself a canoe, or *periagua*, such as the natives of those climates make, even without tools, or, as I might say, without hands, viz., of the trunk of a great tree. This I not only thought possible, but easy, and pleased myself extremely with the thoughts of making it, and with my having much more convenience for it than any of the negroes or Indians; but not at all considering the particular inconveniences which I lay under more than the Indians did, viz., want of hands to move it, when it was made, into the water, a difficulty much harder for me to surmount than all the consequences of want of tools could be to them. For what was it to me, that when I had chosen a vast tree in the woods, I might with much trouble cut it down, if, after I might be able with my tools to hew and dub the outside into the proper shape of a boat, and burn or cut out the inside to make it hollow, so to make a boat of it; if, after all this, I must leave it just where I found it, and was not able to launch it into the water?

One would have thought I could not have had the least reflection upon my mind of my circumstance while I was making this boat, but I should have immediately thought how I should get it into the sea; but my thoughts were so intent upon my voyage over the sea in it, that I never once considered how I should get it off the land; and it was really, in its own nature, more easy for me to guide it over forty-five miles of sea, then about forty-five fathoms of land, where it lay, to set it afloat in the water.

I went to work upon this boat the most like a fool that ever man did who had any of his senses awake. I pleased myself with the design, without determining whether I was ever able to undertake it. Not but that

the difficulty of launching my boat came often into my head; but I put a stop to my own inquiries by this foolish answer which I gave myself, "Let's first make it; I'll warrant I'll find some way or other to get it along when 'tis done."

This was a most preposterous method; but the eagerness of my fancy prevailed, and to work I went. I felled a cedar tree: I question much whether Solomon ever had such a one for the building of the Temple at Jerusalem. It was five feet ten inches diameter at the lower part next the stump, and four feet eleven inches diameter at the end of twenty-two feet, after which it lessened for a while, and then parted into branches. It was not without infinite labour that I felled this tree. I was twenty days hacking and hewing at it at the bottom; I was fourteen more getting the branches and limbs, and the vast spreading head of it cut off, which I hacked and hewed through with axe and hatchet, and inexpressible labour. After this, it cost me a month to shape it and dub it to a proportion, and to something like the bottom of a boat, that it might swim upright as it ought to do. It cost me near three months more to clear the inside, and work it so as to make an exact boat of it. This I did, indeed, without fire, by mere mallet and chisel, and by the dint of hard labour, till I had brought it to be a very handsome *periagua*, and big enough to have carried six and twenty men, and consequently big enough to have carried me and all my cargo.

When I had gone through this work, I was extremely delighted with it. The boat was really much bigger than I ever saw a canoe or *periagua*, that was made of one tree, in my life. Many a weary stroke it had cost, you may be sure; and there remained nothing but to get it into the water; and had I got it into the water, I make no question but I should have begun the maddest voyage,

and the most unlikely to be performed, that ever was undertaken.

But all my devices to get it into the water failed me, though they cost me infinite labour too. It lay about one hundred yards from the water, and not more; but, the first inconvenience was, it was uphill towards the creek. Well, to take away this discouragement, I resolved to dig into the surface of the earth, and so make a declivity. This I began, and it cost me a prodigious deal of pains; but who grudges pains, that have their deliverance in view? But when this was worked through, and this difficulty managed, it was still much at one, for I could no more stir the canoe than I could the other boat.

Then I measured the distance of ground, and resolved to cut a dock or canal, to bring the water up to the canoe, seeing I could not bring the canoe down to the water. Well, I began this work; and when I began to enter into it, and calculate how deep it was to be dug, how broad, how the stuff to be thrown out, I found that by the number of hands I had, being none but my own, it must have been ten or twelve years before I should have gone through with it; for the shore lay high, so that at the upper end it must have been at least twenty feet deep; so at length, though with great reluctancy, I gave this attempt over also.

This grieved me heartily; and now I saw, though too late, the folly of beginning a work before we count the cost, and before we judge rightly of our own strength to go through with it.

In the middle of this work I finished my fourth year in this place, and kept my anniversary with the same devotion, and with as much comfort as ever before.

I had now been here so long, that many things which I brought on shore for my help were either quite gone, or very much wasted, and near spent. My ink, had been

gone for some time, all but a very little, which I eked out with water, a little and a little, till it was so pale it scarce left any appearance of black upon the paper. As long as it lasted, I made use of it to note down the days of the month on which any remarkable thing happened to me.

The next thing to my ink being wasted, was that of my bread ; I mean the biscuit, which I brought out of the ship. This I had husbanded to the last degree, allowing myself but one cake of bread a day for above a year ; and yet I was quite without bread for near a year before I got any corn of my own ; and great reason I had to be thankful that I had any at all, the getting it being, as has been already observed, next to miraculous.

My clothes began to decay, too, mightily. As to linen, I had none a good while, except some chequered shirts which I found in the chests of the other seamen, and which I carefully preserved, because many times I could bear no other clothes on but a shirt ; and it was a very great help to me that I had, among all the men's clothes of the ship, almost three dozen of shirts.

I had worn out all the waistcoats I had, and my business was now to try if I could not make jackets out of the great watch-coats which I had by me, and with such other materials as I had ; so I set to work a-tailoring, or rather, indeed, a-botching, for I made most piteous work of it. However, I made shift to make two or three new waistcoats, which I hoped would serve me a great while. As for breeches, or drawers, I made but a sorry shift indeed till afterward.

I have mentioned that I saved the skins of all the creatures that I killed, I mean four-footed ones, and I had hung them up stretched out with sticks in the sun, by which means some of them were so dry and hard that they were fit for little, but others it seems were very useful. The first thing I made of these was a great cap for my head,

with the hair on the outside, to shoot off the rain ; and this I performed so well, that after this I made me a suit of clothes wholly of these skins, that is to say, a waistcoat, and breeches open at knees, and both loose, for they were rather wanting to keep me cool than to keep me warm. I must not omit to acknowledge that they were wretchedly made ; for if I was a bad carpenter, I was a worse tailor. However, they were such as I made very good shift with ; and when I was abroad, if it happened to rain, the hair of my waistcoat and cap being outermost, I was kept very dry.

After this I spent a great deal of time and pains to make me an umbrella. I was indeed in great want of one, and had a great mind to make one. I had seen them made in the Brazils, where they are very useful in the great heats, which are there ; and I felt the heats every jot as great here, and greater too, being nearer the equator. Besides, as I was obliged to be much abroad, it was a most useful thing to me, as well for the rains as the heats. I took a world of pains at it, and was a great while before I could make anything likely to hold : nay, after I thought I had hit the way, I spoiled two or three before I made one to my mind ; but at last I made one that answered indifferently well. The main difficulty I found was to make it to let down. I could make it to spread ; but if it did not let down too, and draw in, it was not portable for me any way but just over my head, which would not do. However, at last, as I said, I made one to answer, and covered it with skins, the hair upwards, so that it cast off the rains like a pent-house, and kept off the sun so effectually, that I could walk out in the hottest of the weather with greater advantage than I could before in the coolest ; and when I had no need of it, could close it, and carry it under my arm.

I cannot say that after this, for five years, any extraordinary thing happened to me ; but I lived on in the

same course, in the same posture and place, just as before. The chief things I was employed in, besides my yearly labour of planting my barley and rice, and curing my raisins, of both which I always kept up just enough to have sufficient stock of one year's provisions beforehand—I say, besides this yearly labour, and my daily labour of going out with my gun, I had one labour, to make me a canoe, which at last I finished; so that by digging a canal to it of six feet wide, and four feet deep, I brought it into the creek, almost half a mile. As for the first, which was so vastly big, as I made it without considering beforehand, as I ought to have done, how I should be able to launch it; so, never being able to bring it to the water, or bring the water to it, I was obliged to let it lie where it was, as a memorandum to teach me to be wiser next time. Indeed, the next time, though I could not get a tree proper for it, and in a place where I could not get the water to it at any less distance than, as I have said, near half a mile, yet as I saw it was practicable at last, I never gave it over; and though I was near two years about it, yet I never grudged my labour, in hopes of having a boat to go off to sea at last.

However, though my little *periagua* was finished, yet the size of it was not at all answerable to the design which I had in view when I made the first; I mean, of venturing over to the *terra firma*, where it was about forty miles broad. Accordingly, the smallness of my boat assisted to put an end to that design, and now I thought no more of it. But as I had a boat, my next design was to make a tour round the island; for as I had been on the other side in one place, crossing, as I have already described it, over the land, so the discoveries I made in that little journey made me very eager to see other parts of the coast; and now I had a boat, I thought of nothing but sailing round the island.

"I THOUGHT OF NOTHING BUT SAILING ROUND THE ISLAND."

For 'this purpose, that I might do everything with discretion and consideration, I fitted up a little mast to my boat, and made a sail to it out of some of the pieces of the ship's sail, which lay in store, and of which I had a great stock by me.

Having fitted my mast and sail, and tried the boat, I found she would sail very well. Then I made little lockers, or boxes, at either end of my boat, to put provisions, necessaries, and ammunition, etc., into, to be kept dry, either from rain or the spray of the sea; and a little long hollow place I cut in the inside of the boat, where I could lay my gun, making a flap to hang down over it to keep it dry.

I fixed my umbrella also in a step at the stern, like a mast, to stand over my head, and keep the heat of the sun off me, like an awning; and thus I every now and then took a little voyage upon the sea, but never went far out, not far from the little creek. But at last, being eager to view the circumference of my little kingdom, I resolved upon my tour; and accordingly I victualled my ship for the voyage, putting in two dozen of my loaves (cakes I should rather call them) of barley bread, an earthen pot full of parched rice, a food I ate a great deal of, a little bottle of rum, half a goat, and powder and shot for killing more, and two large watch-coats, of those which, as I mentioned before, I had saved out of the seamen's chests; these I took, one to lie upon, and the other to cover me in the night.

It was the 6th of November, in the sixth year of my reign, or my captivity, which you please, that I set out on this voyage, and I found it much longer than I expected; for though the island itself was not very large, yet when I came to the east side of it I found a great ledge of rocks lie out above two leagues into the sea, some above water, some under it, and beyond that a shoal of sand, lying dry

half a league more ; so that I was obliged to go a great way out to sea to double the point.

When first I discovered them, I was going to give over my enterprise and come back again, not knowing how far it might oblige me to go out to sea, and, above all, doubting how I should get back again, so I came to an anchor ; for I had made me a kind of anchor with a piece of a broken grappling which I got out of the ship.

Having secured my boat, I took my gun and went on shore, climbing up upon a hill, which seemed to overlook that point, where I saw the full extent of it, and resolved to venture.

In my viewing the sea from that hill, where I stood, I perceived a strong, and indeed a most furious current, which ran to the east, and even came close to the point ; and I took the more notice of it, because I saw there might be some danger that when I came into it I might be carried out to sea by the strength of it, and not be able to make the island again. And indeed, had I not gotten first up upon this hill, I believe it would have been so ; for there was the same current on the other side of the island, only that it set off at a further distance ; and I saw there was a strong eddy under the shore ; so I had nothing to do but to get in out of the first current, and I should presently be in an eddy.

I lay here, however, two days ; because the wind, blowing pretty fresh at E.S.E., and that being just contrary to the said current, made a great breach of the sea upon the point ; so that it was not safe for me to keep too close to the shore for the breach, nor to go too far off because of the stream.

The third day, in the morning, the wind having abated overnight, the sea was calm, and I ventured. But I am a warning piece again to all rash and ignorant pilots ; for no sooner was I come to the point, when even I was not

my boat's length from the shore, but I found myself in a great depth of water, and a current like the sluice of a mill. It carried my boat along with it with such violence, that all I could do would not keep her so much as on the edge of it, but I found it hurried me farther and farther out from the eddy, which was on my left hand. There was no wind stirring to help me, and all I could do with my paddlers signified nothing. And now I began to give myself over for lost; for, as the current was on both sides of the island, I knew in a few leagues' distance they must join again, and then I was irrecoverably gone. Nor did I see any possibility of avoiding it; so that I had no prospect before me but of perishing; not by the sea, for that was calm enough, but of starving for hunger. I had indeed found a tortoise on the shore, as big almost as I could lift, and had tossed it into the boat; and I had a great jar of fresh water, that is to say, one of my earthen pots; but what was all this to being driven into the vast ocean, where to be sure, there was no shore, no mainland or island, for a thousand leagues at least?

However, I worked hard, till indeed my strength was almost exhausted, and kept my boat as much to the northward, that is, towards the side of the current which the eddy lay on, as possibly I could; when about noon, as the sun passed the meridian, I thought I felt a little breeze of wind in my face, springing up from the S.S.E. This cheered my heart a little, and especially when, in about half-an-hour more, it blew a pretty small gentle gale. By this time I was gotten at a frightful distance from the island; and had the least cloud or hazy weather intervened, I had been undone another way too; for I had no compass on board, and should never have known how to have steered towards the island if I had but once lost sight of it. But the weather continuing clear, I applied myself to get up my mast again, and spread my sail, standing away

to the north as much as possible, to get out of the current, and in about an hour came within about a mile of the shore, where, it being smooth water, I soon got to land.

I was now at a great loss which way to get home with my boat. I had run so much hazard, and knew too much to think of attempting it by the way I went out; and what might be at the other side (I mean the west side) I knew not, nor had I any mind to run any more ventures. So I only resolved in the morning to make my way westward along the shore, and to see if there was no creek where I might lay up my frigate in safety, so as to have her again if I wanted her. In about three miles, or thereabouts, coasting the shore, I came to a very good inlet or bay, about a mile over, which narrowed till it came to a very little rivulet or brook, where I found a very convenient harbour for my boat, and where she lay as if she had been in a little dock made on purpose for her. Here I put in, and having stowed my boat very safe, I went on shore to look about me, and see where I was.

I soon found I had but a little passed by the place where I had been before, when I travelled on foot to that shore; so taking nothing out of my boat but my gun and my umbrella, for it was exceedingly hot, I began my march. The way was comfortable enough after such a voyage as I had been upon, and I reached my old bower in the evening, where I found everything standing as I left it; for I always kept it in good order, being, as I said before, my country house.

I got over the fence, and laid me down in the shade to rest my limbs, for I was very weary, and fell asleep. But judge you, if you can, that read my story, what a surprise I must be in, when I was waked out of my sleep by a voice calling me by name several times, "Robin, Robin, Robin Crusoe, poor Robin Crusoe! Where are you, Robin Crusoe? Where are you? Where have you been?"

I was so dead asleep at first, being fatigued with rowing, or paddling, as it is called, the first part of the day, and with walking the latter part, that I did not wake thoroughly; but dozing between sleeping and waking, thought I dreamed that somebody spoke to me. But as the voice continued to repeat "Robin Crusoe, Robin Crusoe," at last I began to wake more perfectly, and was at first dreadfully frightened, and started up in the utmost consternation. But no sooner were my eyes open, but I saw my Poll sitting on the top of the hedge, and immediately knew that it was he that spoke to me; for just in such bemoaning language I had used to talk to him, and teach him; and he had learned it so perfectly, that he would sit upon my finger, and lay his bill close to my face, and cry, "Poor Robin Crusoe! Where are you? Where have you been? How come you here?" and such things as I had taught him.

However, even though I knew it was the parrot, and that indeed it could be nobody else, it was a good while before I could compose myself. First, I was amazed how the creature got thither, and then, how he should just keep about the place, and nowhere else. But as I was well satisfied it could be nobody but honest Poll, I got it over; and holding out my hand, and calling him by his name, Poll, the sociable creature came to me, and sat upon my thumb, as he used to do, and continued talking to me, "Poor Robin Crusoe! and how did I come here? and where had I been?" just as if he had been overjoyed to see me again; and so I carried him home along with me.

I had now had enough of rambling to sea for some time, and had enough to do for many days to sit still, and reflect upon the danger I had been in. I would have been very glad to have had my boat again on my side of the island; but I knew not how it was practicable to get it about. As to the east side of the island, which I had gone

round, I knew well enough there was no venturing that way; my very heart would shrink, and my very blood run chill, but to think of it. And ás to the other side of the island, I did not know how it might be there; but supposing the current ran with the same force against the shore at the east as it passed by it on the other, I might run the same risk of being driven down the stream, and carried by the island, as I had been before of being carried away from it. So, with these thoughts, I contented myself to be without any boat, though it had been the product of so many months' labour to make it, and of so many more to get it unto the sea.

I improved myself in this time in all the mechanic exercises which my necessities put me upon applying myself to, and I believe could, upon occasion, make a very good carpenter, especially considering how few tools I had. Besides this, I arrived at an unexpected perfection in my earthenware, and contrived well enough to make them with a wheel, which I found infinitely easier and better, because I made things round and shapable which before were filthy things indeed to look on. But I think I was never more vain of my own performance, or more joyful for anything I found out, than for my being able to make a tobacco-pipe. And though it was a very ugly clumsy thing when it was done, and only burnt red, like other earthenware, yet as it was hard and firm, and would draw the smoke, I was exceedingly comforted with it; for I had been always used to smoke, and there were pipes in the ship, but I forgot them at first, not knowing that there was tobacco in the island; and afterwards, when I searched the ship again, I could not come at any pipes at all.

In my wicker-ware also I improved much, and made abundance of necessary baskets, as well as my invention showed me; though not very handsome, yet they were such as were very handy and convenient for my laying

things up in, or fetching things home in. For example, if I killed a goat abroad, I could hang it up in a tree, flay it, and dress it, and cut it in pieces, and bring it home in a basket; and the like by a turtle; I could cut it up, take out the eggs and a piece or two of the flesh, which was enough for me, and bring them home in a basket, and leave the rest behind me. Also large deep baskets were my receivers for my corn, which I always rubbed out as soon as it was dry, and cured, and kept it in great baskets.

I began now to perceive my powder abated considerably, and this was a want which it was impossible for me to supply, and I began seriously to consider what I must do when I should have no more powder; that is to say, how I should do to kill any goats. I had, as is observed, in the third year of my being here kept a young kid, and bred her up tame. I could never find in my heart to kill her, till she died at last of mere age.

But being now in the eleventh year of my residence, and, as I have said, my ammunition growing low, I set myself to study some art to trap and snare the goats, to see whether I could not catch some of them alive.

To this purpose, I made snares to hamper them, and I do believe they were more than once taken in them; but my tackle was not good, for I had no wire, and I always found them broken, and my bait devoured. At length I resolved to try a pitfall; so I dug several large pits in the earth, in places where I had observed the goats used to feed, and over these pits I placed hurdles, of my own making too, with a great weight upon them; and several times I put ears of barley and dry rice, without setting the trap, and I could easily perceive that the goats had gone in and eaten up the corn, for I could see the mark of their feet. At length I set three traps in one night, and going the next morning, I found them all standing, and yet the bait eaten and gone; this was very

discouraging. However, I altered my trap; and, not to trouble you with particulars, going one morning to see my trap, I found in one of them a large old he-goat, and in one of the others three kids.

As to the old one, I knew not what to do with him, he was so fierce that I durst not go into the pit to him; that is to say, to go about to bring him away alive, which was what I wanted. So I even let him out, and he ran away, as if he had been frightened out of his wits. But I had forgotten then what I learned afterwards, that hunger will tame a lion. If I had let him stay there three or four days without food, and then have carried him some water to drink, and then a little corn, he would have been as tame as one of the kids, for they are mighty sagacious, tractable creatures where they are well used.

However, for the present I let him go, knowing no better at that time. Then I went to the three kids, and taking them one by one, I tied them together with strings, and with some difficulty brought them all home.

It was a good while before they would feed, but throwing them some sweet corn, it tempted them, and they began to be tame. And now I found that if I expected to supply myself with goat-flesh when I had no powder or shot left, breeding some up tame was my only way, when perhaps I might have them about my house like a flock of sheep.

But then it presently occurred to me that I must keep the tame from the wild, or else they would always run wild when they grew up; and the only way for this was to have an enclosed piece of ground, well fenced either with hedge or pale, to keep them in so effectually, that those within might not break out, or those without break in.

This was a great undertaking for one pair of hands, yet as I saw there was an absolute necessity of doing it,

my first piece of work was to find out a proper piece of ground, viz., where there was likely to be herbage for them to eat, water for them to drink, and cover to keep them from the sun.

For the first beginning, I resolved to enclose a piece of about 150 yards in length, and 100 yards in breadth; which, as it would maintain as many as I should have in any reasonable time, so, as my flock increased, I could add more ground to my enclosure.

This was acting with some prudence, and I went to work with courage. I was about three months hedging in the first piece, and, till I had done it, I tethered the three kids in the best part of it, and used them to feed as near me as possible, to make them familiar; and very often I would go and carry them some ears of barley, or a handful of rice, and feed them out of my hand; so that after my enclosure was finished, and I let them loose, they would follow me up and down, bleating after me for a handful of corn.

This answered my end, and in about a year and a half I had a flock of about twelve goats, kids, and all; and in two years more I had three and forty, besides several that I took and killed for my food. After that I enclosed five several pieces of ground to feed them in, with little pens to drive them into, to take them as I wanted, and gates out of one piece of ground into another.

But this was not all, for now I not only had goat's flesh to feed on when I pleased, but milk too, a thing which, indeed, in my beginning, I did not so much as think of, and which, when it came into my thoughts, was really an agreeable surprise. For now I set up my dairy, and had sometimes a gallon or two of milk in a day; and, as Nature, who gives supplies of food to every creature, dictates even naturally how to make use of it, so I, that had never milked a cow, much less a goat, or seen butter

or cheese made, very readily and handily, though after a great many essays and miscarriages, made me both butter and cheese at last, and never wanted it afterwards.

I was something impatient, as I have observed, to have the use of my boat, though very loth to run any more hazards; and therefore sometimes I sat contriving ways to get her about the island, and at other times I sat myself down contented enough without her. But I had a strange uneasiness in my mind to go down to the point of the the island where, as I have said, in my last ramble, I went up the hill to see how the shore lay, and how the current set, that I might see what I had to do. This inclination increased upon me every day, and at length I resolved to travel thither by land, following the edge of the shore. I did so; but had any one in England met such a man as I was, it must either have frightened him, or raised a great deal of laughter; and as I frequently stood still to look at myself, I could not but smile at the notion of my travelling through Yorkshire, with such an equipage, and in such a dress. Be pleased to take a sketch of my figure, as follows.

I had a great high shapeless cap, made of a goat's skin, with a flap hanging down behind, as well to keep the sun from me, as to shoot the rain off from running into my neck; nothing being so hurtful in these climates as the rain upon the flesh, under the clothes.

I had a short jacket of goat-skin, the skirts coming down to about the middle of my thighs; and a pair of open-kneed breeches of the same. The breeches were made of the skin of an old he-goat, whose hair hung down such a length on either side, that, like pantaloons, it reached to the middle of my legs. Stockings and shoes I had none, but had made me a pair of somethings, I scarce know what to call them, like buskins, to flap over my legs, and lace on either side like spatter-dashes; but

of a most barbarous shape, as indeed were all the rest of my clothes.

I had on a broad belt of goat's skin dried, which I drew together with two thongs of the same, instead of buckles; and in a kind of a frog on either side of this, instead of a sword and a dagger, hung a little saw and a hatchet, one on one side, one on the other. I had another belt, not so broad, and fastened in the same manner, which hung over my shoulder; and at the end of it, under my left arm, hung two pouches, both made of goat's skin too; in one of which hung my powder, in the other my shot. At my back I carried my basket, on my shoulder my gun, and over my head a great clumsy ugly goat-skin umbrella, but which, after all, was the most necessary thing I had about me, next to my gun. As for my face, the colour of it was really not so mulatto-like as one might expect from a man not at all careful of it, and living within nineteen degrees of the equinox. My beard I had once suffered to grow till it was about a quarter of a yard long; but as I had both scissors and razors sufficient, I had cut it pretty short, except what grew on my upper lip, which I had trimmed into a large pair of Mahometan whiskers, such as I had seen worn by some Turks whom I saw at Sallee; for the Moors did not wear such, though the Turks did. Of these mustachios or whiskers, I will not say they were long enough to hang my hat upon them, but they were of a length and shape monstrous enough, and such as, in England, would have passed for frightful.

But all this is by-the-bye; for, as to my figure, I had so few to observe me, that it was of no manner of consequence; so I say no more to that part. In this kind of figure I went my new journey, and was out five or six days. I travelled first along the sea-shore, directly to the place where I first brought my boat to an anchor, to get

up upon the rocks. And having no boat now to take care of, I went over the land, a nearer way, to the same height that I was upon before; when, looking forward to the point of the rocks which lay out, and which I was obliged to double with my boat, as is said above, I was surprised to see the sea all smooth and quiet, no rippling, no motion, no current, any more there than in other places.

I was at a strange loss to understand this, and resolved to spend some time in observing it, to see if nothing from the sets of the tide had occasioned it.

My observation convinced me that I had nothing to do but to observe the ebbing and the flowing of the tide, and I might very easily bring my boat about the island again. But when I began to think of putting it in practice, I had such a terror upon my spirits at the remembrance of the danger I had been in, that I could not think of it again with any patience; but, on the contrary, I took up another resolution, which was more safe, though more laborious; and this was that I would build, or rather make me another *periagua* or canoe; and so have one for one side of the island, and one for the other.

You are to understand that now I had, as I may call it, two plantations in the island; one, my little fortification or tent, with the wall about it, under the rock, with the cave behind me, which, by this time, I had enlarged into several apartments or caves, one within another. One of these, which was the driest and largest, and had a door out beyond my wall or fortification, that is to say, beyond where my wall joined to the rock, was all filled up with the large earthen pots, of which I have given an account, and with fourteen or fifteen great baskets, which would hold five or six bushels each, where I laid up my stores of provision, especially my corn, some in the ear, cut off short from the straw, and the other rubbed out with my hand.

As for my wall, made, as before, with long stakes or piles, those piles grew all like trees, and were by this time grown so big, and spread so very much, that there was not the least appearance, to any one's view, of any habitation behind them.

Near this dwelling of mine, but a little farther within the land, and upon lower ground, lay my two pieces of corn ground, which I kept duly cultivated and sowed, and which duly yielded me their harvest in its season; and whenever I had occasion for more corn, I had more land adjoining as fit as that.

Besides this, I had my country seat, and I had now a tolerable plantation there also; for, first, I had my little bower, as I called it, which I kept in repair; that is to say, I kept the hedge which circled it in constantly fitted up to its usual height, the ladder standing always in the inside. I kept the trees, which at first were no more than my stakes, but were now grown very firm and tall, I kept them always so cut that they might spread and grow thick and wild, and make the more agreeable shade, which they did effectually to my mind. In the middle of this, I had my tent always standing, being a piece of a sail spread over poles, set up for that purpose, and which never wanted any repair or renewing; and under this I had made me a squab or couch, with the skins of the creatures I had killed, and with other soft things, and a blanket laid on them, such as belonged to our sea-bedding, which I had saved, and a great watch-coat to cover me; and here, whenever I had occasion to be absent from my chief seat, I took up my country habitation.

Adjoining to this I had my enclosures for my cattle, that is to say, my goats. And as I had taken an inconceivable deal of pains to fence and enclose this ground, so I was so uneasy to see it kept entire, lest the goats should break through, that I never left off till, with infinite labour,

I had stuck the outside of the hedge so full of small stakes, and so near to one another, that it was rather a pale than a hedge, and there was scarce room to put a hand through between them; which afterwards, when those stakes grew, as they all did in the next rainy season, made the enclosure strong like a wall, indeed, stronger than any wall.

This will testify for me that I was not idle, and that I spared no pains to bring to pass whatever appeared necessary for my comfortable support; for I considered the keeping up a breed of tame creatures thus at my hand would be a living magazine of flesh, milk, butter, and cheese for me as long as I lived in the place, if it were to be forty years; and that keeping them in my reach depended entirely upon my perfecting my enclosures to such a degree, that I might be sure of keeping them together; which, by this method, indeed, I so effectually secured, that when these little stakes began to grow, I had planted them so very thick, I was forced to pull some of them up again.

In this place also I had my grapes growing, which I principally depended on for my winter store of raisins, and which I never failed to preserve very carefully, as the best and most agreeable dainty of my whole diet. And indeed they were not agreeable only, but wholesome, nourishing, and refreshing to the last degree.

As this was also about half-way between my other habitation and the place where I had laid up my boat, I generally stayed and lay here in my way thither; for I used frequently to visit my boat, and I kept all things about, or belonging to her, in very good order. Sometimes I went out in her to divert myself, but no more hazardous voyages would I go, nor scarce ever above a stone's cast or two from the shore, I was so apprehensive of being hurried out of my knowledge again by the currents or winds, or any other accident. But now I come to a new scene of my life.

It happened one day, about noon, going towards my

boat, I was exceedingly surprised with the print of a man's naked foot on the shore, which was very plain to be seen in the sand. I stood like one thunderstruck, or as if I had seen an apparition. I listened, I looked round me, I could hear nothing, nor see anything. I went up to a rising ground, to look farther. I went up the shore, and down the shore, but it was all one; I could see no other impression but that one. I went to it again to see if there were any more, and to observe if it might not be my fancy; but there was no room for that, for there was exactly the very print of a foot—toes, heel, and every part of a foot. How it came thither I knew not, nor could in the least imagine.

When I came to my castle, for so I think I called it ever after this, I fled into it like one pursued. Whether I went over by the ladder, as first contrived, or went in at the hole in the rock, which I called a door, I cannot remember; no, nor could I remember the next morning, for never frightened hare fled to cover, or fox to earth, with more terror of mind than I to this retreat.

I slept none that night. The farther I was from the occasion of my fright, the greater my apprehensions were; which is something contrary to the nature of such things, and especially to the usual practice of all creatures in fear.

In the middle of these apprehensions, it came into my thought one day, that all this might be a mere chimera of my own; and that this foot might be the print of my own foot, when I came on shore from my boat. This cheered me up a little too, and I began to persuade myself it was all a delusion, that it was nothing else but my own foot; and why might not I come that way from the boat, as well as I was going that way to the boat? Again, I considered also, that I could by no means tell, for certain, where I had trod, and where I had not; and that if, at last, this was only the print of my own foot, I had played the part of those fools who strive to make stories of

spectres and apparitions, and then are frightened at them more than anybody.

Now I began to take courage, and to peep abroad again, for I had not stirred out of my castle for three days and nights, so that I began to starve for provision; for I had little or nothing within doors but some barley-cakes and water. Then I knew that my goats wanted to be milked too, which usually was my evening diversion; and the poor creatures were in great pain and inconvenience for want of it; and, indeed, it almost spoiled some of them, and almost dried up their milk.

Heartening myself, therefore, with the belief that this was nothing but the print of one of my own feet, and so I might be truly said to start at my own shadow, I began to go abroad again, and went to my country house to milk my flock.

However, as I went down thus two or three days, and having seen nothing, I began to be a little bolder, and to think there was really nothing in it but my own imagination. But I could not persuade myself fully of this till I should go down to the shore again, and see this print of a foot, and measure it by my own, and see if there was any similitude or fitness, that I might be assured it was my own foot. But when I came to the place first, it appeared evidently to me, that when I laid up my boat, I could not possibly be on shore anywhere thereabout; secondly, when I came to measure the mark with my own foot, I found my foot not so large by a great deal. Both these things filled my head with new imaginations, and gave me the vapours again to the highest degree; so that I shook with cold, like one in an ague; and I went home again, filled with the belief that some man or men had been on shore there; or, in short, that the island was inhabited, and I might be surprised before I was aware. And what course to take for my security, I knew not.

The confusion of my thoughts kept me waking all night; but in the morning I fell asleep and having by the amusement of my mind, been, as it were, tired, and my spirits exhausted, I slept very soundly, and awoke much better composed than I had ever been before.

Now I began sorely to repent that I had dug my cave so large as to bring a door through again, which door, as I said, came out beyond where my fortification joined to the rock. Upon considering this, therefore, I resolved to draw me a second fortification, in the same manner of a semicircle, at a distance from my wall, just where I had planted a double row of trees about twelve years before, of which I made mention. These trees having been planted so thick before, they wanted but a few piles to be driven between them, that they should be thicker and stronger, and my wall would be soon finished.

So that I had now a double wall; and my outer wall was thickened with pieces of timber, old cables, and everything I could think of, to make it strong, having in it seven little holes, about as big as I might put my arm out at. In the inside of this I thickened my wall to above ten feet thick with continual bringing earth out of my cave, and laying it at the foot of the wall, and walking upon it; and through the seven holes I contrived to plant the muskets, of which I got seven on shore out of the ship. These, I say, I planted like my cannon, and fitted them into frames that held them like a carriage, that so I could fire all the seven guns in two minutes' time. This wall I was many a weary month a-finishig, and yet never thought myself safe till it was done.

When this was done, I stuck all the ground without my wall, for a great way in every direction, as full with stakes, or sticks of the osier-like wood, which I found so apt to grow, as they could well stand; insomuch, that I believe I might set in near twenty thousand of them,

leaving a pretty large space between them and my wall, that I might have room to see an enemy, and they might have no shelter from the young trees, if they attempted to approach my outer wall.

Thus in two years' time I had a thick grove; and in five or six years' time I had a wood before my dwelling, growing so monstrous thick and strong, that it was indeed perfectly impassable; and no men, of what kind soever, would ever imagine that there was anything beyond it, much less a habitation. As for the way which I proposed to myself to go in and out, for I left no avenue, it was by setting two ladders, one to a part of the rock which was low, and then broke in, and left room to place another ladder upon that; so when the two ladders were taken down, no man living could come down to me without hurting himself; and if they had come down, they were still on the outside of my outer wall.

Thus I took all the measures human prudence could suggest for my own preservation; and it will be seen, at length, that they were not altogether without just reason, though I foresaw nothing at that time more than my mere fear suggested to me.

While this was doing, I was not altogether careless of my other affairs; for I had a great concern upon me for my little herd of goats. They were not only a present supply to me upon every occasion, and began to be sufficient to me without the expense of powder and shot, but also without the fatigue of hunting after the wild ones; and I was loth to lose the advantage of them, and to have them all to nurse up over again.

To this purpose, I could think of but two ways to preserve them. One was, to find a convenient place where I could dig a cave under ground and drive them into it every night; and the other was, to enclose two or three little bits of land, remote from one another, and as much concealed

as I could, where I might keep about half-a-dozen young goats in each place; so that if any disaster happened to the flock in general, I might be able to raise them again with little trouble and time. And this, though it would require a great deal of time and labour, I thought was the more rational design.

Accordingly I spent some time to find out the most retired parts of the island, and I pitched upon one which was as private indeed as my heart could wish for. It was a little damp piece of ground in the middle of the hollow and thick woods, where, as is observed, I almost lost myself once before, endeavouring to come back that way from the eastern part of the island. Here I found a clear piece of land, near three acres, so surrounded with woods, that it was almost an enclosure by Nature; at least, it did not want near so much labour to make it so as the other pieces of ground I had worked so hard at.

I immediately went to work with this piece of ground, and in less than a month's time I had so fenced it round, that my flock or herd, call it which you please, who were not so wild now as at first they might be supposed to be, were well enough secured in it. So, without any farther delay, I removed ten young she-goats and two he-goats to this piece. And when they were there, I continued to perfect the fence, till I had made it as secure as the other, which, however, I did at more leisure, and it took me up more time by a great deal.

All this labour I was at the expense of, purely from my apprehensions on the account of the print of a man's foot which I had seen; for, as yet, I never saw any human creature come near the island. And I had now lived two years under these uneasinesses, which, indeed, made my life much less comfortable than it was before, as may well be imagined by any who know what it is to live in the constant snare of the fear of man.

But to go on. After I had thus secured one part of my little living stock, I went about the whole island, searching for another private place to make such another deposit; when, wandering more to the west point of the island than I had ever done yet, and looking out to sea, I thought I saw a boat at a great distance. I had found a perspective glass or two in one of the seamen's chests, which I saved out of our ship, but I had it not about me. The boat was so remote, that I could not tell what to make of it, though I looked at it till my eyes were not able to hold to look any longer. Whether it was a boat or not, I do not know; but as I descended from the hill, I could see no more of it, so I gave it over; only I resolved to go no more out without a perspective glass in my pocket.

When I was come down the hill to the end of the island, where, indeed, I had never been before, I was presently convinced that the seeing the print of a man's foot was not such a strange thing in the island as I imagined. And, but that it was a special providence that I was cast upon the side of the island where the savages never came, I should easily have known that nothing was more frequent than for the canoes from the main, when they happened to be a little too far out at sea, to shoot over to that side of the island for harbour; likewise, as they often met and fought in their canoes, the victors having taken any prisoners would bring them over to this shore, where, according to their dreadful customs, being all cannibals, they would kill and eat them; of which hereafter.

When I was come down the hill to the shore, as I said above, being the S.W. point of the island, I was perfectly confounded and amazed; nor is it possible for me to express the horror of my mind at seeing the shore spread with skulls, hands, feet, and other bones of human bodies; and particularly, I observed a place where there had been

a fire made, and a circle dug in the earth, like a cockpit, where it is supposed the savage wretches had sat down to their inhuman feastings upon the bodies of their fellow-creatures.

I was so astonished with the sight of these things, that I entertained no notion of any danger to myself from it for a long while. All my apprehensions were buried in the thoughts of such a pitch of inhuman brutality, and the horror of the degeneracy of human nature, which, though I had heard of often, yet I never had so near a view of before. In short, I turned away my face from the horrid spectacle. I got me up the hill again with all the speed I could, and walked on towards my own habitation.

I had the care of my safety more now upon my hands than that of my food. I cared not to drive a nail, or chop a stick of wood now, for fear the noise I should make should be heard; much less would I fire a gun, for the same reason; and, above all, I was intolerably uneasy at making any fire, lest the smoke, which is visible at a great distance in the day, should betray me; and for this reason I removed that part of my business which required fire, such as burning of pots and pipes, etc., into my new apartment in the woods; where, after I had been some time, I found, to my unspeakable consolation, a mere natural cave in the earth, which went in a vast way, and where, I dare say, no savage, had he been at the mouth of it, would be so hardy as to venture in; nor, indeed, would any man else, but one who, like me, wanted nothing so much as a safe retreat.

The mouth of this hollow was at the bottom of a great rock, where, by mere accident I would say (if I did not see abundant reason to ascribe all such things now to Providence), I was cutting down some thick branches of trees to make charcoal; and before I go on, I must observe the reason of my making this charcoal, which was this.

I was afraid of making a smoke about my habitation,

as I said before; and yet I could not live there without baking my bread, cooking my meat, etc. So I contrived to burn some wood here, as I had seen done in England under turf, till it became chark, or dry coal; and then putting the fire out, I preserv'd the coal to carry home, and perform the other services which fire was wanting for at home, without danger of smoke.

But this is by-the-bye. While I was cutting down some wood here, I perceived that behind a very thick branch of low brushwood, or underwood, there was a kind of hollow place. I was curious to look into it, and getting with difficulty into the mouth of it, I found it was pretty large; that is to say, sufficient for me to stand upright in it, and perhaps another with me. But I must confess to you I made more haste out than I did in when, looking farther into the place, which was perfectly dark, I saw two broad shining eyes of some creature, whether devil or man I knew not, which twinkled like two stars, the dim light from the cave's mouth shining directly in, and making the reflection.

But plucking up my spirits as well as I could, I stepped forward again, and by the light of a firebrand, holding it up a little over my head, I saw lying on the ground a most monstrous, frightful, old he-goat, just making his will, as we say, and gasping for life; and dying, indeed, of mere old age.

I stirred him a little to see if I could get him out, and he essayed to get up, but was not able to raise himself; and I thought with myself he might even lie there, for if he had frightened me so, he would certainly frighten any of the savages, if any of them should be so hardy as to come in there while he had any life in him.

I was now recovered from my surprise, and began to look round me when I found the cave was but very small; that is to say, it might be about twelve feet over, but

in no manner of shape, either round or square, no hands having ever been employed in making it but those of mere Nature. I observed also that there was a place at the farther side of it that went in farther, but was so low, that it required me to creep upon my hands and knees to go into it, and whither I went I knew not; so having no candle, I gave it over for some time, but resolved to come again the next day, provided with candles and a tinder-box, which I had made of the lock of one of the muskets, with some wild-fire in the pan.

Accordingly the next day I came provided with six large candles of my own making, for I made very good candles now of goat's tallow; and going into this low place, I was obliged to creep upon all fours, as I have said, almost ten yards; which, by the way, I thought was a venture bold enough, considering that I knew not how far it might go, nor what was beyond it. When I was got through the straight, I found the roof rose higher up, I believe near twenty feet. But never was such a glorious sight seen in the island, I dare say, as it was, to look round the sides and roof of this vault or cave; the walls reflected a hundred thousand lights to me from my two candles. What it was in the rock, whether diamonds, or any other precious stones, or gold, which I rather supposed it to be, I knew not.

The place I was in was a most delightful cavity or grotto of its kind, though perfectly dark. The floor was dry and level, and had a sort of small loose gravel upon it, so that there was no nauseous or venomous creature to be seen; neither was there any damp or wet on the sides or roof. The only difficulty in it was the entrance, which, however, as it was a place of security and such a retreat as I wanted, I thought that was a convenience; so that I was really rejoiced at the discovery, and resolved, without any delay, to bring some of those things

which I was most anxious about to this place; particularly, I resolved to bring hither my magazine of powder, and all my spare arms, viz., two fowling-pieces, for I had three in all, and three muskets, for of them I had eight in all. So I kept at my castle only five, which stood ready-mounted, like pieces of cannon, on my outmost fence; and were ready also to take out upon any expedition.

Upon this occasion of removing my ammunition, I opened the barrel of powder which I took out of the sea and which had been wet; and I found that the water had penetrated about three or four inches into the powder on every side, which caking, and growing hard, had preserved the inside like a kernel in a shell; so that I had near sixty pounds of very good powder in the centre of the cask. And this was an agreeable discovery to me at that time; so I carried all away thither, never keeping above two or three pounds of powder with me in my castle, for fear of a surprise of any kind. I also carried thither all the lead I had left for bullets.

The old goat, whom I found expiring, died in the mouth of the cave the next day after I made this discovery; and I found it much easier to dig a great hole there, and throw him in and cover him with earth, than to drag him out.

I was now in my twenty-third year of residence in this island, and was so naturalised to the place and to the manner of living, that could I have but enjoyed the certainty that no savages would come to the place to disturb me, I could have been content to have capitulated for spending the rest of my time there, even to the last moment, till I had laid me down and died, like the old goat in the cave. I had also arrived at some little diversions and amusements, which made the time pass more pleasantly with me a great deal than it did before. As first, I had taught my Poll, as I noted before, to speak;

he did it so familiarly, and talked so articulately and plain, that it was very pleasant to me; and he lived with me no less than six and twenty years. How long he might live afterwards I know not, though I know there is a belief in the Brazils that they live a hundred years. Perhaps poor Poll may be alive there still, calling after poor Robin Crusoe to this day. I wish no Englishman the ill luck to come there and hear him; but if he did, he would certainly believe it was the devil. My dog was a very pleasant and loving companion to me for no less than sixteen years of my time, and then died of mere old age. As for my cats, they multiplied, as I have observed, to that degree, that I was obliged to shoot several of them at first to keep them from devouring me and all I had; but at length, when the two old ones I brought with me were gone, the others all ran wild into the woods, except two or three favourites, which I kept tame, and whose young, when they had any, I always drowned; and these were part of my family. Besides these, I always kept two or three household kids about me, whom I taught to feed out of my hand. And I had two more parrots, which talked pretty well, and would all call "Robin Crusoe," but none like my first; nor, indeed, did I take the pains with any of them that I had done with him. I had also several tame sea-fowls, whose names I know not, whom I caught upon the shore, and cut their wings; and the little stakes which I had planted before my castle wall being now grown up to a good thick grove, these fowls all lived among these low trees, and bred there, which was very agreeable to me; so that, as I said above, I began to be very well contented with the life I led, if it might but have been secure from the dread of the savages.

It was now the month of December, as I said above, in my twenty-third year; and this was the particular time of my harvest, and required my being pretty much

abroad in the fields; when, going out pretty early in the morning, even before it was thorough daylight, I was surprised with seeing a light of some fire upon the shore, at a distance from me of about two miles, towards the end of the island, where I had observed some savages had been, as before. But not on the other side, for to my great affliction, the fire was on my side of the island.

I was indeed terribly surprised at the sight, and stopped short within my grove, not daring to go out, lest I might be surprised; and yet I had no more peace within from the apprehensions I had that if these savages, in rambling over the island, should find my corn standing or cut, or any of my works and improvements, they would immediately conclude that there were people in the place, and would then never give over till they had found me out. In this extremity I went back directly to my castle, pulled up the ladder after me, and made all things without look as wild and natural as I could.

Then I prepared myself within, putting myself in a posture of defence. I loaded all my cannon, as I called them, that is to say, my muskets, which were mounted upon my new fortification, and all my pistols, and resolved to defend myself to the last gasp. In this posture I continued about two hours; but began to be mighty impatient for intelligence abroad, for I had no spies to send out.

After sitting a while longer, and musing what I should do in this case, I was not able to bear sitting in ignorance any longer; so setting up my ladder to the side of the hill where there was a flat place, and then pulling it up after me, I set it up again, and mounted to the top of the hill; then pulling out my perspective-glass, which I had taken on purpose, I laid me down flat on the ground, and began to look for the place. I presently found there were no less than nine naked savages sitting round a small fire they had made, not to warm them, for they had no need

CRUSOE SEES THE CANNIBALS.

of that, the weather being extremely hot, but, as I supposed, to dress some of their barbarous diet of human flesh which they had brought with them, whether alive or dead, I could not know.

They had two canoes with them, which they had hauled up upon the shore; and as it was the ebb tide, they seemed to me to wait for the return of the flood to go away again. It is not easy to imagine what confusion this sight put me into, especially seeing them come on my side of the island, and so near me too. But when I observed that their coming must be always with the current of the ebb, I began afterwards to be more sedate in my mind, being satisfied that I might go abroad with safety all the time of the flood tide, if they were not on shore before; and having made this observation, I went abroad about my harvest-work with the more composure.

As I expected, so it proved; for as soon as the tide made to the westward, I saw them all take boat and row, or paddle, as we call it, away. I should have observed, that for an hour and more before they went off, they went to dancing; and I could easily discern their postures and gestures by my glasses.

As soon as I saw them shipped and gone, I took two guns upon my shoulders, and two pistols at my girdle, and my great sword by my side, without a scabbard, and with all the speed I was able to make I went away to the hill where I had discovered the first appearance of them. As soon as I arrived there, which was not less than two hours, for I could not go fast, being so laden with arms as I was, I perceived there had been three canoes more of savages on that place; and looking out farther, I saw they were all at sea together, making over for the main.

This was a dreadful sight to me, especially when, going down to the shore, I could see the marks of horror which the dismal work they had been about had left

behind it, viz., the blood, the bones, and part of the flesh of human bodies, eaten and devoured by those wretches with merriment and sport. I was so filled with indignation at the sight, that I began now to premeditate the destruction of the next that I saw there, let them be who or how many soever.

However, I wore out a year and three months more before I ever saw any more of the savages, and then I found them again, as I shall soon observe. It is true they might have been there once or twice, but either they made no stay, or at least I did not hear them; but in the month of May, as near as I could calculate, and in my four and twentieth year, I had a very strange encounter with them; of which in its place.

The perturbation of my mind, during this fifteen or sixteen months' interval, was very great. I slept unquiet, dreamed always frightful dreams, and often started out of my sleep in the night. In the day great troubles overwhelmed my mind, and in the night I dreamed often of killing the savages, and of the reasons why I might justify the doing of it. But, to waive all this for a while, it was in the middle of May, on the sixteenth day, I think, as well as my poor wooden calendar would reckon, for I marked all upon the post still; I say, it was the sixteenth of May that it blew a very great storm of wind all day, with a great deal of lightning and thunder, and a very foul night it was after it. I know not what was the particular occasion of it, but as I was reading in the Bible, and taken up with very serious thoughts about my present condition, I was surprised with a noise of a gun, as I thought, fired at sea.

This was, to be sure, a surprise of a quite different nature from any I had met with before; for the notions this put into my thoughts were quite of another kind. I started up in the greatest haste imaginable, and, in a trice,

clapped my ladder to the middle place of the rock, and pulled it after me. Mounting it the second time, I got to the top of the hill the very moment that a flash of fire bade me listen for a second gun, which accordingly, in about half a minute, I heard; and, by the sound, knew that it was from that part of the sea where I was driven down the current in my boat.

I immediately considered that this must be some ship in distress, and that they had some comrade, or some other ship in company, and fired these guns for signals of distress, and to obtain help. I had this presence of mind, at that minute, as to think that though I could not help them, it may be they might help me; so I brought together all the dry wood I could get at hand, and, making a good handsome pile, I set it on fire upon the hill. The wood was dry, and blazed freely; and though the wind blew very hard, yet it burnt fairly out; so that I was certain, if there was any such thing as a ship, they must needs see it, and no doubt they did; for as soon as ever my fire blazed up I heard another gun, and after that several others, all from the same quarter. I plied my fire all night long till day broke; and when it was broad day, and the air cleared up, I saw something at a great distance at sea, full east of the island, whether a sail or a hull I could not distinguish, no, not with my glasses, the distance was so great, and the weather still something hazy also; at least it was so out at sea.

I looked frequently at it all that day, and soon perceived that it did not move; so I presently concluded that it was a ship at an anchor. And being eager, you may be sure, to be satisfied, I took my gun in my hand and ran toward the south side of the island, to the rocks where I had formerly been carried away with the current; and getting up there, the weather by this time being perfectly clear, I could plainly see, to my great sorrow, the wreck

of a ship, cast away in the night upon those concealed rocks which I found when I was out in my boat; and which rocks, as they checked the violence of the stream, and made a kind of counter-stream or eddy, were the occasion of my recovering from the most desperate, hopeless condition that ever I had been in in all my life.

Thus, what is one man's safety is another man's destruction; for it seems these men, whoever they were, being out of their knowledge, and the rocks being wholly under water, had been driven upon them in the night, the wind blowing hard at E. and E.N.E. Had they seen the island, as I must necessarily suppose they did not, they must, as I thought, have endeavoured to have saved themselves on shore by the help of their boat; but their firing of guns for help, especially when they saw, as I imagined, my fire, filled me with many thoughts. First, I imagined that upon seeing my light, they might have put themselves into their boat, and have endeavoured to make the shore; but that the sea running very high, they might have been cast away. Other times I imagined that they might have lost their boat before, as might be the case many ways; as, particularly, by the breaking of the sea upon their ship, which many times obliges men to stave, or take in pieces their boat, and sometimes to throw it overboard with their own hands. Other times I imagined they had some other ship or ships in company, who, upon the signals of distress they had made, had taken them up and carried them off. Other whiles I fancied they were all gone off to sea in their boat, and being hurried away by the current that I had been formerly in, were carried out into the great ocean, where there was nothing but misery and perishing; and that, perhaps, they might by this time think of starving, and of being in a condition to eat one another.

It was now calm, and I had a great mind to venture out in my boat to this wreck, not doubting but I might

find something on board that might be useful to me. But that did not altogether press me so much as the possibility that there might be yet some living creature on board, whose life I might not only save, but might, by saving that life, comfort my own to the last degree.

Under the power of this impression, I hastened back to my castle, prepared everything for my voyage, took a quantity of bread, a great pot for fresh water, a compass to steer by, a bottle of rum (for I had still a great deal of that left), and a basket full of raisins. And thus, loading myself with everything necessary, I went down to my boat, baled the water out of her, and got her afloat, loaded all my cargo in her and then went home again for more. My second cargo was a great bag full of rice, the umbrella to set up over my head for shade, another large pot full of fresh water, and about two dozen of my small loaves, or barley-cakes, more than before, with a bottle of goat's milk and a cheese; all which, with great labour and sweat, I brought to my boat, and praying to God to direct my voyage, I put out. Rowing, or paddling the canoe along the shore, I came at last to the utmost point of the island on that side, viz., N.E. And now I was to launch out into the ocean, and either to venture or not to venture. I looked on the rapid currents which ran constantly on both sides of the island at a distance, and which were very terrible to me, from the remembrance of the hazard I had been in before, and my heart began to fail me; for I foresaw that if I was driven into either of those currents, I should be carried a vast way out to sea, and perhaps out of my reach, or sight of the island again; and that then, as my boat was but small, if any little gale of wind should rise, I should be inevitably lost.

These thoughts so oppressed my mind, that I began to give over my enterprise; and having hauled my boat into

a little creek on the shore, I stepped out, and sate me down upon a little rising bit of ground, very pensive and anxious, between fear and desire, about my voyage; when, as I was musing I could perceive that the tide was turned, and the flood come on; upon which my going was for so many hours impracticable. Upon this, presently it occurred to me that I should go up to the highest piece of ground I could find and observe, if I could, how the sets of the tide, or currents, lay when the flood came in, that I might judge whether, if I was driven one way out, I might not expect to be driven another way home, with the same rapidity of the currents. This thought was no sooner in my head but I cast my eye upon a little hill, which sufficiently overlooked the sea both ways, and from whence I had a clear view of the currents, or sets of the tide, and which way I was to guide myself in my return. Here I found, that as the current of the ebb set out close by the south point of the island, so the current of the flood set in close by the shore of the north side; and that I had nothing to do but to keep to the north of the island in my return, and I should do well enough.

Encouraged with this observation, I resolved the next morning to set out with the first of the tide, and reposing myself for the night in the canoe, under the great watch-coat I mentioned, I launched out. I made first a little out to sea full north, till I began to feel the benefit of the current which set eastward, and which carried me at a great rate, and yet did not so hurry me as the southern side current had done before, and so as to take from me all government of the boat; but having a strong steerage with my paddle, I went at a great rate directly for the wreck, and in less than two hours I came up to it.

It was a dismal sight to look at. The ship, which, by its

building, was Spanish, was stuck fast, jammed in 'between two rocks. All the stern and quarter of her was beaten to pieces with the sea ; and as her forecastle, which stuck in the rocks, had run on with gre'tt violence, her mainmast and foremast were brought by the board ; that is to say, broken short off ; but her bowsprit was sound, and the head and bow appeared firm. When I came close to her a dog appeared upon her, who, seeing me coming, yelped and cried ; and as soon as I called him, jumped into the sea to come to me, and I took him into the boat, but found him almost dead for hunger and thirst. I gave him a cake of my bread, and he ate it like a ravenous wolf that had been starving a fortnight in the snow. I then gave the poor creature some fresh water, with which, if I would have let him, he would have burst himself.

After this I went on board ; but the first sight I met with was two men drowned in the cook-room, or forecastle of the ship, with their arms fast about one another. I concluded, as is indeed probable, that when the ship struck, it being in a storm, the sea broke so high and so continually over her, that the men were not able to bear it and were strangled with the constant rushing in of the water, as much as if they had been under water. Besides the dog, there was nothing left in the ship that had life ; nor any goods that I could see, but what were spoiled by the water. There were some casks of liquor, whether wine or brandy I knew not, which lay lower in the hold, and which, the water being ebbed out, I could see ; but they were too big to meddle with. I saw several chests, which I believed belonged to some of the seamen ; and I got two of them into the boat, without examining what was in them.

Had the stern of the ship been fixed, and the forepart broken off, I am persuaded I might have made a good voyage. She had, no doubt, a great treasure in her, but

of no use, at that time, to anybody; and what became of the rest of her people, I then knew not.

I found, besides these chests, a little cask full of liquor, of about twenty gallons, which I got into my boat with much difficulty. There were several muskets in a cabin, and a great powder-horn, with about four pounds of powder in it. As for the muskets, I had no occasion for them, so I left them, but took the powder-horn. I took a fire-shovel and tongs, which I wanted extremely; as also two little brass kettles, a copper pot to make chocolate, and a gridiron. And with this cargo, and the dog, I came away, the tide beginning to make home again; and the same evening, about an hour within night, I reached the island again, weary and fatigued to the last degree.

I reposed that night in the boat; and in the morning I resolved to harbour what I had got in my new cave, not to carry it home to my castle. After refreshing myself, I got all my cargo on shore, and began to examine the particulars. The cask of liquor I found to be a kind of rum, but not such as we had at the Brazils, and, in a word, not at all good. But when I came to open the chests, I found several things of great use to me. For example, I found in one a fine case of bottles, of an extraordinary kind, and filled with cordial waters, fine, and very good; the bottles held about three pints each, and were tipped with silver. I found two pots of sweetmeats, so fastened also on top, that the salt water had not hurt them; and two more of the same, which the water had spoiled. I found some very good shirts, which were very welcome to me; and about a dozen and a half of linen white handkerchiefs and coloured neckcloths. The former were also very welcome, being exceeding refreshing to wipe my face in a hot day. Besides this, when I came to the till in the chest, I found there three great bags of pieces of eight, which held about eleven hundred

pieces in all; and in one of them, wrapped up in a paper, six doubloons of gold, and some small bars or wedges of gold. I suppose they might all weigh near a pound.

The other chest I found had some clothes in it, but of little value; but by the circumstances, it must have belonged to the gunner's mate; though there was no powder in it, but about two pounds of fine glazed powder, in three small flasks, kept, I suppose, for charging their fowling-pieces on occasion. Upon the whole, I got very little by this voyage that was of any use to me; for as to the money, I had no manner of occasion for it; 'twas to me as the dirt under my feet; and I would have given it all for three or four pair of English shoes and stockings, which were things I greatly wanted, but had not had on my feet now for many years. I had indeed got two pair of shoes now, which I took off the feet of the two drowned men whom I saw in the wreck, and I found two pair more in one of the chests, which were very welcome to me; but they were not like our English shoes, either for ease or service, being rather what we call pumps than shoes. I found in this seaman's chest about fifty pieces of eight in royals, but no gold. I suppose this belonged to a poorer man than the other, which seemed to belong to some officer.

However, I lugged this money home to my cave, and laid it up, as I had done that before which I brought from our own ship; but it was great pity, as I said, that the other part of this ship had not come to my share, for I am satisfied I might have loaded my canoe several times over with money, which, if I had ever escaped to England, would have lain here safe enough till I might have come again and fetched it.

Having now brought all my things on shore, and secured them, I went back to my boat, and rowed or paddled her along the shore to her old harbour, where I

laid her up, and made the best of my way to my old habitation, where I found everything safe and quiet. So I began to repose myself, live after my old fashion, and take care of my family affairs; and, for a while, I lived easy enough, only that I was more vigilant than I used to be, looked out oftener, and did not go abroad so much. If at any time I did stir with any freedom, it was always to the east part of the island, where I was pretty well satisfied the savages never came, and where I could go without so many precautions, and such a load of arms and ammunition as I always carried with me if I went the other way.

I lived in this condition near two years more; but my unlucky head, that was always to let me know it was born to make my body miserable, was all this two years filled with projects and designs, how, if it were possible, I might get away from this island; for sometimes I was for making another voyage to the wreck, though my reasons told me that there was nothing left there worth the hazard of my voyage: sometimes for a ramble one way, sometimes another; and I believe verily, if I had had the boat that I went from Sallee in, I should have ventured to sea, bound anywhere, I knew not whither.

About a year and a half after, I was surprised one morning early with seeing no less than five canoes all on shore together on my side of the island, and the people who belonged to them all landed, and out of my sight. The number of them upset all my measures; for seeing so many, and knowing that they always came four, or six, or sometimes more, in a boat, I could not tell what to think of it, or how to take my measures to attack twenty or thirty men single-handed; so I lay still in my castle, perplexed and discomfited. However, I put myself into all the same postures for an attack that I had formerly provided, and was just as ready for action if anything had

presented. Having waited a good while, listening to hear if they made any noise, at length, being very impatient, I set my guns at the foot of my ladder, and clambered up to the top of the hill, by my two stages, as usual; standing so, however, that my head did not appear above the hill, so that they could not perceive me by any means. Here I observed, by the help of my perspective glass, that they were no less than thirty in number, that they had a fire kindled, and that they had had meat dressed. How they had cooked it, that I knew not, or what it was; but they were all dancing, in I know not how many barbarous gestures and figures, their own way, round the fire.

While I was thus looking on them, I perceived by my perspective two miserable wretches dragged from the boats, where, it seems, they were laid by, and were now brought out for the slaughter. I perceived one of them immediately fall, being knocked down, I suppose, with a club or wooden sword, for that was their way, while the other victim was left standing by himself, till they should be ready for him. In that very moment this poor wretch seeing himself a little at liberty, Nature inspired him with hopes of life, and he started away from them, and ran with incredible swiftness along the sands directly towards me, I mean towards that part of the coast where my habitation was.

I was dreadfully frightened, that I must acknowledge, when I perceived him to run my way, and especially when, as I thought, I saw him pursued by the whole body; and now I expected that part of my dream was coming to pass, and that he would certainly take shelter in my grove; but I could not depend, by any means, upon my dream for the rest of it, viz., that the other savages would not pursue him thither, and find him there. However, I kept my station, and my spirits began to recover when I found that there were not above three men who followed him; and still more was I encouraged when I found that he outstripped

them exceedingly in running, and gained ground of them ; so that if he could but hold it for half-an-hour, I saw easily he would fairly get away from them all.

There was between them and my castle the creek, which I mentioned often at the first part of my story, when I landed my cargoes out of the ship ; and this I saw plainly he must necessarily swim over, or the poor wretch would be taken there. - But when the savage escaping came thither he made nothing of it, though the tide was then up ; but plunging in, swam through in about thirty strokes or thereabouts, landed, and ran on with exceeding strength and swiftness. When the three persons came to the creek, I found that two of them could swim, but the third could not, and that, standing on the other side, he looked at the other, but went no farther, and soon after went softly back, which, as it happened, was very well for him in the main.

I observed that the two who swam were yet more than twice as long swimming over the creek as the fellow was who fled from them. It came now very warmly upon my thoughts, and indeed irresistibly, that now was my time to get me a servant, and perhaps a companion or assistant, and that I was called plainly by Providence to save this poor creature's life.

I immediately ran down the ladders with all possible expedition, fetched my two guns, for they were both at the foot of the ladders, and getting up again, with the same haste, to the top of the hull, I crossed toward the sea, and having a very short cut, and all down hill, clapped myself in the way between the pursuers and the pursued, hallooing aloud to him who fled, and he looking back, was at first perhaps as much frightened at me as at them. I beckoned with my hand to him to come back ; and, in the meantime, I slowly advanced towards the two that followed ; then rushing at once upon the foremost, I knocked him down with the stock of my

"I KNOCKED HIM DOWN WITH THE STOCK OF MY PIECE."

piece. I was loth to fire, because I would not have the rest hear; though, at that distance, it would not have been easily heard, and being out of sight of the smoke too, they would not have easily known what to make of it. Having knocked this fellow down, the other who pursued with him stopped, as if he had been frightened, and I advanced apace towards him; but as I came nearer, I perceived presently that he had a bow and arrow, and was fitting it to shoot at me; so I was then necessitated to shoot at him first, which I did, and killed him at the first shot.

The poor savage who fled, but had stopped, though he saw both his enemies fallen and killed, as he thought, yet was so frightened with the fire and noise of my piece, that he stood stock-still, and neither came forward or went backward, though he seemed rather inclined to fly still, than to come on. I hallooed again to him, and made signs to come forward, which he easily understood, and came a little way, then stopped again, and then a little farther, and stopped again; and I could then perceive that he stood trembling, as if he had been taken prisoner, and was about to be killed, as his two enemies had been. I beckoned him again to come to me, and gave him all the signs of encouragement that I could think of; he came nearer and nearer, kneeling down every ten or twelve steps, in token of acknowledgment for my saving his life. I smiled at him, and looked pleasantly, and beckoned to him to come still nearer. At length he came close to me, and then he kneeled down again, kissed the ground, and laid his head upon the ground, and taking me by the foot, set my foot upon his head. This, it seems, was in token of swearing to be my slave for ever. I took him up, and made much of him, and encouraged him all I could.

But there was more work to do yet, for I perceived the savage whom I knocked down was not killed, but stunned with the blow, and began to come to himself; so

I pointed to him, and showing him the savage, that he was not dead, upon this he spoke some words to me; and though I could not understand them, yet I thought they were pleasant to hear; for they were the first sound of a man's voice that I had heard, my own excepted, for above twenty-five years. But there was no time for such reflections now. The savage who was knocked down recovered himself so far as to sit up upon the ground, and I perceived that my savage began to be afraid; but when I saw that, I presented my other piece at the man, as if I would shoot him. Upon this my savage, for so I call him now, made a motion to me to lend him my sword, which hung naked in a belt by my side; so I did. He no sooner had it but he runs to his enemy, and, at one blow, cut off his head as cleverly, no executioner could have done it sooner or better; which I thought very strange for one who, I had reason to believe, never saw a sword in his life before, except their own wooden swords. However, it seems, as I learned afterwards, they make their wooden swords so sharp, so heavy, and the wood is so hard, that they will cut off heads even with them, ay, and arms, and that at one blow too. When he had done this, he comes laughing to me in sign of triumph, and brought me the sword again, and with abundance of gestures, which I did not understand, laid it down, with the head of the savage that he had killed, just before me.

But that which astonished him most, was to know how I had killed the other Indian so far off and pointing to him he made signs to me to let him go to him; so I bade him go, as well as I could. When he came to him, he stood like one amazed looking at him, turned him first on one side then on t'other, and looked at the wound the bullet had made, which, it seems, was just in his breast, where it had made a hole, and no great quantity of blood had followed; but he had bled inwardly, for he was quite dead. He took up his bow and arrows, and came back; so I turned

to go away, and beckoned to him to follow me, making signs to him that more might come after them.

Upon this he signed to me that he should bury them with sand, that they might not be seen by the rest if they followed; and so I made signs again to him to do so. He fell to work, and in an instant he had scraped a hole in the sand with his hands big enough to bury the first in, and then dragged him into it, and covered him, and did so also by the other. I believe he had buried them both in a quarter of an hour. Then calling him away, I carried him, not to my castle, but quite away to my cave, on the farther part of the island; so I did not let my dream come to pass in that part, viz., that he came into my grove for shelter.

Here I gave him bread and a bunch of raisins to eat, and a draught of water, which I found he was indeed in great distress for, by his running; and having refreshed him, I made signs for him to lie down and sleep, pointing to a place where I had laid a great parcel of rice-straw, and a blanket upon it, which I used to sleep upon myself sometimes; so the poor creature laid down, and went to sleep.

He was a comely, handsome fellow, perfectly well made, with straight strong limbs, not too large, tall, and well-shaped, and, as I reckon, about twenty-six years of age. He had a very good countenance, not a fierce and surly aspect, but seemed to have something very manly in his face; and yet he had all the sweetness and softness of a European in his countenance too, especially when he smiled. His hair was long and black, not curled like wool; his forehead very high and large; and a great vivacity and sparkling sharpness in his eyes. The colour of his skin was not quite black, but very tawny; and yet not of an ugly, yellow, nauseous tawny as the Brazilians and other natives of America are, but of a bright kind of

a dun olive colour, that had in it something very agreeable, though not very easy to describe. His face was round and plump; his nose small, not flat like the negroes; a very good mouth, thin lips, and his fine teeth well set, and white as ivory.

After he had slumbered, rather than slept, about half-an-hour, he awoke again, and came out of the cave to me, for I had been milking my goats, which I had in the enclosure just by. When he espied me, he came running to me, laying himself down upon the ground, with all the possible signs of a humble, thankful disposition, making many antic gestures to show it. At last he laid his head flat upon the ground, close to my foot, and set my other foot upon his head, as he had done before, and after this made all the signs to me of subjection, servitude, and submission imaginable, to let me know how he would serve me as long as he lived. I understood him in many things, and let him know I was very well pleased with him. In a little time I began to speak to him, and teach him to speak to me; and, first, I made him to know his name should be Friday, which was the day I saved his life. I called him so for the memory of the time. I likewise taught him to say Master, and then let him know that was to be my name. I likewise taught him to say Yes and No, and to know the meaning of them. I gave him some milk in an earthen pot, and let him see me drink it before him, and sop my bread in it; and I gave him a cake of bread to do the like, which he quickly complied with, and made signs that it was very good for him.

I kept there with him all that night; but as soon as it was day, I beckoned to him to come with me, and let him know I would give him some clothes; at which he seemed very glad, for he was stark naked. As we went by the place where he had buried the two men, he pointed exactly to the place, and showed me the marks that he had

made to find them again, making signs to me that we should dig them up again, and eat them. At this I appeared very angry, expressed my abhorrence of it, and beckoned with my hand to him to come away; which he did immediately, with great submission. I then led him up to the top of the hill, to see if his enemies were gone; and pulling out my glass, I looked, and saw plainly the place where they had been, but no appearance of them or of their canoes; so that it was plain that they were gone, and had left their two comrades behind them, without any search after them.

I was not content with this discovery, but having now more courage, and consequently more curiosity, I took my man Friday with me, giving him the sword in his hand, with the bow and arrows at his back, which I found he could use very dexterously, making him carry one gun for me, and I two for myself, and away we marched to the place where these creatures had been; for I had a mind now to get some fuller intelligence of them. When I came to the place, my very blood ran chill in my veins, and my heart sank within me, at the horror of the spectacle.

I caused Friday to gather all the skulls, bones, flesh, and whatever remained, and lay them together on a heap, and make a great fire upon it, and burn them all to ashes. I found Friday had still a hankering after some of the flesh, and was still a cannibal in his nature; but I discovered so much abhorrence at the very thoughts of it, and at the least appearance of it, that he durst not discover it; for I had, by some means, let him know that I would kill him if he offered it.

When we had done this we came back to our castle, and there I fell to work for my man Friday; and, first of all, I gave him a pair of linen drawers, which I had out of the poor gunner's chest I mentioned, and which I found

in the wreck; and which, with a little alteration, fitted him very well. Then I made him a jerkin of goat's-skin, as well as my skill would allow, and I was now grown a tolerable good tailor; and I gave him a cap, which I made of a hare-skin, very convenient and fashionable enough; and thus he was clothed for the present tolerably well, and was mighty well pleased to see himself almost as well clothed as his master. It is true he went awkwardly in these things at first; wearing the drawers was very awkward to him, and the sleeves of the waistcoat galled his shoulders, and the inside of his arms; but a little easing them where he complained they hurt him, and using himself to them, at length he took to them very well.

The next day after I came home to my hutch with him, I began to consider where I should lodge him. And that I might do well for him, and yet be perfectly easy myself, I made a little tent for him in the vacant place between my two fortifications, in the inside of the last and in the outside of the first. As there was a door or entrance there into my cave, I made a formal framed door-case, and a door to it of boards, and set it up in the passage, a little within the entrance; and causing the door to open on the inside, I barred it up in the night, taking in my ladders too, so that Friday could no way come at me in the inside of my innermost wall without making so much noise in getting over, that it must needs waken me; for my first wall had now a complete roof over it of long poles, covering all my tent, and leaning up to the side of the hill, which was again laid across with smaller sticks instead of laths, and then thatched over a great thickness with the rice-straw, which was strong, like reeds. At the hole or place which was left to go in or out by the ladder, I had placed a kind of trap-door, which, if it had been attempted on the outside, would not have opened at all, but would

have fallen down, and made a great noise, and as to weapons, I took them all into my side every night.

But I needed none of all this precaution; for never man had a more faithful, loving, sincere servant than Friday was to me; without passions, sullenness, or designs, his very affections were tied to me, like those of a child to a father; and I dare say he would have sacrificed his life for the saving of mine, upon any occasion whatsoever. The many testimonies he gave me of this put it out of doubt, and soon convinced me that I needed to use no precautions as to my safety on his account.

But to return to my new companion. I was greatly delighted with him, and made it my business to teach him everything that was proper to make him useful, handy, and helpful; but especially to make him speak, and understand me when I spoke. He was the aptest scholar that ever was; and particularly was so merry, so constantly diligent, and so pleased when he could but understand me, or make me understand him, that it was very pleasant to me to talk to him. My life now began to be so easy, that I began to say to myself, that could I but have been safe from more savages, I cared not if I was never to remove from the place while I lived.

After I had been two or three days returned to my castle, I took Friday out with me one morning to the woods. I went, indeed, intending to kill a kid out of my own flock, and bring it home and dress it; but as I was going, I saw a she-goat lying down in the shade, and two young kids sitting by her. I caught hold of Friday. "Hold," says I, "stand still," and made signs to him not to stir. Immediately I presented my piece, shot and killed one of the kids. The poor creature, who had, at a distance indeed, seen me kill the savage, his enemy, but did not know, nor could imagine, how it was done, was sensibly surprised, trembled and shook, and looked so amazed, that

I thought he would have sunk down. He did not see the kid I had shot at, or perceive I had killed it, but ripped up his waistcoat to feel if he was not wounded, and, as I found presently, thought I was resolved to kill him; for he came and knelt down to me, and embracing my knees, said a great many things I did not understand; but I could easily see that the meaning was to pray me not to kill him.

I soon found a way to convince him that I would do him no harm, and taking him up by the hand, laughed at him, and pointing to the kid which I had killed, beckoned to him to run and fetch it, which he did; and while he was wondering, and looking to see how the creature was killed, I loaded my gun again. By-and-by I saw a great fowl, like a hawk, sit upon a tree, within shot; so, to let Friday understand a little what I would do, I called him to me again, pointing at the fowl, which was indeed a parrot, though I thought it had been a hawk; I say, pointing to the parrot and to my gun, and to the ground under the parrot, to let him see I would make it fall, I made him understand that I would shoot and kill that bird. Accordingly I fired, and bade him look, and immediately he saw the parrot fall. He stood like one frightened again, notwithstanding all I had said to him; and I found he was the more amazed, because he did not see me put anything into the gun, but thought that there must be some wonderful fund of death and destruction in that thing, able to kill man, beast, bird, or anything near or far off; and the astonishment this created in him was such as could not wear off for a long time. I believe, if I would have let him, he would have worshipped me and my gun. As for the gun itself, he would not so much as touch it for several days after, but would speak to it, and talk to it, as if it had answered him, when he was by himself; which, as I afterwards learned of him, was to desire it not to kill him.

Well, after his astonishment was a little over at this, I pointed to him to run and fetch the bird I had shot, which he did, but stayed some time; for the parrot, not being quite dead, was fluttered a good way off from the place, where she fell. However, he found her, took her up, and brought her to me; and as I had perceived his ignorance about the gun before, I took this advantage to charge the gun again, and not let him see me do it, that I might be ready for any other mark that might present itself. But nothing more offered at that time, so I brought home the kid, and the same evening I took the skin off, and cut it out as well as I could; and having a pot for that purpose, I boiled or stewed some of the flesh, and made some very good broth. After I had begun to eat some, I gave some to my man, who seemed very glad of it, and liked it very well; but that which was strangest to him, was to see me eat salt with it. He made a sign to me that the salt was not good to eat, and putting a little into his own mouth, he would spit and sputter at it, washing his mouth with fresh water after it. On the other hand, I took some meat in my mouth without salt, and pretended to spit and sputter for want of salt, as fast as he had done at the salt. But it would not do; he would never care for salt with his meat or in his broth; at least, not for a great while, and then but a very little.

The next day I set him to work to beating some corn out, and sifting it in the manner I used to do, as I observed before; and he soon understood how to do it as well as I, especially after he had seen what the meaning of it was, and that it was to make bread of. After that I let him see me make my bread, and bake it too, and in a little time Friday was able to do all the work for me, as well as I could do it myself.

I began now to consider that, having two mouths to feed instead of one, I must provide more ground for my

harvest, and plant a larger quantity of corn than I used to do, so I marked out a larger piece of land, and began the fence in the same manner as before, in which Friday not only worked very willingly and very hard, but did it very cheerfully. I told him what it was for; that it was for corn to make more bread, because he was now with me, and that I might have enough for him and myself too. He appeared very sensible of that part, and let me know that he thought I had much more labour upon me on his account, than I had for myself; and that he would work the harder for me, if I would tell him what to do.

This was the pleasantest year of all the life I led in this place. Friday began to talk pretty well, and understand the names of almost everything I had occasion to call for, and of every place I had to send him to, so that, in short, I began now to have some use for my tongue again, which, indeed, I had very little occasion for before, that is to say, about speech. Besides the pleasure of talking to him, I had a singular satisfaction in the fellow himself. His simple, unfeigned honesty appeared to me more and more every day, and I began really to love the creature; and, on his side, I believe he loved me more than it was possible for him ever to have loved anything before.

I had a mind once to try if he had any hankering inclination to his own country again; and having taught him English so well that he could answer me almost any questions, I asked him whether the nation that he belonged to never conquered in battle? At which he smiled, and said, "Yes, yes, we always fight the better;" that is, he meant, always get the better in fight; and so we began the following discourse: "You always fight the better," said I. "How came you to be taken prisoner then, Friday?"

*Friday.* My nation beat much for all that.

*Master.* How beat? If your nation beat them, how came you to be taken?

*Friday.* They more many than my nation in the place where me was; they take one, two, three, and me. My nation overbeat them in the yonder place, where me no was; there my nation take one, two, great thousand.

*Master.* But why did not your side recover you from the hands of your enemies then?

*Friday.* They run one, two, three, and me, and make go in the canoe; my nation have no canoe that time.

*Master.* Well, Friday, and what does your nation do with the men they take? Do they carry them away and eat them, as these did?

*Friday.* Yes, my nation eats mans too; eat all up.

*Master.* Where do they carry them?

*Friday.* Go to other place, where they think.

*Master.* Do they come hither?

*Friday.* Yes, yes, they come hither; come other else place.

*Master.* Have you been here with them?

*Friday.* Yes, I been here. (*Points to the N.W. side of the island which, it seems, was their side.*)

By this I understood that my man Friday had formerly been among the savages who used to come on shore on the farther part of the island, on the same man-eating occasions that he was now brought for; and, some time after, when I took the courage to carry him to that side, being the same I formerly mentioned, he presently knew the place, and told me he was there once when they eat up twenty men, two women, and one child. He could not tell twenty in English, but he numbered them by laying so many stones in a row, and pointing to me to tell them over.

I have told this passage, because it introduces what

follows. After I had had this discourse with him, I asked him how far it was from our island to the shore, and whether the canoes were not often lost. He told me there was no danger, that no canoes were ever lost; but that, after a little way out to the sea, there was a current and a wind, always one way in the morning, the other in the afternoon.

This I understood to be no more than the sets of the tide, as going out or coming in; but I afterwards understood it was occasioned by the great draught and reflux of the mighty river Oroonoko, in the mouth of the gulf of which river, as I found afterwards, our island lay; and this land which I perceived to the W. and N.W. was the great island Trinidad, on the north point of the mouth of the river. I asked Friday a thousand questions about the country, the inhabitants, the sea, the coast, and what nations were near. He told me all he knew, with the greatest openness imaginable. I asked him the names of the several nations of his sort of people, but could get no other name than Caribs; from whence I easily understood that these were the Caribbees, which our maps place on the part of America which reaches from the mouth of the river Oroonoko to Guiana, and onwards to St. Martha. He told me that up a great way beyond the moon, that was, beyond the setting of the moon, which must be W. from their country, there dwelt white-bearded men, like me, and pointed to my great whiskers, which I mentioned before; and that they had killed much mans, that was his word; by all which I understood he meant the Spaniards, whose cruelties in America had been spread over the whole countries, and were remembered by all the nations from father to son.

I inquired if he could tell me how I might come from this island and get among those white men. He told me, "Yes, yes, I might go in two canoe." I could

not understand what he meant, or make him describe to me what he meant by two canoe; till at last, with great difficulty, I found he meant it must be in a large great boat, as big as two canoes.<sup>d</sup>

• This part of Friday's discourse began to relish with me very well; and from this time I entertained some hopes that, at one time or other, I might find an opportunity to make my escape from this place, and that this poor savage might be a means to help me to do it.

After Friday and I became more intimately acquainted, and he could understand almost all I said to him, and speak fluently, though in broken English to me, I acquainted him with my own story, or at least so much of it as related to my coming into the place, how I had lived there, and how long. I let him into the mystery, for such it was to him, of gunpowder and bullet, and taught him how to shoot; I gave him a knife, which he was wonderfully delighted with, and I made him a belt, with a frog hanging to it, such as in England we wear hangers in; and in the frog, instead of a hanger, I gave him a hatchet, which was not only as good as a weapon, in some cases, but much more useful upon other occasions.

I showed him the ruins of our boat, which we lost when we escaped, and which I could not stir with my whole strength then, but was now fallen almost all to pieces. Upon seeing this boat, Friday stood musing a great while, and said nothing. I asked him what it was he studied upon. At last says he, "Me see such boat like come to place at my nation."

I did not understand him a good while, but at last, when I had examined further into it, I understood by him that a boat such as that had been, came on shore upon the country where he lived; that is, as he explained it, was driven thither by stress of weather. I presently imagined that some European ship must have been cast

away upon their coast, and the boat might have got loose and driven ashore; but was so dull, that I never once thought of men making escape from a wreck thither, much less whence they might come; so I only inquired after a description of the boat.

Friday described the boat to me well enough; but made me understand him better when he added with some warmth, "We save the white mans from drown." Then I presently asked him if there were any white mans, as he called them, in the boat. "Yes," he said, "the boat full of white mans." I asked him how many. He told upon his fingers seventeen. I asked him then what became of them. He told me, "They live, they dwell at my nation."

This put new thoughts into my head, for I presently imagined that these might be the men belonging to the ship that was cast away in sight of my island, as I now call it; and who, after the ship was struck on the rock, and they saw her inevitably lost, had saved themselves in their boat, and were landed upon that wild shore among the savages.

Upon this I inquired of him more critically what was become of them. He assured me they lived still there; that they had been there about four years; that the savages let them alone, and gave them victuals to live. I asked him how it came to pass they did not kill them, and eat them. He said, "No, they make brother with them"; that is, as I understood him, a truce; and then he added, "They no eat mans but when make the war fight"; that is to say, they never eat any men but such as come to fight with them and are taken in battle.

It was after this some considerable time, that being on the top of the hill, at the east side of the island, from whence as I have said, I had in a clear day discovered the main continent of America, Friday, the weather being

very serene, looks very earnestly towards the mainland, and, in a kind of surprise, falls a-jumping and dancing, and calls out to me, for I was at some distance from him. I asked him what was the matter? "O joy!" says he, "O glad! there see my country, there my nation!"

I observed an extraordinary sense of pleasure appeared in his face, and his eyes sparkled, and his countenance discovered a strange eagerness, as if he had a mind to be in his own country again.

One day, walking up the same hill, but the weather being hazy at sea, so that we could not see the continent, I called to him, and said, "Friday, do not you wish yourself in your own country, your own nation?" "Yes," he said, "I be much O glad to be at my own nation." "What would you do there?" said I. "Would you turn wild again, eat men's flesh again, and be a savage as you were before?" He looked full of concern, and shaking his head said, "No, no; Friday tell them to live good; tell them to pray God; tell them to eat corn-bread, cattle-flesh, milk, no eat man again." "Why then," said I to him, "they will kill you." He looked grave at that, and then said, "No, they no kill me, they willing love learn." He meant by this they would be willing to learn. He added, they learned much of the bearded mans that came in the boat. Then I asked him if he would go back to them? He smiled at that, and told me he could not swim so far. I told him I would make a canoe for him. He told me he would go, if I would go with him. "I go!" says I; "why, they will eat me if I come there." "No, no," says he, "me make they no eat you; me make they much love you." He meant, he would tell them how I had killed his enemies, and saved his life, and so he would make them love me. Then he told me, as well as he could, how kind they were to seventeen white men, or bearded men, as he called them, who came on shore there in distress.

From this time I confess I had a mind to venture over, and see if I could possibly join with these bearded men, who, I made no doubt, were Spaniards or Portuguese; not doubting but, if I could, we might find some method to escape from thence, being upon the continent, and a good company together, better than I could from an island forty miles off the shore, and alone, without help. So, after some days, I took Friday to work again, by way of discourse, and told him I would give him a boat to go back to his own nation; and accordingly I carried him to my frigate, which lay on the other side of the island, and having cleared it of water, for I always kept it sunk in the water, I brought it out, showed it him, and we both went into it.

I found he was a most dexterous fellow at managing it, and could make it go almost as swift and fast again as I could. So when he was in I said to him, "Well now, Friday, shall we go to your nation?" He looked very dull at my saying so, which, it seems, was because he thought the boat too small to go so far. I told him then I had a bigger; so the next day I went to the place where the first boat lay which I had made, but which I could not get into water. He said that was big enough; but then, as I had taken no care of it, and it had lain two or three and twenty years there, the sun had split and dried it, that it was in a manner rotten. Friday told me such a boat would do very well, and would carry "much enough victual, drink, bread"; that was his way of talking.

Upon the whole, I was by this time so fixed upon my design of going over with him to the continent, that I told him we would go and make one as big as that, and he should go home in it. He answered not one word, but looked very grave and sad. I asked him what was the matter with him? He asked me again thus, "Why you angry mad with Friday? what me done?" I asked him

what he meant. I told him I was not angry with him at all. "No angry! no angry!" says he, repeating the words several times. "Why send Friday home away to my nation?" "Why," says I, "Friday, did you not say you wished you were there?" "Yes, yes," says he, "wish be both there, no wish Friday there, no master there?" In a word, he would not think of going there without me. "I go there, Friday?" says I; "what shall I do there?" He turned very quick upon me at this: "You do great deal much good," says he; "you teach wild mans to be good, sober, tame mans; you tell them know God, pray God, and live new life." "Alas! Friday," says I, "thou knowest not what thou sayest. I am but an ignorant man myself." "Yes, yes," says he, "you teachee me good, you teachee them good." "No, no, Friday," says I, "you shall go without me; leave me here to live by myself, as I did before." He looked confused again at that word, and running to one of the hatchets which he used to wear, he takes it up hastily, comes and gives it me. "What must I do with this?" says I to him. "You take kill Friday," said he. "What must I kill you for?" said I again. He returns very quick, "What you send Friday away for? Take kill Friday, no send Friday away." This he spoke so earnestly, that I saw tears stand in his eyes. In a word, I so plainly discovered the utmost affection in him to me, and a firm resolution in him, that I told him then, and often after, that I would never send him away from me if he was willing to stay with me.

Upon the whole, as I found by all his discourse a settled affection to me, and that nothing should part him from me, so I found that all the foundation of his desire to go to his own country was laid in his ardent affection to the people, and his hopes of my doing them good; a thing which, as I had no notion of myself, so I had not the least thought or intention or desire of undertaking it. But

still I found a strong inclination to my attempting an escape, founded on the supposition gathered from the discourse, viz., that there were seventeen bearded men there; and, therefore, without any more delay I went to work with Friday to find out a great tree proper to fell, and make a large *periagua*, or canoe, to undertake the voyage. There were trees enough in the island to have built a little fleet, not of *periaguas* and canoes, but even of good large vessels. But the main thing I looked at was, to get one so near the water that we might launch it when it was made, to avoid the mistake I committed at first.

At last Friday pitched upon a tree, for I found he knew much better than I what kind of wood was fittest for it; nor can I tell, to this day, what wood to call the tree we cut down, except that it was very like the tree we call fustic, or between that and the Nicaragua wood, for it was much of the same colour and smell. Friday was for burning the hollow or cavity of this tree out, to make it for a boat, but I showed him how rather to cut it out with tools; which, after I had showed him how to use, he did very handily; and in about a month's hard labour we finished it, and made it very handsome; especially when, with our axes, which I showed him how to handle, we cut and hewed the outside into the true shape of a boat. After this, however, it cost us near a fortnight's time to get her along, as it were inch by inch, upon great rollers into the water; but when she was in, she would have carried twenty men with great ease.

When she was in the water, and though she was so big, it amazed me to see with what dexterity, and how swift my man Friday would manage her, turn her, and paddle her along. So I asked him if he would, and if we might venture over in her. "Yes," he said, "he venture over in her very well, though great blow wind." However, I had a farther design that he knew nothing of, and that was to

make a mast and sail, and to fit her with an anchor and cable. As to a mast, that was easy enough to get; so I pitched upon a straight young cedar tree, which I found near the place, and which there was great plenty of in the island; and I set Friday to work to cut it down, and gave him directions how to shape and order it. But as to the sail, that was my particular care. I knew I had old sails, or rather pieces of old sails enough; but as I had had them now twenty-six years by me, and had not been very careful to preserve them, not imagining that I should ever have this kind of use for them, I did not doubt but they were all rotten, and, indeed, most of them were so. However, I found two pieces which appeared pretty good, and with these I went to work, and with a great deal of pains, and awkward tedious stitching for want of needles, I, at length, made a three-corner ugly thing, like what we call in England a shoulder-of-mutton sail, to go with a boom at bottom, and a little short sprit at the top, such as usually our ships' long-boats sail with, and such as I best know how to manage; because it was such a one as I had to the boat in which I made my escape from Barbary, as related in the first part of my story.

I was near two months performing this last work, viz., rigging and fitting my mast and sails; for I finished them very complete, making a small stay, and a sail or foresail, to it, to assist, if we should turn to windward; and, which was more than all, I fixed a rudder to the stern of her to steer with. Though I was but a bungling shipwright, yet as I knew the usefulness, and even necessity, of such a thing, I applied myself with so much pains to do it, that at last I brought it to pass; though, considering the many dull contrivances I had for it that failed, I think it cost me almost as much labour as making the boat.

After all this was done too, I had my man Friday to teach as to what belonged to the navigation of my boat;

for though he knew very well how to paddle a canoe, he knew nothing of what belonged to a sail and a rudder; and was the most amazed when he saw me work the boat to and again in the sea by the rudder, and how the sail jibbed, and filled this way, or that way, as the course we sailed; changed, I say, when he saw this, he stood like one astonished and amazed. However, with a little use I made all these things familiar to him, and he became an expert sailor, except that as to the compass I could make him understand very little of that. On the other hand, as there was very little cloudy weather, and seldom or never any fogs in those parts, there was the less occasion for a compass, seeing the stars were always to be seen by night, and the shore by day, except in the rainy seasons, and then nobody cared to stir abroad, either by land or sea.

I was now entered on the seven and twentieth year of my captivity in this place; though the three last years that I had this creature with me ought rather to be left out of the account, my habitation being quite of another kind than in all the rest of the time. I had an invincible impression upon my thoughts that my deliverance was at hand, and that I should not be another year in this place. However, I went on with my husbandry, digging, planting, fencing, as usual. I gathered and cured my grapes, and did every necessary thing as before.

The rainy season was, in the meantime, upon me, when I kept more within doors than at other times; so I had stowed our new vessel as secure as we could, bringing her up into the creek, where, as I said in the beginning, I landed my rafts from the ship; and hauling her up to the shore at high-water mark, I made my man Friday dig a little dock, just big enough to hold her, and just deep enough to give her water enough to float in. When the tide was out, we made a strong dam across the end of it, to keep the water out, so she lay dry, as to the tide,

from the sea; and to keep the rain off, we laid a great many boughs of trees, so thick, that she was as well thatched as a house; thus we waited for the month of November and December, in which I designed to make my adventure.

When the settled season began to come in, as the thought of my design returned with the fair weather, I was preparing daily for the voyage. The first thing I did was to lay by a certain quantity of provisions, being the stores for our voyage; and intended, in a week or a fortnight's time, to open the dock, and launch out our boat. I was busy one morning upon something of this kind, when I called to Friday, and bade him go to the sea-shore and see if he could find a turtle, or tortoise, a thing which we generally got once a week, for the sake of the eggs as well as the flesh. Friday had not been long gone when he came running back, and flew over my outer wall, or fence, like one that felt not the ground, or the steps he set his feet on; and before I had time to speak to him, he cries out to me, "O master! O master! O sorrow! O bad!" "What's the matter, Friday?" says I. "O yonder, there," says he, "one, two, three canoe! one, two, three!" By his way of speaking, I concluded there were six; but, on inquiry, I found it was but three. "Well, Friday," says I, "do not be frightened." So I heartened him up as well as I could. However, I saw the poor fellow was most terribly scared; for nothing ran in his head but that they were come to look for him, and would cut him in pieces, and eat him; and the poor fellow trembled so, that I scarce knew what to do with him. I comforted him as well as I could, and told him I was in as much danger as he, and that they would eat me as well as him. "But," says I, "Friday, we must resolve to fight them. Can you fight, Friday?" "Me shoot," says he; "but there come many great number." "No matter for

that," said I again; "our guns will frighten them that we do not kill." So I asked him whether, if I resolved to defend him, he would defend me, and stand by me, and do just as I bid him. He said, "Me die when you bid die, master." So I went and fetched a good dram of rum, and gave him; for I had been so good a husband of my rum, that I had a great deal left. When he had drunk it, I made him take the two fowling-pieces, which we always carried, and load them with large swan-shot, as big as small pistol-bullets. Then I took four muskets, and loaded them with two slugs and five small bullets each; my two pistols I loaded with a brace of bullets each. I hung my great sword, as usual, naked by my side, and gave Friday his hatchet.

When I had thus prepared myself, I took my perspective glass, and went up to the side of the hill to see what I could discover. I found quickly, by my glass, that there were one and twenty savages, three prisoners, and three canoes, and that their whole business seemed to be the triumphant banquet upon these three human bodies; a barbarous feast indeed, but nothing more than, as I had observed, was usual with them.

I observed also that they were landed, not where they had done when Friday made his escape, but nearer to my creek, where the shore was low, and where a thick wood came close almost down to the sea. This, with the abhorrence of the inhuman errand these wretches came about, filled me with such indignation, that I came down again to Friday, and told him I was resolved to go down to them, and kill them all, and asked him if he would stand by me. He was now gotten over his fright, and his spirits being a little raised with the dram I had given him, he was very cheerful, and told me, as before, he would die when I bid die.

In this fit of fury, I first divided the arms which I

had changed, as before, between us. I gave Friday one pistol to stick in his girdle, and three guns upon his shoulder; and I took one pistol, and the other three myself, and in this posture we marched out. I took a small bottle of rum in my pocket, and gave Friday a large bag with more powder and bullet; and as to orders, I charged him to keep close behind me, and not to stir, or shoot, or do anything, till I bid him, and in the meantime not to speak a word. In this posture I fetched a compass to my right hand of near a mile, as well to get over the creek as to get into the wood, so that I might come within shot of them before I should be discovered, which I had seen, by my glass, it was easy to do.

While I was making this march, my former thoughts returning, I began to abate my resolution. I do not mean that I entertained any fear of their number; for as they were naked, unarmed wretches, 'tis certain I was superior to them; nay, though I had been alone. But it occurred to my thoughts what call, what occasion, much less what necessity, I was in to go and dip my hands in blood, to attack people who had neither done or intended me any wrong. These things were so warmly pressed upon my thoughts all the way as I went, that I resolved I would only go and place myself near them, that I might observe their barbarous feast, and that I would act then as God should direct; but that, unless something offered that was more a call to me than yet I knew of, I would not meddle with them.

With this resolution I entered the wood, and with all possible wariness and silence, Friday following close at my heels, I marched till I came to the skirt of the wood, on the side which was next to them; only that one corner of the wood lay between me and them. Here I called softly to Friday, and showing him a great tree, which was just at the corner of the wood, I bade him go to the tree

and bring me word if he could see there plainly what they were doing. He did so, and came immediately back to me, and told me they might be plainly viewed there; that they were all about their fire, eating the flesh of one of their prisoners, and that another lay bound upon the sand, a little from them, whom, he said, they would kill next; and, which fired all the very soul within me, he told me it was not one of their nation, but one of the bearded men, whom he had told me of, that came to their country in the boat. I was filled with horror at the very naming the white, bearded man; and going to the tree, I saw plainly, by my glass, a white man, who lay upon the beach of the sea, with his hands and his feet tied with flags, or things like rushes, and that he was an European, and had clothes on.

There was another tree, and a little thicket beyond it, about fifty yards nearer to them than the place where I was, which, by going a little way about, I saw I might come at undiscovered, and that then I should be within half shot of them; so I withheld my passion, though I was indeed enraged to the highest degree; and going back about twenty paces, I got behind some bushes, which held all the way till I came to the other tree; then I came to a little rising ground, which gave me a full view of them, at the distance of about eighty yards.

I had now not a moment to lose, for nineteen of the dreadful wretches sat upon the ground, all close huddled together, and had just sent the other two to butcher the poor Christian, and bring him, perhaps limb by limb, to their fire; and they were stooped down to untie the bands at his feet. I turned to Friday: "Now, Friday," said I, "do as I bid thee." Friday said he would. "Then, Friday," says I, "do exactly as you see me do; fail in nothing." So I set down one of the muskets and the fowling-piece upon the ground, and Friday did the like

by his ; and with the other musket I took my aim at the savages, bidding him do the like. Then asking him if he was ready, he said, "Yes." "Then fire at them," said I ; and the same moment I fired also.

• Friday took his aim so much better than I, that on the side that he shot he killed two of them, and wounded three more ; and on my side I killed one, and wounded two. They were, you may be sure, in a dreadful consternation ; and all of them who were not hurt jumped up upon their feet, but did not immediately know which way to run, or which way to look, for they knew not from whence their destruction came. Friday kept his eyes close upon me, that, as I had bid him, he might observe what I did ; so as soon as the first shot was made I threw down the piece, and took up the fowling-piece, and Friday did the like. "Are you ready, Friday?" said I. "Yes," says he. "Let fly, then," says I, "in the name of God!" and with that I fired again among the amazed wretches, and so did Friday ; and as our pieces were now loaded with what I called swan-shot, or small pistol-bullets, we found only two drop, but so many were wounded, that they ran about yelling and screaming like mad creatures, all bloody, and miserably wounded most of them ; whereof three more fell quickly after, though not quite dead.

"Now, Friday," says I, laying down the discharged pieces, and taking up the musket which was yet loaded, "follow me," says I, which he did with a great deal of courage ; upon which I rushed out of the wood, and showed myself, and Friday close at my feet. As soon as I perceived they saw me, I shouted as loud as I could, and bade Friday do so too ; and running as fast as I could, which, by the way, was not very fast, being laden with arms as I was, I made directly towards the poor victim, who was, as I said, lying upon the beach, or shore, between the place where they sat and the sea. The two butchers,

who were just going to work with him, had left him at the surprise of our first fire, and fled in a terrible fright to the seaside, and had jumped into a canoe, and three more of the rest made the same way. I turned to Friday, and bade him step forwards and fire at them. He understood me immediately, and running about forty yards, to be near them, he shot at them, and I thought he had killed them all, for I saw them all fall of a heap into the boat; though I saw two of them up again quickly. However, he killed two of them and wounded the third, so that he lay down in the bottom of the boat as if he had been dead.

While my man Friday fired at them, I pulled out my knife and cut the flags that bound the poor victim; and loosing his hands and feet, I lifted him up, and asked him in the Portuguese tongue what he was. He answered in Latin, *Christianus*; but was so weak and faint that he could scarce stand or speak. I took my bottle out of my pocket and gave it him, making signs that he should drink, which he did; and I gave him a piece of bread, which he ate. Then I asked him what countryman he was and he said, *Espagnole*; and being a little recovered, let me know, by all the signs he could possibly make, how much he was in my debt for his deliverance. "Seignior," said I, with as much Spanish as I could make up, "we will talk afterwards, but we must fight now. If you have any strength left, take this pistol and sword, and lay about you." He took them very thankfully, and no sooner had he the arms in his hands but, as if they had put new vigour into him, he flew upon his murderers like a fury, and had cut two of them in pieces in an instant; for the truth is, as the whole was a surprise to them, so the poor creatures were so much frightened with the noise of our pieces, that they fell down for mere amazement and fear, and had no more power to attempt their own escape, than

their flesh had to resist our shot; and that was the case of those five that Friday shot at in the boat, for as three of them fell with the hurt they received, so the other two fell with the fright.

• I kept my piece in my hand still without firing, being willing to keep my charge ready, because I had given the Spaniard my pistol and sword. So I called to Friday, and bade him run up to the tree from whence we first fired, and fetch the arms which lay there that had been discharged, which he did with great swiftness; and then giving him my musket, I sat down myself to load all the rest again, and bade them come to me when they wanted. While I was loading these pieces, there happened a fierce engagement between the Spaniard and one of the savages, who made at him with one of their great wooden swords, the same weapon that was to have killed him if I had not prevented it. The Spaniard, who was as bold and as brave as could be imagined, though weak, had fought this Indian a good while, and had cut him two great wounds on his head; but the savage being a stout, lusty fellow, closing in with him, had thrown him down, being faint, and was wringing my sword out of his hand, when the Spaniard, though undermost, wisely quitting the sword, drew the pistol from his girdle, shot the savage through the body, and killed him upon the spot, before I, who was running to help, could come near him.

Friday being now left to his liberty, pursued the flying wretches with no weapon in his hand but his hatchet; and with that he despatched those three who, as I said before, were wounded at first, and fallen, and all the rest he could come up with. The Spaniard coming to me for a gun, I gave him one of the fowling-pieces, with which he pursued two of the savages, and wounded them both; but as he was not able to run, they both got from him into the wood, where Friday pursued them, and killed one of

them. The other was too nimble for him, and though he was wounded, yet he plunged into the sea and swam with all his might off to those two who were left in the canoe; and these three in the canoe, with ~~one~~ <sup>one</sup> wounded, who we know not whether he died or no, were all, that escaped our hands of one and twenty.

Those that were in the canoe worked hard to get out of gun-shot; and though Friday made two or three shots at them, I did not find that he hit any of them. Friday would fain have had me take one of their canoes, and pursued them; and, indeed, I was very anxious about their escape, lest carrying the news home to their people they should come back perhaps with two or three hundred of their canoes, and devour us by mere multitude. So I consented to pursue them by sea, and running to one of their canoes I jumped in, and bade Friday follow me. But when I was in the canoe, I was surprised to find another poor creature lie there alive, bound hand and foot, as the Spaniard was, for the slaughter, and almost dead with fear, not knowing what the matter was; for he had not been able to look up over the side of the boat, he was tied so hard, neck and heels, and had been tied so long, that he had really but little life in him.

I immediately cut the twisted flags or rushes, which they had bound him with, and would have helped him up; but he could not stand or speak, but groaned most piteously, believing, it seems, still that he was only unbound in order to be killed.

When Friday came to him, I bade him speak to him, and tell him of his deliverance, and pulling out my bottle, made him give the poor wretch a dram; which, with the news of his being delivered, revived him, and he sat up in the boat. But when Friday came to hear him speak, and look in his face, it would have moved any one to tears to have seen how Friday kissed him, embraced

him, hugged him, cried, laughed, hallooed, jumped about, danced, sang; then cried again, wrung his hands, beat his own face and head, and then sang and jumped about again, like a distracted creature. It was a good while before I could make him speak to me, or tell me what was the matter, but when he came a little to himself, he told me that it was his father.

It is not easy for me to express how it moved me to see what ecstasy and filial affection had worked in this poor savage at the sight of his father, and of his being delivered from death; nor, indeed, can I describe half the extravagancies of his affection after this, for he went into the boat, and out of the boat, a great many times. When he went in to him, he would sit down by him, open his breast, and hold his father's head close to his bosom, half-an-hour together, to nourish it; then he took his arms and ankles, which were numbed and stiff with the binding, and chafed and rubbed them with his hands; and I, perceiving what the case was, gave him some rum out of my bottle to rub them with, which did them a great deal of good.

This action put an end to our pursuit of the canoe with the other savages, who were now almost out of sight. It was happy for us that we did not, for it blew so hard within two hours after, and before they could have got a quarter of their way, and continued blowing so hard all night, and that from the north-west, which was against them, that I could not suppose their boat could live, or that they ever reached their own coast.

But to return to Friday. He was so busy about his father, that I could not find it in my heart to take him off for some time; but after I thought he could leave him a little, I called him to me, and he came jumping and laughing, and pleased to the highest extreme. Then I asked him if he had given his father any bread. He shook his

head, and said, "None, ugly dog eat all up self." So I gave him a cake of bread out of a little pouch I carried on purpose. I also gave him a dram for himself, but he would not taste it, but carried it to his father. I had in my pocket also two or three punches of my raisins, so I gave him a handful of them for his father. He had no sooner given his father these raisins, but I saw him come out of the boat and run away, as if he had been bewitched, he ran at such a rate; for he was the swiftest fellow of his foot that ever I saw. I say, he ran at such a rate, that he was out of sight, as it were, in an instant; and though I called, and hallooed too, after him, it was all one, away he went. In a quarter of an hour I saw him come back again, though not so fast as he went; and as he came nearer I found his pace was slacker, because he had something in his hand.

When he came up to me, I found he had been quite home for an earthen jug, or pot, to bring his father some fresh water, and that he had got two more cakes or loaves of bread. The bread he gave me, but the water he carried to his father. However, as I was very thirsty too, I took a little sup of it. This water revived his father more than all the rum or spirits I had given him, for he was just fainting with thirst.

When his father had drunk, I called him to know if there was any water left. He said "Yes;" and I bade him give it to the poor Spaniard, who was in as much want of it as his father; and I sent one of the cakes, that Friday brought, to the Spaniard too, who was indeed very weak, and was reposing himself upon a green place under the shade of a tree; and whose limbs were also very stiff, and very much swollen with the rude bandage he had been tied with. When I saw that upon Friday's coming to him with the water he sat up and drank, and took the bread, and began to eat, I went to him, and gave him a

handful of raisins. He looked up in my face with all the tokens of gratitude and thankfulness that could appear in any countenance; but he was so weak, notwithstanding he had so exerted himself in the fight, that he could not stand upon his feet. He tried to do it two or three times, but was really not able, his ankles were so swollen and so painful to him; so I bade him sit still, and caused Friday to rub his ankles, and bathe them with rum, as he had done his father's.

I observed the poor affectionate creature, every two minutes, or perhaps less, all the while he was here, turn his head about to see if his father was in the same place and posture as he left him sitting, and at last he found he was not to be seen; at which he started up, and without speaking a word, flew with that swiftness to him, that one could scarce perceive his feet to touch the ground as he went. But when he came, he only found he had laid himself down to ease his limbs; so Friday came back to me presently, and I then spoke to the Spaniard to let Friday help him up, if he could, and lead him to the boat, and then he should carry him to our dwelling, where I would take care of him. But Friday, a lusty strong fellow, took the Spaniard quite up upon his back, and carried him away to the boat, and set him down softly upon the side of the canoe, with his feet in the inside of it, and then lifted him quite in, and set him close to his father; and presently stepping out again, launched the boat off, and paddled it along the shore faster than I could walk, though the wind blew pretty hard too. So he brought them both safe into our creek, and leaving them in the boat, ran away to fetch the other canoe. As he passed me, I spoke to him, and asked him whither he went. He told me, "Go fetch more boat." So away he went like the wind, for sure never man or horse ran like him, and he had the other canoe in the creek almost as

soon as I got to it by land; so he wafted me over, and then went to help our new guests out of the boat, but they were neither of them able to walk, so that poor Friday knew not what to do.

To remedy this I went to work in my thought, and calling to Friday to bid them sit down on the bank while he came to me, I soon made a kind of hand-barrow to lay them on, and Friday and I carried them up both together upon it between us. But when we got them to the outside of our wall, or fortification, we were at a worse loss than before, for it was impossible to get them over, and I was resolved not to break it down. So I set to work again, and Friday and I, in about two hours' time, made a very handsome tent, covered with old sails, and above that with boughs of trees, being in the space without our outward fence, and between that and the grove of young wood which I had planted; and here we made them two beds of such things as I had, viz., of good rice-straw, with blankets laid upon it to lie on, and another to cover them, on each bed.

As soon as I had secured my two weak rescued prisoners, and given them shelter and a place to rest them upon, I began to think of making some provision for them; and the first thing I did, I ordered Friday to take a yearling goat, betwixt a kid and a goat, out of my particular flock, to be killed. I cut off the hindquarter, and chopping it into small pieces, I set Friday to work to boiling and stewing, and made them a very good dish, I assure you, of flesh and broth, having put some barley and rice also into the broth; and as I cooked it without doors, for I made no fire within my inner wall, so I carried it all into the new tent, and having set a table there for them, I sat down and ate my own dinner also with them, and as well as I could cheered them, and encouraged them; Friday was my interpreter, especially

to his father, and, indeed, to the Spaniard too; for the Spaniard spoke the language of the savages pretty well.

I then began to enter into a little conversation with my two new subjects; and first, I set Friday to inquire of his father what he thought of the escape of the savages in that canoe, and whether we might expect a return of them, with a power too great for us to resist. His first opinion was, that the savages in the boat never could live out the storm which blew that night they went off, but must, of necessity, be drowned or driven south to those other shores, where they were as sure to be devoured as they were to be drowned if they were cast away. But as to what they would do if they came safe on shore, he said he knew not; but it was his opinion that they were so dreadfully frightened with the manner of their being attacked, the noise, and the fire, that he believed they would tell their people they were all killed by thunder and lightning, not by the hand of man; and that the two which appeared, viz., Friday and me, were two heavenly spirits, or furies, come down to destroy them, and not men with weapons. This, he said, he knew, because he heard them all cry out so in their language to one another; for it was impossible to them to conceive that a man could dart fire, and speak thunder, and kill at a distance without lifting up the hand, as was done now. And this old savage was in the right; for, as I understood since by other hands, the savages never attempted to go over to the island afterwards. They were so terrified with the accounts given by those four men (for, it seems, they did escape the sea), that they believed whoever went to that enchanted island would be destroyed with fire from the gods.

This, however, I knew not, and therefore was under continual apprehensions for a good while, and kept always upon my guard, me and all my army; for as we were now

four of us, I would have ventured upon a hundred of them, fairly in the open field, at any time.

In a little time, however, no more canoes appearing, the fear of their coming wore off, and I began to take my former thoughts of a voyage to the main into consideration; being likewise assured, by Friday's father, that I might depend upon good usage from their nation, on his account, if I would go.

But my thoughts were a little suspended when I had a serious discourse with the Spaniard, and when I understood that there were sixteen more of his countrymen and Portuguese who, having been cast away, and made their escape to that side, lived there at peace, indeed, with the savages, but were very sore put to it for necessaries, and indeed for life. I asked him all the particulars of their voyage, and found they were a Spanish ship bound from the Río de la Plata to the Havana, being directed to leave their loading there, which was chiefly hides and silver, and to bring back what European goods they could meet with there; that they had five Portuguese seamen on board, whom they took out of another wreck; that five of their own men were drowned when the first ship was lost, and that these escaped, through infinite dangers and hazards, and arrived, almost starved, on the cannibal coast, where they expected to have been devoured every moment.

He told me they had some arms with them, but they were perfectly useless, for that they had neither powder or ball, the washing of the sea having spoiled all their powder but a little, which they used, at their first landing, to provide themselves some food.

I asked him what he thought would become of them there, and if they had formed any design of making an escape? He said they had many consultations about it; but that having neither vessel, or tools to build one, or

provisions of any kind, their councils always ended in tears and despair.

I asked him how he thought they would receive a proposal from me, which might tend towards an escape; and whether, if they were all here, it might not be done? I told him with freedom; I feared mostly their treachery and ill-usage of me if I put my life in their hands; for that gratitude was no inherent virtue in the nature of man, nor did men always square their dealings by the obligations they had received, so much as they did by the advantages they expected. I told him it would be very hard that I should be the instrument of their deliverance, and that they should afterwards take me as their prisoner to New Spain, or that they should, when I had put weapons into their hands, carry me by force among their own people, where I might be ill-used for my kindness to them, and make my case worse than it was before.

He answered, with a great deal of candour and ingenuity, that their condition was so miserable, and they were so sensible of it, that he believed they would abhor the thought of using any man unkindly that should contribute to their deliverance.

He told me they were all of them very civil, honest men, and they were under the greatest distress imaginable, having neither weapons or clothes, or any food, but at the mercy and discretion of the savages; out of all hopes of ever returning to their own country; and that he was sure, if I would undertake their relief, they would live and die by me.

Upon these assurances I resolved to venture to relieve them, if possible, and to send the old savage and this Spaniard over to them to treat. But when we had got all things in readiness to go, the Spaniard himself started an objection, which had so much prudence in it on one hand, and so much sincerity on the other hand, that I could

not but be very well satisfied in it, and by his advice put off the deliverance of his comrades for at least half a year. The case was thus.

He had been with us now about a month, during which time I had let him see in what manner I had provided, with the assistance of Providence, for my support; and he saw evidently what stock of corn and rice I had made up; which, as it was more than sufficient for myself, so it was not sufficient, at least without good husbandry, for my family, now it was increased to four; but much less would it be sufficient if his countrymen, who were, as he said, fourteen, still alive, should come over; and least of all would it be sufficient to victual our vessel, if we should build one, for a voyage to any of the Christian colonies of America. So he told me he thought it would be more advisable to let him and the two others dig and cultivate some more land, as much as I could spare seed to sow; and that we should wait another harvest, that we might have a supply of corn for his countrymen when they should come, for want might be a temptation to them to disagree, or not to think themselves delivered, otherwise than out of one difficulty into another.

His caution was so seasonable, and his advice so good, that I could not but be very well pleased with his proposal, as well as I was satisfied with his fidelity. So we fell to digging all four of us, as well as the wooden tools we were furnished with permitted; and in about a month's time, by the end of which it was seed-time, we had got so much land cured and trimmed up that we sowed twenty-two bushels of barley, and sixteen jars of rice; which was, in short, all the seed we had to spare; nor, indeed, did we leave ourselves barely sufficient for our own food for the six months that we had to expect our crop; that is to say, reckoning from the time we set our seed aside

for sowing; for it is not to be supposed it is six months in the ground in that country.

Having now society enough, and our number being sufficient to put us out of fear of the savages, if they had come, unless their number had been very great, we went freely all over the island, wherever we found occasion; and as here we had our escape or deliverance upon our thoughts, it was impossible, at least for me, to have the means of it out of mine. To this purpose I marked out several trees which I thought fit for our work, and I set Friday and his father to cutting them down; and then I caused the Spaniard, to whom I imparted my thought on that affair, to oversee and direct their work. I showed them with what indefatigable pains I had hewed a large tree into single planks, and I caused them to do the like, till they had made about a dozen large planks of good oak, near two feet broad, thirty-five feet long, and from two inches to four inches thick. What prodigious labour it took up, any one may imagine.

At the same time, I contrived to increase my little flock of tame goats as much as I could; and to this purpose I made Friday and the Spaniard go out one day, and myself with Friday the next day, for we took our turns, and by this means we got above twenty young kids to breed up with the rest; for whenever we shot the dam, we saved the kids, and added them to our flock. But above all, the season for curing the grapes coming on, I caused such a prodigious quantity to be hung up in the sun, that I believe, had we been at Alicant, where the raisins of the sun are cured, we could have filled sixty or eighty barrels; and these, with our bread, was a great part of our food, and very good living too, I assure you; for it is an exceeding nourishing food.

It was now harvest, and our crop in good order. It was not the most plentiful increase I had seen in the

island, but, however, it was enough to answer our end; for from our twenty-two bushels of barley we brought in and thrashed out above two hundred and twenty bushels, and the like in proportion of the rice; which was store enough for our food to the next harvest, though all the sixteen Spaniards had been on shore with me; or if we had been ready for a voyage, it would very plentifully have victualled our ship to have carried us to any part of the world, that is to say, of America.

When we had thus housed and secured our magazine of corn, we fell to work to make more wicker-work, viz., great baskets, in which we kept it. The Spaniard was very handy and dexterous at this part, and often blamed me that I did not make some things for defence of this kind of work but I saw no need of it.

And now having a full supply of food for all the guests I expected, I gave the Spaniard leave to go over to the main, to see what he could do with those he had left behind him there. I gave him a strict charge in writing not to bring any man with him who would not first swear, in the presence of himself and of the old savage, that he would in no way injure, fight with, or attack the person he should find in the island, who was so kind to send for them in order to their deliverance; but that they would stand by and defend him against all such attempts, and wherever they went would be entirely under and subjected to his commands; and that this should be put in writing, and signed with their hands. How we were to have this done, when I knew they had neither pen or ink, that indeed was a question which we never asked.

Under these instructions, the Spaniard and the old savage, the father of Friday, went away in one of the canoes which they might be said to have come in, or rather were brought in, when they came as prisoners to be devoured by the savages.

I gave each of them a musket, with a firelock on it, and about eight charges of powder and ball, charging them to be very good husbands of both, and not to use either of them but upon urgent cases.

• This was a cheerful work, being the first measures used by me, in view of my deliverance, for now twenty-seven years and some days. I gave them provisions of bread and of dried grapes sufficient for themselves for many days, and sufficient for all their countrymen for about eight days' time; and wishing them a good voyage, I saw them go, agreeing with them about a signal they should hang out at their return, by which I should know them again, when they came back, at a distance, before they came on shore.

They went away with a fair gale on the day that the moon was at full, by my account in the month of October; but as for an exact reckoning of days, after I had once lost it, I could never recover it again; nor had I kept even the number of years so punctually as to be sure that I was right, though as it proved, when I afterwards examined my account, I found I had kept a true reckoning of years.

It was no less than eight days I had waited for them, when a strange and unforeseen accident intervened, of which the like has not perhaps been heard of in history. I was fast asleep in my hutch one morning, when my man Friday came running in to me, and called aloud, "Master, master, they are come, they are come!"

I jumped up, and, regardless of danger, I went out as soon as I could get my clothes on, through my little grove, which, by the way, was by this time grown to be a very thick wood; I say, regardless of danger, I went without my arms, which was not my custom to do; but I was surprised when, turning my eyes to the sea, I presently saw a boat at about a league and a half's distance standing

in for the shore, with a shoulder-of-mutton sail; as they call it, and the wind blowing pretty fair to bring them in; also I observed presently that they did not come from that side which the shore lay on, but from the southernmost end of the island. Upon this I called Friday in, and bade him lie close, for these were not the people we looked for, and that we might not know yet whether they were friends or enemies.

In the next place, I went in to fetch my perspective glass, to see what I could make of them; and having taken the ladder out, I climbed up to the top of the hill, as I used to do when I was apprehensive of anything, and to take my view the plainer without being discovered.

I had scarce set my foot on the hill, when my eye plainly discovered a ship lying at an anchor at about two leagues and a half's distance from me, south-south-east, but not above a league and a half from the shore. By my observation, it appeared plainly to be an English ship. and the boat appeared to be an English long-boat.

I cannot express the confusion I was in; though the joy of seeing a ship, and one that I had reason to believe was manned by my own countrymen and consequently friends, was such as I cannot describe. But yet I had some secret doubts hung about me, I cannot tell from whence they came, bidding me keep upon my guard. In the first place, it occurred to me to consider what business an English ship could have in that part of the world, since it was not the way to or from any part of the world where the English had any traffic. I knew there had been no storms to drive them in there as in distress; and that if they were English really, it was most probable that they were here upon no good design; and that I had better continue as I was, than fall into the hands of thieves and murderers.

I had not kept myself long in this posture, when I saw

the boat draw near the shore, as if they looked for a creek to thrust in at, for the convenience of landing. However, as they did not come quite far enough, they did not see the little inlet where I formerly landed my rafts, but ran their boat on shore upon the beach, at about half a mile from me, which was very happy for me; for otherwise they would have landed just, as I may say, at my door, and would soon have beaten me out of my castle, and perhaps have plundered me of all I had.

When they were on shore, I was fully satisfied that they were Englishmen, at least most of them; one or two I thought were Dutch, but it did not prove so. There were in all eleven men, whereof three of them I found were unarmed and, as I thought, bound; and when the first four or five of them had jumped on shore, they took those three out of the boat, as prisoners. One of the three I could perceive using the most passionate gestures of entreaty, affliction, and despair, even to a kind of extravagance; and the other two, I could perceive, lifted up their hands sometimes, and appeared concerned indeed, but not to such a degree as the first.

I was perfectly confounded at the sight, and knew not what the meaning of it should be. Friday called out to me in English as well as he could, "O master! you see English mans eat prisoner as well as savage mans." "Why," says I, "Friday, do you think they are a-going to eat them then?" "Yes," says Friday, "they will eat them." "No, no," says I, "Friday, I am afraid they will murder them indeed, but you may be sure they will not eat them."

All this while I had no thought of what the matter really was, but stood trembling with the horror of the sight, expecting every moment when the three prisoners should be killed; nay, once I saw one of the villains lift up his arm with a great cutlass, as the seamen call it, or

sword, to strike one of the poor men; and I expected to see him fall every moment, at which all the blood in my body seemed to run chill in my veins.

I wished heartily now for my Spaniard, and the savage that was gone with him; or that I had any way to have come undiscovered within shot of them, that I might have rescued the three men, for I saw no firearms among them; but it fell out to my mind another way.

After I had observed the outrageous usage of the three men by the insolent seamen, I observed the fellows run scattering about the land, as if they wanted to see the country, and I saw that the three other men had liberty to go also where they pleased; but they sat down all three upon the ground, very pensive, and looked like men in despair.

It was just at the top of high-water when these people came on shore, and while partly they stood parleying with the prisoners they brought, and partly while they rambled about to see what kind of a place they were in, they had carelessly stayed till the tide was spent, and the water was ebbed considerably away, leaving their boat aground.

They had left two men in the boat, who, as I found afterwards, having drunk a little too much brandy, fell asleep. However, one of them waking sooner than the other, and finding the boat too fast aground for him to stir it, hallooed for the rest, who were straggling about, upon which they all soon came to the boat; but it was past all their strength to launch her, the boat being very heavy, and the shore on that side being a soft oozy sand, almost like a quicksand.

In this condition, like true seamen, who are perhaps the least of all mankind given to forethought, they gave it over, and away they strolled about the country again; and I heard one of them say aloud to another, calling them off

from the boat, "Why, let her alone, Jack, can't ye? she will float next tide;" by which I was fully confirmed in the main inquiry of what countrymen they were.

All this while I kept myself very close, not once daring to stir, out of my castle any, farther than to my place of observation near the top of the hill; and very glad I was to think how well it was fortified. I knew it was no less than ten hours before the boat could be afloat again. By that time it would be dark, and I might be at more liberty to see their motions, and to hear their discourse, if they had any.

In the meantime, I fitted myself up for a battle, as before, though with more caution, knowing I had to do with another kind of enemy than I had at first. I ordered Friday also, whom I had made an excellent marksman with his gun, to load himself with arms. I took myself two fowling-pieces, and I gave him three muskets. My figure, indeed, was very fierce. I had my formidable goat-skin coat on, with the great cap I have mentioned, a naked sword by my side, two pistols in my belt, and a gun upon each shoulder.

It was my design, as I said above, not to have made any attempt till it was dark; but about two o'clock, being the heat of the day, I found that they were all gone straggling into the woods, and, as I thought, were laid down to sleep. The three poor distressed men, too anxious for their condition to get any sleep, were, however, set down under the shelter of a great tree, at about a quarter of a mile from me, and, as I thought, out of sight of any of the rest.

Upon this I resolved to discover myself to them, and learn something of their condition. Immediately I marched in the figure as above, my man Friday at a good distance behind me, as formidable for his arms as I, but not making quite so staring a spectre-like figure as I did.

I came as near them undiscovered as I could; and then, before any of them saw me, I called aloud to them in Spanish, "What are ye, gentlemen?"

They started up at the noise, but were ten times more confounded when they saw me, and the uncouth figure that I made. They made no answer at all, but I thought I perceived them just going to fly from me, when I spoke to them in English. "Gentlemen," said I, "do not be surprised at me; perhaps you may have a friend near you, when you did not expect it." "He must be sent directly from heaven, then," said one of them very gravely to me, and pulling off his hat at the same time to me, "for our condition is past the help of man." "All help is from heaven, sir," said I. "But can you put a stranger in the way how to help you, for you seem to be in some great distress? I saw you when you landed, and when you seemed to make applications to the brutes that came with you, I saw one of them lift up his sword to kill you."

The poor man, with tears running down his face, and trembling, looking like one astonished, returned, "Am I talking to God, or man? Is it a real man, or an angel?" "Be in no fear about that, sir," said I. "If God had sent an angel to relieve you, he would have come better clothed, and armed after another manner than you see me in. Pray lay aside your fears; I am a man, an Englishman, and disposed to assist you, you see. I have one servant only; we have arms and ammunition; tell us freely, can we serve you? What is your case?"

"Our case," said he, "sir, is too long to tell you while our murderers are so near; but in short, sir, I was commander of that ship; my men have mutinied against me, and they have been hardly prevailed on not to murder me; and at last have set me on shore in this desolate place, with these two men with me, one my mate, the other a passenger, where we expected to perish, believing

"IS IT A REAL MAN, OR AN ANGEL?"

the place to be uninhabited, and know not yet what to think of it."

"Where are those brutes, your enemies?" said I. "Do you know where they are gone?" "There they lie, sir," said he, pointing to a thicket of trees. "My heart trembles for fear they have seen us, and heard you speak. If they have, they will certainly murder us all."

"Have they any firearms?" said I. He answered, they had only two pieces, and one which they left in the boat. "Well then," said I, "leave the rest to me; I see they are all asleep; it is an easy thing to kill them all; but shall we rather take them prisoners?" He told me there were two desperate villains among them that it was scarce safe to show any mercy to; but if they were secured, he believed all the rest would return to their duty. I asked him which they were. He told me he could not at that distance describe them, but he would obey my orders in anything I would direct. "Well," said I, "let us retreat out of their view or hearing, lest they awake, and we will resolve further." So they willingly went back with me, till the woods covered us from them.

"Look you, sir," said I, "if I venture upon your deliverance, are you willing to make two conditions with me?" He anticipated my proposals, by telling me that both he and the ship, if recovered, should be wholly directed and commanded by me in everything; and if the ship was not recovered, he would live and die with me in what part of the world soever I would send him; and the two other men said the same.

"Well," said I, "my conditions are but two. 1. That while you stay on this island with me, you will not pretend to any authority here; and if I put arms into your hands, you will, upon all occasions, give them up to me, and do no prejudice to me or mine upon this island; and in the meantime, be governed by my orders.

2. That if the ship is, or may be, recovered, you will carry me and my man to England, passage free."

He gave me all the assurances that the invention and faith of man could devise that he would comply with these most reasonable demands; and, besides, would owe his life to me, and acknowledge it upon all occasions, as long as he lived.

"Well then," said I, "here are three muskets for you, with powder and ball; tell me next what you think is proper to be done." He showed all the testimony of his gratitude that he was able, but offered to be wholly guided by me. I told him I thought it was hard venturing anything; but the best method I could think of was to fire upon them at once as they lay; and if any was not killed at the first volley, and offered to submit, we might save them, and so put it wholly upon God's providence to direct the shot.

He said very modestly that he was loth to kill them, if he could help it; but that those two were incorrigible villains, and had been the authors of all the mutiny in the ship, and if they escaped, we should be undone still; for they would go on board and bring the whole ship's company, and destroy us all. "Well then," says I, "necessity legitimates my advice, for it is the only way to save our lives." However, seeing him still cautious of shedding blood, I told him they should go themselves, and manage as they found convenient.

In the middle of this discourse we heard some of them awake, and soon after we saw two of them on their feet. I asked him if either of them were of the men who he had said were the heads of the mutiny. He said, "No." "Well then," said I, "you may let them escape; and Providence seems to have wakened them on purpose to save themselves. Now," says I, "if the rest escape you, it is your fault."

Animated with this, he took the musket I had given him in his hand, and a pistol in his belt, and his two comrades with him, with each man a piece in his hand. The two men who were with him going first made some noise, at which one of the seamen who was awake turned about, and seeing them coming cried out to the rest; but it was too late then, for the moment he cried out they fired; I mean the two men, the captain wisely reserving his own piece. They had so well aimed their shot at the men they knew, that one of them was killed on the spot, and the other very much wounded; but not being dead, he started up upon his feet, and called eagerly for help to the other. But the captain stepping to him, told him 'twas too late to cry for help, he should call upon God to forgive his villainy; and with that word knocked him down with the stock of his musket, so that he never spoke more. There were three more in the company, and one of them was also slightly wounded. By this time I was come; and when they saw their danger, and that it was in vain to resist, they begged for mercy. The captain told them he would spare their lives if they would give him any assurance of their abhorrence of the treachery they had been guilty of, and would swear to be faithful to him in recovering the ship, and afterwards in carrying her back to Jamaica, from whence they came. They gave him all the protestations of their sincerity that could be desired, and he was willing to believe them, and spare their lives, which I was not against, only I obliged him to keep them bound hand and foot while they were upon the island.

While this was doing, I sent Friday with the captain's mate to the boat, with orders to secure her, and bring away the oars and sail, which they did; and by-and-by three straggling men, that were (happily for them) parted from the rest, came back upon hearing the guns fired; and seeing their captain, who before was their prisoner, now

their conqueror, they submitted to be bound also, and so our victory was complete.

It now remained that the captain and I should inquire into one another's circumstances. I began first, and told him my whole history, which he heard with an attention even to amazement; and particularly at the wonderful manner of my being furnished with provisions and ammunition; and, indeed, as my story is a whole collection of wonders, it affected him deeply. But when he reflected from thence upon himself, and how I seemed to have been preserved there on purpose to save his life, the tears ran down his face, and he could not speak a word more.

After this communication was at an end, I carried him and his two men into my apartment, leading them in just where I came out, viz., at the top of the house, where I refreshed them with such provisions as I had, and showed them all the contrivances I had made during my long, long inhabiting that place.

All I showed them, all I said to them was perfectly amazing; but above all, the captain admired my fortification, and how perfectly I had concealed my retreat with a grove of trees, which, having been now planted near twenty years, and the trees growing much faster than in England, was become a little wood, and so thick, that it was unpassable in any part of it but at that one side where I had reserved my little winding passage into it. I told him this was my castle and my residence, but that I had a seat in the country, as most princes have, whither I could retreat upon occasion, and I would show him that too another time; but at present, our business was to consider how to recover the ship. He agreed with me as to that, but told me he was perfectly at a loss what measures to take, for that there were still six and twenty hands on board, who having entered into a cursed conspiracy, by which they had all forfeited their lives to the law, would

be hardened in it now by desperation, and would carry it on, knowing that if they were reduced, they would be brought to the gallows as soon as they came to England, or to any of the English colonies; and that therefore there would be no attacking them with so small a number as we were.

I mused for some time upon what he said, and found it was a very rational conclusion, and that therefore something was to be resolved on very speedily, as well to draw the men on board into some snare for their surprise, as to prevent their landing upon us, and destroying us. Upon this it presently occurred to me that in a little while the ship's crew, wondering what was become of their comrades, and of the boat, would certainly come on shore in their other boat to see for them; and that then, perhaps, they might come armed, and be too strong for us. This he allowed was rational.

Upon this, I told him the first thing we had to do was to stave the boat, which lay upon the beach, so that they might not carry her off; and taking everything out of her, leave her so far useless as not to be fit to swim. Accordingly we went on board, took the arms which were left out of her, and whatever else we found there, which was a bottle of brandy, and another of rum, a few biscuit-cakes, a horn of powder, and a great lump of sugar in a piece of canvas—the sugar was five or six pounds; all which was very welcome to me, especially the brandy and sugar, of which I had had none left for many years.

When we had carried all these things on shore (the oars, mast, sail, and rudder of the boat were carried away before, as above), we knocked a great hole in her bottom, that if they had come strong enough to master us, yet they could not carry off the boat.

Indeed, it was not much in my thoughts that we could be able to recover the ship; but my view was, that if they

"TAKING EVERYTHING OUT OF HER, LEAVE HER SO FAR USELESS  
AS NOT TO BE FIT TO SWIM,"

went away without the boat, I did not much question to make her fit again to carry us away to the Leeward Islands, and call upon our friends the Spaniards in my way ; for I had them still in my thoughts. "

While we were thus preparing our designs, and had first, by main strength, heaved the boat up upon the beach so high that the tide would not fleet her off at high-water mark, and besides, had broken a hole in her bottom too big to be quickly stopped, and were sat down musing what we should do, we heard the ship fire a gun, and saw her make a waft with her ancient as a signal for the boat to come on board. But no boat stirred ; and they fired several times, making other signals for the boat.

At last, when all their signals and firings proved fruitless, and they found the boat did not stir, we saw them, by the help of my glasses, hoist another boat out, and row towards the shore ; and we found, as they approached, that there was no less than ten men in her, and that they had firearms with them.

As the ship lay almost two leagues from the shore, we had a full view of them as they came, and a plain sight of the men, even of their faces ; because the tide having set them a little to the east of the other boat, they rowed up under shore, to come to the same place where the other had landed, and where the boat lay.

By this means, I say, we had a full view of them, and the captain knew the persons and characters of all the men in the boat, of whom he said that there were three very honest fellows, who, he was sure, were led into this conspiracy by the rest, being overpowered and frightened ; but that as for the boatswain, who, it seems, was the chief officer among them, and all the rest, they were as outrageous as any of the ship's crew, and were no doubt made desperate in their new enterprise ; and terribly apprehensive he was that they would be too powerful for us.

I smiled at him, and told him that men in our circumstances were past the operation of fear; that seeing almost every condition that could be was better than that which we were supposed to be in, we ought to expect that the consequence, whether death or life, would be sure to be a deliverance. I asked him what he thought of the circumstances of my life, and whether a deliverance were not worth venturing for? "And where, sir," said I, "is your belief of my being preserved here on purpose to save your life, which elevated you a little while ago? For my part," said I, "there seems to be but one thing amiss in all the prospect of it." "What's that?" says he. "Why," said I, "'tis that, as you say, there are three or four honest fellows among them, which should be spared; had they been all of the wicked part of the crew I should have thought God's providence had singled them out to deliver them into your hands; for depend upon it, every man of them that comes ashore are our own, and shall die or live as they behave to us."

As I spoke this with a raised voice and cheerful countenance, I found it greatly encouraged him; so we set vigorously to our business. We had, upon the first appearance of the boat's coming from the ship, considered of separating our prisoners, and had, indeed, secured them effectually.

Two of them, of whom the captain was less assured than ordinary, I sent with Friday and one of the three delivered men to my cave, where they were remote enough, and out of danger of being heard or discovered, or of finding their way out of the woods if they could have delivered themselves. Here they left them bound, but gave them provisions, and promised them, if they continued there quietly, to give them their liberty in a day or two; but that if they attempted their escape, they should be put to death without mercy. They promised faithfully to bear

their confinement with patience, and were very thankful that they had such good usage as to have provisions and a light left them; for Friday gave them candles (such as we made ourselves) for their comfort; and they did not know but that he stood sentinél over them at the entrance.

The other prisoners had better usage. Two of them were kept pinioned, indeed, because the captain was not free to trust them; but the other two were taken into my service, upon their captain's recommendation, and upon their solemnly engaging to live and die with us; so with them and the three honest men we were seven men well armed; and I made no doubt we should be able to deal well enough with the ten that were coming, considering that the captain had said there were three or four honest men among them also.

As soon as they got to the place where their other boat lay, they ran their boat into the beach, and came all on shore, hauling the boat up after them, which I was glad to see; for I was afraid they would rather have left the boat at an anchor some distance from the shore, with some hands in her to guard her, and so we should not be able to seize the boat.

Being on shore, the first thing they did they ran all to their other boat; and it was easy to see that they were under a great surprise to find her stripped, as above, of all that was in her, and a great hole in her bottom.

After they had mused a while upon this, they set up two or three great shouts, hallooing with all their might, to try if they could make their companions hear; but all was to no purpose. Then they came all close in a ring, and fired a volley of their small arms, which, indeed, we heard, and the echoes made the woods ring. But it was all one; those in the cave we were sure could not hear, and those in our keeping, though they heard it well enough, yet durst give no answer to them.

They were so astonished at the surprise of this, that, as they told us afterwards, they resolved to go all on board again to their ship, and let them know there that the men were all murdered and the longboat staved. Accordingly, they immediately launched their boat again, and got all of them on board.

The captain was terribly amazed, and even confounded at this, believing they would go on board the ship again, and set sail, giving up their comrades for lost, and so he should still lose the ship, which he was in hopes we should have recovered; but he was quickly as much frightened the other way.

They had not been long put off with the boat but we perceived them all coming on shore again: but with this new measure in their conduct, which it seems they consulted together upon, viz., to leave three men in the boat, and the rest to go on shore, and go up into the country to look for their fellows.

This was a great disappointment to us, for now we were at a loss what to do; for our seizing those seven men on shore would be no advantage to us if we let the boat escape, because they would then row away to the ship, and then the rest of them would be sure to weigh and set sail, and so our recovering the ship would be lost. However, we had no remedy but to wait and see what the issue of things might present. The seven men came on shore, and the three who remained in the boat put her off to a good distance from the shore, and came to an anchor to wait for them; so that it was impossible for us to come at them in the boat.

Those that came on shore kept close together, marching towards the top of the little hill under which my habitation lay; and we could see them plainly, though they could not perceive us. We should have been very glad if they had come nearer to us, so that we might have

fired at them, or that they would have gone farther off, that we might have come abroad.

But when they were come to the brow of the hill, where they could see a great way into the valleys and woods which lay towards the north-east part, and where the island lay lowest, they shouted and hallooed till they were weary; and not caring, it seems, to venture far from the shore, nor far from one another, they sat down together under a tree, to consider of it. Had they thought fit to have gone to sleep there, as the other party of them had done, they had done the job for us; but they were too full of apprehensions of danger to venture to go to sleep, though they could not tell what the danger was they had to fear neither.

The captain made a very just proposal to me upon this consultation of theirs, viz., that perhaps they would all fire a volley again, to endeavour to make their fellows hear, and that we should all sally upon them, just at the juncture when their pieces were all discharged, and they would certainly yield, and we should have them without bloodshed. I liked the proposal, provided it was done while we were near enough to come up to them before they could load their pieces again.

But this event did not happen, and we lay still a long time, very irresolute what course to take. At length I told them nothing could be done, in my opinion, till night; and then, if they did not return to the boat, perhaps we might find a way to get between them and the shore, and so might use some stratagem with them in the boat to get them on shore.

We waited a great while, though very impatient for their removing; and were very uneasy when, after long consultations, we saw them start up, and march down toward the sea. It seems they had such dreadful apprehensions upon them of the danger of the place, that they

resolved to go on board the ship again, give their companions over for lost, and so go on with their intended voyage with the ship.

As soon as I perceived them go towards the shore, I imagined it to be, as it really was, that they had given over their search, and were for going back again; and the captain, as soon as I told him my thoughts, was ready to sink at the apprehensions of it; but I presently thought of a stratagem to fetch them back again, and which answered my end to a tittle.

I ordered Friday and the captain's mate to go over the little creek westward, towards the place where the savages came on shore when Friday was rescued, and as soon as they came to a little rising ground, at about half a mile distance, I bade them halloo as loud as they could, and wait till they found the seamen heard them; that as soon as ever they heard the seamen answer them, they should return it again; and then keeping out of sight, take a round, always answering when the other hallooed, to draw them as far into the island, and among the woods, as possible, and then wheel about again to me by such ways as I directed them.

They were just going into the boat when Friday and the mate hallooed; and they presently heard them, and answering, ran along the shore westward towards the voice they heard, when they were presently stopped by the creek, where the water being up, they could not get over, and called for the boat to come up and set them over, as, indeed, I expected.

When they had set themselves over, I observed that the boat being gone up a good way into the creek, and, as it were, in a harbour within the land, they took one of the three men out of her to go along with them, and left only two in the boat, having fastened her to the stump of a little tree on the shore.

That was what I wished for ; and immediately leaving Friday and the captain's mate to their business, I took the rest with me, and crossing the creek out of their sight, we surprised the two men before they were aware ; one of them lying on shore, and the other being in the boat. The fellow on shore was between sleeping and waking, and going to start up. The captain, who was foremost, ran in upon him, and knocked him down, and then called out to him in the boat to yield, or he was a dead man.

There needed very few arguments to persuade a single man to yield when he saw five men upon him, and his comrade knocked down ; besides, this was, it seems, one of the three who were not so hearty in the mutiny as the rest of the crew, and therefore was easily persuaded not only to yield, but afterwards to join very sincerely with us.

In the meantime, Friday and the captain's mate so well managed their business with the rest, that they drew them, by hallooing and answering, from one hill to another, and from one wood to another, till they not only heartily tired them, but left them where they were very sure they could not reach back to the boat before it was dark ; and, indeed, they were heartily tired themselves also by the time they came back to us.

We had nothing now to do but to watch for them in the dark, and to fall upon them, so as to make sure work with them.

It was several hours after Friday came back to me before they came back to their boat ; and we could hear the foremost of them, long before they came quite up, calling to those behind to come along, and could also hear them answer and complain how lame and tired they were, and not able to come any faster ; which was very welcome news to us.

At length they came up to the boat ; but 'tis impossible

to express their confusion when they found the boat fast aground in the creek, the tide ebbed out, and their two men gone. We could hear them call to one another in a most lamentable manner, telling one another they had got into an enchanted island; that either there were inhabitants in it and they should all be murdered, or else there were devils and spirits in it and they should all be carried away and devoured.

They hallooed again, and called their two comrades by their names a great many times; but no answer. After some time we could see them, by the little light there was, run about, wringing their hands like men in despair, and that sometimes they would go and sit down in the boat to rest themselves, then come ashore again, and walk about again, and so the same thing over again.

My men would fain have me give them leave to fall upon them at once in the dark; but I was willing to take them at some advantage, so to spare them, and kill as few of them as I could; and especially I was unwilling to hazard the killing any of our own men, knowing the other were very well armed. I resolved to wait, to see if they did not separate, and, therefore, to make sure of them, I drew my ambuscade nearer, and ordered Friday and the captain to creep upon their hands and feet, as close to the ground as they could, that they might not be discovered, and get as near them as they could possibly, before they offered to fire.

They had not been long in that posture but that the boatswain, who was the principal ringleader of the mutiny, and had now shown himself the most dejected and dispirited of all the rest, came walking towards them, with two more of their crew. The captain was so eager, as having this principal rogue so much in his power, that he could hardly have patience to let him come so near as to be sure of him, for they only heard his tongue before; but when

they came nearer, the captain and Friday, starting up on their feet, let fly at them.

The boatswain was killed upon the spot; the next man was shot into the body, and fell just by him, though he did not die till an hour or two after; and the third ran for it.

At the noise of the firing I immediately advanced with my whole army, which was now eight men, viz., myself, generalissimo; Friday, my lieutenant-general; the captain and his two men, and the three prisoners of war, whom we had trusted with arms.

We came upon them, indeed, in the dark, so that they could not see our number; and I made the man we had left in the boat, who was now one of us, call to them by name, to try if I could bring them to a parley, and so might perhaps reduce them to terms, which fell out just as we desired; for indeed it was easy to think, as their condition then was, they would be very willing to capitulate. So he calls out as loud as he could to one of them, "Tom Smith! Tom Smith!" Tom Smith answered immediately, "Who's that? Robinson?" For it seems he knew his voice. The other answered, "Ay, ay; for God's sake, Tom Smith, throw down your arms and yield, or you are all dead men this moment."

"Whom must we yield to? Where are they?" says Smith again. "Here they are," says he; "here's our captain, and fifty men with him, have been hunting you this two hours; the boatswain is killed, Will Frye is wounded, and I am a prisoner; and if you do not yield, you are all lost."

"Will they give us quarter then," says Tom Smith, "and we will yield?" "I'll go and ask, if you promise to yield," says Robinson. So he asked the captain, and the captain then calls himself out, "You, Smith, you know my voice, if you lay down your arms immediately,

and submit, you shall have your lives, all but Will Atkins."

Upon this Will Atkins cried out, "For God's sake, captain, give me quarter; what have I done? They have been all as bad as I": which, by the way, was not true neither; for, it seems, this Will Atkins was the first man that laid hold of the captain when they first mutinied, and used him barbarously, in tying his hands, and giving him injurious language. However, the captain told him he must lay down his arms at discretion, and trust to the governor's mercy; by which he meant me, for they all called me governor.

In a word, they all laid down their arms, and begged their lives; and I sent the man that had parleyed with them and two more, who bound them all. Then my great army of fifty men, which, particularly with those three, were all but eight, came up and seized upon them all, and upon their boat; only that I kept myself and one other more out of sight for reasons of state.

Our next work was to repair the boat, and think of seizing the ship; and as for the captain, now he had leisure to parley with them, he expostulated with them upon the villainy of their practices with him, and at length upon the farther wickedness of their design, and how certainly it must bring them to misery and distress in the end, and perhaps to the gallows.

They all appeared very penitent, and begged hard for their lives. As for that, he told them they were none of his prisoners, but of the commander of the island; that they thought they had set him on shore in a barren, uninhabited island; but it had pleased God so to direct them that the island was inhabited, and that the governor was an Englishman; that he might hang them all there, if he pleased; but as he had given them all quarter, he supposed he would send them to England, to be dealt with there as

justice required, except Atkins, whom he was commanded by the governor to advise to prepare for death, for that he would be hanged in the morning.

Though this was all a fiction of his own, yet it had its desired effect. Atkins fell upon his knees, to beg the captain to intercede with the governor for his life; and all the rest begged of him, for God's sake, that they might not be sent to England.

It now occurred to me that the time of our deliverance was come, and that it would be a most easy thing to bring these fellows in to be hearty in getting possession of the ship; so I retired in the dark from them, that they might not see what kind of a governor they had, and called the captain to me. When I called, as at a good distance, one of the men was ordered to speak again, and say to the captain, "Captain, the commander calls for you." And presently the captain replied, "Tell his excellency I am just a-coming." This more perfectly amazed them, and they all believed that the commander was just by with his fifty men.

Upon the captain's coming to me, I told him my project for seizing the ship, which he liked wonderfully well, and resolved to put it in execution the next morning. But in order to carry it out with more art, and to be secure of success, I told him we must divide the prisoners, and that he should go and take Atkins and two more of the worst of them, and send them pinioned to the cave where the others lay. This was committed to Friday and the two men who came on shore with the captain.

They conveyed them to the cave, as to a prison. And it was, indeed, a dismal place, especially to men in their condition. The others I ordered to my bower, as I called it, of which I have given a full description; and as it was fenced in, and they were pinioned, the place was secure enough, considering they were upon their behaviour.

To these in the morning I sent the captain, who was to enter into a parley with them; in a word, to try them, and tell me whether he thought they might be trusted or no to go on board and surprise the ship. He talked to them of the injury done him, of the condition they were brought to; and that though the governor had given them quarter for their lives as to the present action, yet that if they were sent to England they would all be hanged in chains, to be sure; but that if they would join in so just an attempt as to recover the ship, he would have the governor's engagement for their pardon.

Any one may guess how readily such a proposal would be accepted by men in their condition. They fell down on their knees to the captain, and promised, with the deepest imprecations, that they would be faithful to him to the last drop, and that they should owe their lives to him, and would go with him all over the world; that they would own him for a father to them as long as they lived.

"Well," says the captain, "I must go and tell the governor what you say, and see what I can do to bring him to consent to it." So he brought me an account of the temper he found them in, and that he verily believed they would be faithful.

However, that we might be very secure, I told him he should go back again and choose out five of them, and tell them they might see that he did not want men, that he would take those five to be his assistants, and that the governor would keep the other two and the three that were sent prisoners to the castle, my cave, as hostages for the fidelity of those five; and that if they proved unfaithful in the execution, the five hostages should be hanged in chains alive upon the shore.

This looked severe, and convinced them that the governor was in earnest. However, they had no way left them but to accept it; and it was now the business of the

prisoners, as much as of the captain, to persuade the other five to do their duty.

Our strength was now thus ordered for the expedition. 1. The captain, his mate, and passenger. 2. Then the two prisoners of the first gang, to whom, having their characters from the captain, I had given their liberty, and trusted them with arms. 3. The other two whom I had kept till now in my bower, pinioned, but upon the captain's motion had now released. 4. These five released at last; so that they were twelve in all, besides five we kept prisoners in the cave for hostages.

I asked the captain if he was willing to venture with these hands on board the ship; for as for me and my man Friday, I did not think it was proper for us to stir, having seven men left behind, and it was employment enough for us to keep them asunder and supply them with victuals. As to the five in the cave, I resolved to keep them fast; but Friday went in twice a day to them, to supply them with necessaries; and I made the other two carry provisions to a certain distance, where Friday was to take it.

When I showed myself to the two hostages, it was with the captain, who told them I was the person the governor had ordered to look after them, and that it was the governor's pleasure they should not stir anywhere but by my direction; that if they did, they should be fetched into the castle, and be laid in irons; so that as we never suffered them to see me as governor, so I now appeared as another person, and spoke of the governor, the garrison, the castle, and the like, upon all occasions.

The captain now had no difficulty before him but to furnish his two boats, stop the breach of one, and man them. He made his passenger captain of one, with four other men; himself, and his mate, and five more went in the other; and they contrived their business very well,

for they came up to the ship about midnight. As soon as they came within call of the ship, he made Robinson hail them, and tell them they brought off the men and the boat, but that it was a long time before they had found them, and the like, holding them in a chat till they came to the ship's side; when the captain and the mate entering first, with their arms, immediately knocked down the second mate and carpenter with the butt-end of their muskets, being very faithfully seconded by their men. They secured all the rest that were upon the main and quarter decks, and began to fasten the hatches to keep them down who were below; when the other boat and their men entering at the fore-chains, secured the fore-castle of the ship, and the scuttle which went down into the cook-room, making three men they found there prisoners.

When this was done, and all safe upon deck, the captain ordered the mate, with three men, to break into the round-house, where the new rebel captain lay, with two men and a boy all with firearms in their hands. When the mate with a crow split open the door, the new captain and his men fired boldly among them, and wounded the mate with a musket-ball, which broke his arm, and wounded two more of the men, but killed nobody.

The mate calling for help, rushed however into the round-house wounded as he was, and with his pistol shot the new captain through the head, the bullet entering at his mouth and came out again behind one of his ears, so that he never spoke a word; upon which the rest yielded, and the ship was taken effectually, without any more lives lost.

As soon as the ship was thus secured, the captain ordered seven guns to be fired, which was the signal agreed upon with me to give me notice of his success, which you may be sure I was very glad to hear, having

"SHOT THE NEW CAPTAIN THROUGH THE HEAD."

sat watching upon the shore for it till near two of the clock in the morning.

Having thus heard the signal plainly, I laid me down ; and it having been a day of great fatigue to me, I slept very sound, till I was something surprised with the noise of a gun ; and presently starting up, I heard a man call me by the name of " Governor," " Governor," and presently I knew the captain's voice ; when climbing up to the top of the hill, there he stood, and pointing to the ship, he embraced me in his arms. " My dear friend and deliverer," said he, " there's your ship, for she is all yours, and so are we, and all that belong to her." I cast my eyes to the ship, and there she rode within little more than half a mile of the shore ; for they had weighed her anchor as soon as they were masters of her, and the weather being fair, had brought her to an anchor just against the mouth of the little creek, and the tide being up, the captain had brought the pinnace in near the place where I at first landed my rafts, and so landed just at my door.

I was at first ready to sink down with the surprise ; for I saw my deliverance, indeed, visibly put into my hands, all things easy, and a large ship just ready to carry me away whither I pleased to go. At first, for some time, I was not able to answer him one word ; but as he had taken me in his arms, I held fast by him, or I should have fallen to the ground.

He perceived the surprise, and immediately pulled a bottle out of his pocket, and gave me a dram of cordial, which he had brought on purpose for me. After I had drunk it, I sat down upon the ground ; and though it brought me to myself, yet it was a good while before I could speak a word to him.

All this while the poor man was in as great an ecstasy as I, only not under any surprise, as I was, and he said a thousand kind tender things to me, to compose me and

bring me to myself. But such was the flood of *joy* in my breast, that it put all my spirits into confusion. At last it broke out into tears, and in a little while after I recovered my speech.

When we had talked a while, the captain told me he had brought me some little refreshment, such as the ship afforded, and such as the wretches that had been so long his masters had, not plundered him of. Upon this he called aloud to the boat, and bade his men bring the things ashore that were for the governor.

First, he had brought me a case of bottles full of excellent cordial waters, six large bottles of Madeira wine (the bottles held two quarts apiece), two pounds of excellent good tobacco, twelve good pieces of the ship's beef, and six pieces of pork, with a bag of peas, and about a hundred-weight of biscuit.

He brought me also a box of sugar, a box of flour, a bag full of lemons, and two bottles of lime-juice, and abundance of other things; but besides these, and what was a thousand times more useful to me, he brought me six clean new shirts, six very good neck-cloths, two pair of gloves, one pair of shoes, a hat, and one pair of stockings, and a very good suit of clothes of his own, which had been worn but very little; in a word, he clothed me from head to foot.

It was a very kind and agreeable present, as any one may imagine, to one in my circumstances; but never was anything in the world of that kind so unpleasant, awkward, and uneasy, as it was to me to wear such clothes at their first putting on.

After these ceremonies passed, and after all his good things were brought into my little apartment, we began to consult what was to be done with the prisoners we had; for it was worth considering whether we might venture to take them away with us or no, especially two of them,

whom we knew to be incorrigible and refractory to the last degree. The captain said he knew they were such rogues, that there was no obliging them; and if he did carry them away, it must be in irons, as malefactors, to be delivered over to justice at the first English colony he could come at; and I found that the captain himself was very anxious about it.

Upon this I told him that, if he desired it, I durst undertake to bring the two men he spoke of to make it their own request that he should leave them upon the island. "I should be very glad of that," said the captain, "with all my heart."

"Well," said I, "I will send for them up, and talk with them for you." So I caused Friday and the two hostages, for they were now discharged, their comrades having performed their promise; I say, I caused them to go to the cave and bring up the five men, pinioned as they were, to the bower, and keep them there till I came.

After some time I came thither, dressed in my new habit; and now I was called governor again. Being all met, and the captain with me, I caused the men to be brought before me, and I told them I had had a full account of their villainous behaviour to the captain, and how they had run away with the ship, and were preparing to commit farther robberies, but that Providence had ensnared them in their own ways, and that they were fallen into the pit which they had digged for others.

I let them know that by my direction the ship had been seized, that she lay now in the road, and they might see, by and by, that their new captain had received the reward of his villainy, for that they might see him hanging at the yard-arm; that as to them, I wanted to know what they had to say why I should not execute them as pirates, taken in the fact, as by my commission they could not doubt I had authority to do.

One of them answered in the name of the rest that they had nothing to say but this, that when they were taken the captain promised them their lives, and they humbly implored my mercy. But I told them I knew not what mercy to show them; for as for myself, I had resolved to quit the island with all my men, and had taken passage with the captain to go for England. And as for the captain, he could not carry them to England other than as prisoners in irons, to be tried for mutiny, and running away with the ship; the consequence of which, they must needs know, would be the gallows; so that I could not tell which was best for them, unless they had a mind to take their fate in the island. If they desired that, I did not care, as I had liberty to leave it. I had some inclination to give them their lives, if they thought they could shift on shore.

They seemed very thankful for it, said they would much rather venture to stay there than to be carried to England to be hanged; so I left it on that issue.

However, the captain seemed to make some difficulty of it, as if he durst not leave them there. Upon this I seemed a little angry with the captain, and told him that they were my prisoners, not his; that seeing I had offered them so much favour, I would be as good as my word; that if he did not think fit to consent to it, I would set them at liberty, as I found them; and if he did not like it, he might take them again if he could catch them.

Upon this they appeared very thankful, and I accordingly set them at liberty, and bade them retire into the woods to the place whence they came, and I would leave them some firearms, some ammunition, and some directions how they should live very well, if they thought fit.

Upon this I prepared to go on board the ship, but told the captain that I would stay that night to prepare my

things, and desired him to go on board in the meantime, and keep all right in the ship, and send the boat on shore the next day for me; ordering him, in the meantime, to cause the new captain, who was killed, to be hanged at the yard-arm, that these men might see him.

When the captain was gone, I sent for the men up to me to my apartment, and entered seriously into discourse with them of their circumstances. I told them I thought they had made a right choice; that if the captain carried them away, they would certainly be hanged. I showed them the new captain hanging at the yard-arm of the ship, and told them they had nothing less to expect.

When they all declared their willingness to stay, I then told them I would let them into the story of my living there, and put them into the way of making it easy to them. Accordingly I gave them the whole history of the place, and of my coming to it, showing them my fortifications, the way I made my bread, planted my corn, cured my grapes; and in a word, all that was necessary to make them easy. I told them the story also of the sixteen Spaniards that were to be expected, for whom I left a letter, and made them promise to treat them in common with themselves.

I left them my firearms, viz., five muskets, three fowling pieces, and three swords. I had above a barrel and half of powder left; for after the first year or two I used but little, and wasted none. I gave them a description of the way I managed the goats, and directions to milk and fatten them, and to make both butter and cheese.

In a word, I gave them every part of my own story, and I told them I would prevail with the captain to leave them two barrels of gunpowder more, and some garden seeds, which I told them I should have been very glad of. Also I gave them the bag of peas which the captain had

brought me to eat, and bade them be sure to sow and increase them.

Having done all this, I left them the next day, and went on board the ship. We prepared immediately to sail, but did not weigh that night. The next morning early two of the five men came swimming to the ship's side, and making a most lamentable complaint of the other three, begged to be taken into the ship for God's sake, for they should be murdered, and begged the captain to take them on board, though he hanged them immediately.

Upon this the captain pretended to have no power without me; but after some difficulty, and after their solemn promises of amendment, they were taken on board, and were some time after soundly whipped and pickled, after which they proved very honest and quiet fellows.

Some time after this the boat was ordered on shore, the tide being up, with the things promised to the men, to which the captain, at my intercession, caused their chests and clothes to be added, which they took, and were very thankful for. I also encouraged them by telling them that if it lay in my way to send any vessel to take them in, I would not forget them.

When I took leave of this island, I carried on board, for relics, the great goatskin cap I had made, my umbrella, and my parrot; also I forgot not to take the money I formerly mentioned, which had lain by me so long useless that it was grown rusty or tarnished, and could hardly pass for silver till it had been a little rubbed and handled; as also the money I found in the wreck of the Spanish ship.

And thus I left the island, the 19th of December as I found by the ship's account, in the year 1686, after I had been upon it eight and twenty years, two months, and nineteen days, being delivered from this second captivity the

same day of the month that I first made my escape in the *barco-longo*, from among the Moors of Sallee.

In this vessel, after a long voyage, I arrived in England, the 11th of June, in the year 1687, having been thirty and five years absent.

## NOTES TO "ROBINSON CRUSOE"

Page 1, l. 3. **Bremen**, an ancient and thriving city of Germany, on the river Weser, now the second commercial city of the Empire.

Page 1, l. 8. **corruption of words**, a change in the spelling or pronunciation of the words; often these changes have been made to lessen the effort in pronunciation, *ef.*, walrus from whale and horse; hussy from housewife.

Belvoir in Leicestershire is pronounced Beever; drawing-room was originally the withdrawing-room—the room to which persons withdraw from the dining-room. The author's name was changed from Daniel Foe (in short, D. Foe) into Daniel de Foe, and finally to Daniel Defoe.

Page 8, l. 5. **Guinea**, district round the gulf of that name in Central West Africa.

Page 8, l. 10. **messmate**, one who eats at the same table as another.

Page 8, l. 34. **ounce of gold**, now worth £4 3s. 0d. to £4 5s. 0d.

Page 9, l. 13. **Canary Islands**, a Spanish group about seventy miles from the south coast of Morocco

Page 9, l. 16. **Sallee**, a seaport of Morocco on the Atlantic. It was for centuries well known as a haunt for pirates, called the "Sallee Rovers."

Page 9, l. 23. **athwart**, across.

Page 9, l. 34. **half-pike**, a weapon with a sharp spear-like head, but with a handle only half the usual length.

Page 10, l. 4. **Moors**, inhabitants of Morocco.

Page 10, l. 26. **pinnace**, a small boat with eight oars and capable of carrying a sail.

Page 10, l. 27. **Maresco**, a sailor boy; in Italian the word means, belonging to the sea.

Page 11, l. 11. **long-boat**, the longest and strongest boat carried on a ship.

Page 11, l. 17. **mainsheet**, the rope attached to the lower corner of the mainsail.

Page 11, l. 20. **dexterous**, clever.

Page 13, l. 33. **Mahomet** or Mohammed, the great prophet of Arabia.

Page 14, l. 6. **Straits' mouth**, Straits of Gibraltar

Page 14, l. 26. **latitude**, distance N. or S. of the equator.

Page 16, l. 22. **Cape Verd Islands**, a Portuguese group lying 350 miles W. of Cape Verd, the most westerly headland in Africa.

Page 16, l. 32. **Pico**, Spanish word for the peak of a mountain.

Page 16, l. 33. **Mountain Teneriffe**, a famous dormant volcano, the highest peak in the Canary Islands; it is 12,200 feet high.

Page 18, l. 29. **rivers Gambia and Senegal**, two West African rivers; the Senegal is north and the Gambia south of Cape Verd.

Page 20, l. 1. **kept a large offing**, sailed directly across the bay for the headland instead of keeping by the coast.

Page 20, l. 10. **dilemma**, a difficulty.

Page 20, l. 10. **pensive**, gloomy or thoughtful.

Page 20, l. 27. **crowded to the utmost**, put on all sail.

Page 20, l. 28. **perspective glasses**, telescopes.

Page 20, l. 32. **ancient**, an ensign or flag denoting a nation.

Page 21, l. 28. **titlle**, a small particle

Page 21, l. 31. **inventory**, a list.

Page 22, l. 4. **piece of eight**, a piastre, an old Spanish silver

coin worth about four shillings. It was divided into eight silver reals, hence its name, "piece of eight."

Page 22, l. 12. **medium**, middle course.

Page 22, l. 13. **obligation**, a promise.

Page 22, l. 17. **All Saints' Bay**, one of the finest bays in America. On it is situated the city of Bahia, or St. Salvador, the oldest city in Brazil and next in size to Rio de Janeiro.

Page 22, l. 23. **ducat** (Brazil), a silver coin worth between three and four shillings in English money; the gold ducat is worth 9s. 4d.

Page 23, l. 6. **letter of naturalisation**, a document granting the privileges of a native of the country.

Page 23, l. 32. **procuracion**, power to manage another's affairs.

Page 25, l. 8. **baize**, a coarse woollen cloth with a long nap.

Page 26, l. 28. **supercargo**, a person in charge of the cargo and responsible for all the business transactions of a voyage.

Page 27, l. 9. **preposterous**, foolish.

Page 28, l. 30. **calenture**, a kind of fever occurring on board ship in hot climates

Page 29, l. 8. **Caribbee Islands**, or Little Antilles, a chain of islands forming the eastern boundary of the Caribbean Sea. The northern half is called the Leeward and the southern half the Windward Islands.

Page 29, l. 9. **Barbadoes**, one of the Windward Islands, and the most easterly of all the West Indies: colonized by the British in 1625.

Page 29, l. 10. **indraft of the Gulf of Mexico**, the flow of the waters of the ocean towards the Gulf. The rotation of the earth and the action of the Trade Winds cause a westerly flow of the waters of the Atlantic Ocean from Africa to America at the equator. The formation of the coast of South America causes part of this current to be deflected northward along the coast into the Caribbean Sea and Gulf of Mexico from whence it flows as the Gulf Stream.

Page 29, l. 19. **impetuosity**, force; violence

Page 29, l. 23. **sand**, sandbank.

Page 29, l. 34. **consternation**, terror; dismay.

Page 30, l. 2. **main**, the mainland.

Page 31, l. 8. **shoal**, gently sloping.

Page 31, l. 12. **under the lee**, under the land sheltered from the wind

Page 31, l. 19. **coup de grâce**, the finishing blow.

Page 33, l. 20. **contemplation**, serious thought; attentive observation.

Page 33, l. 26. **solaced**, comforted in distress; soothed.

Page 33, l. 31. **to shift**, to change one's clothes.

Page 34, l. 8. **ravenous**, eager to devour.

Page 35, l. 29. **forecastle**, the quarters of the crew in the fore part of the ship.

Page 36, l. 14. **yard**, a long pole to carry square sails which cross the mast.

Page 36, l. 15. **top-mast**, a short mast attached to the lower mast.

Page 37, l. 12. **cordial waters**, beverages made from the juice of certain roots, such as ginger, or from fruits, as the citron, lemon, lime, etc., and mixed with sugar.

Page 37, l. 12. **rack**, a spirit procured from coarse sugar, rice, or the juice of the coco and other palms.

Page 37, l. 31. **fowling-piece**, a light gun for small shot.

- Page 39, l. 6. **navigation**, the science and art of sailing ships.  
 Page 41, l. 7. **environed**, surrounded.  
 Page 41, l. 11. **barren**, not cultivated.  
 Page 41, l. 27. **carriion**, offensive in smell and unfit for food.  
 Page 42, l. 26. **screw-jack**, a screw for raising heavy weights: it is worked by a lever in the form of a straight iron bar.  
 Page 42, l. 29. **crow** or crowbar, a large steel bar use as a lever.  
 Page 42, l. 35. **fore-top sail**, the sail for the mast above the fore-mast or front mast in a ship.  
 Page 43, l. 21. **fain**, compelled.  
 Page 44, l. 3. **magazine**, store.  
 Page 44, l. 21. **hogshead**, a large cask.  
 Page 44, l. 22. **runlet**, a cask containing 18½ gallons.  
 Page 44, l. 30. **portable**, that may be carried.  
 Page 44, l. 33. **hawser**, a very thick, strong rope.  
 Page 44, l. 34. **sprit-sail yard**, the spar fixed diagonally from the foot of the mast to the top and outer corner of the sprit-sail to keep it in position when spread. See illustration on p. 100.  
 Page 44, l. 35. **mizzen-yard**, the yard or spar that carries the mizzen; the large fore-and-aft sail on the mainmast.  
 Page 45, l. 24. **rummaged**, turned things over in search.  
 Page 49, l. 31. **tarpaulin**, a strong linen cloth coated with tar to make it waterproof.  
 Page 51, l. 13. **subtle**, quick to discern or notice anything.  
 Page 51, l. 27. **optics**, organs of sight.  
 Page 52, l. 4. **pale**, an enclosed space.  
 Page 53, l. 23. **dials**, watches.  
 Page 54, l. 6. **husbanded**, used carefully.  
 Page 55, l. 28. **adze**, a joiner's implement with a thin curved blade set at right angles to the handle.  
 Page 56, l. 1. **prodigious**, unusually great, in amount or quantity.  
 Page 57, l. 12. **journal**, a book containing an account of each day's doings or transactions.  
 Page 58, l. 4. **mechanic**, an artisan; one skilled in a trade.  
 Page 59, l. 28. **commodiously**, conveniently.  
 Page 59, l. 30. **spacious**, roomy.  
 Page 60, l. 2. **flags**, the name generally given to plants like the iris with large sword-shaped leaves.  
 Page 60, l. 8. **disaster**, misfortune.  
 Page 60, l. 26. **victuals**, food.  
 Page 60, l. 31. **splintered**, put into splints, the thin pieces of wood used to keep a fractured limb in its proper position.  
 Page 61, l. 21. **credible**, that may be believed.  
 Page 62, l. 12. **hooped**, bound with bands or rings made of strips of wood or metal.  
 Page 62, l. 13. **capacity**, the necessary skill.  
 Page 62, l. 25. **oakum**, old rope untwisted into long strands.  
 Page 65, l. 2. **disconsolate**, sad; hopeless.  
 Page 65, l. 8. **breach of the water**, the storm had caused the water to rise to an unusual height on the shore.  
 Page 66, l. 1. **precipice**, a perpendicular cliff; a very steep place.  
 Page 66, l. 10. **loth**, unwilling.  
 Page 66, l. 29. **politics**, the science relating to the government of a country.

- Page 67, l. 35. **diverted**, turned aside.
- Page 69, l. 2. **savoury**, pleasant in taste and odour.
- Page 69, l. 8. **ague**, a fever with periodical cold and shivering fits.
- Page 69, l. 13. **broiled**, cooked over a hot fire; grilled.
- Page 70, l. 2. **distemper**, illness.
- Page 70, l. 23. **brant-goose** or **brent-goose**, commonly called the wild black goose; it is smaller than most geese, has a black head, neck, and bill, the neck with patches of small white stripes; the bill somewhat resembles that of the eagle. Formerly it was very common on the British coasts.
- Page 71, l. 17. **cassava**, the name of a West Indian plant from which tapioca is produced.
- Page 71, l. 19. **aloe**, a tree-like plant the juice of the leaves of which is of considerable value in medicine.
- Page 72, l. 5. **Barbary**, the northern part of Africa and includes Tripoli, Tunis, Algeria and Morocco.
- Page 72, l. 7. **flux**, a discharge from the lining of the cavities of the body.
- Page 72, l. 28. **surveying**, examining.
- Page 72, l. 31. **indefeasibly**, without question or dispute.
- Page 72, l. 32. **convey**, to make over in law to his heirs.
- Page 72, l. 33. **manor**, land belonging to a nobleman and kept for his own use.
- Page 72, l. 34. **cocoa-tree**, a palm tree of tropical countries producing coco-nuts.
- Page 72, l. 34. **citron**, a fruit resembling a lemon.
- Page 73, l. 1. **lime**, the fruit of a kind of lemon or citron tree.
- Page 74, l. 12. **enamoured of**, charmed with.
- Page 75, l. 20. **straitened**, to be in want.
- Page 76, l. 5. **anniversary**, the day of the year one or more years after an event happened.
- Page 77, l. 1. **drought**, dryness; want of rain or water.
- Page 77, l. 4. **vernal-equinox**, the time in Spring (about the 21st March) when the sun crosses the equator making day and night of equal length.
- Page 77, l. 27. **pruned**, trimmed by cutting off useless or unnecessary boughs.
- Page 78, l. 24. **officious**, too forward in offering assistance.
- Page 78, l. 30. **sallows and osiers**, species of willow the boughs of which were formerly much used in the making of baskets.
- Page 80, l. 3. **descried**, saw; discovered with the eye.
- Page 80, l. 25. **Leadenhall Market**. At the time of Defoe it was the principal provision market in London, and had been used as a general market for more than 800 years before his time. It came into possession of the city of London in 1411, and since then has undergone many alterations and additions. An entirely new structure of elegant design was put up in 1881. It is now used principally as a market for fowls and game.
- Page 81, l. 3. **penguin**, a water-fowl which is unable to fly but is a clever diver. "In diving its little plumeless wings are used as fins, but on the land as front legs." See illustration on page 48.
- Page 82, l. 11. **hutch**, literally a box, but here used affectionately for his dwelling.
- Page 82, l. 19. **regale**, to refresh.

- Page 82, l. 35. **domestic**, tame; belonging to the horse.  
 Page 83, l. 24. **zenith**, that point of the heavens exactly overhead.  
 Page 85, l. 4. **arable**, fit for tilling or ploughing  
 Page 86, l. 4. **peck-loaf**—a loaf made from a peck of flour.  
 Page 86, l. 7. **notorious thieves in chains**, the barbarous  
 punishment here referred to was discontinued in 1834.  
 Page 87, l. 21. **botch**, to make clumsily.  
 Page 88, l. 14. **bruised**, crushed or pounded.  
 Page 88, l. 30. **kiln**, a large oven for drying corn, bricks, etc.  
 Page 88, l. 31. **glazed**, covered with a glassy surface.  
 Page 88, l. 33. **pipkin**, a small earthen vessel.  
 Page 89, l. 23. **requisite**, necessary, needful.  
 Page 89, l. 34. **mortar**, a vessel in which substances are pounded  
 with a pestle.  
 Page 91, l. 18. **whelming**, covering completely.  
 Page 91, l. 30. **husbandry**, tilling; work of a farmer.  
 Page 94, l. 24. **reflection**, the act of turning over in the mind or  
 of thinking deeply.  
 Page 95, l. 6. **preposterous**, foolish; absurd.  
 Page 95, l. 8. **cedar**, a large evergreen tree the wood of which is  
 very durable and has a pleasant odour.  
 Page 96, l. 3. **devices**, schemes; contrivances.  
 Page 96, l. 8. **declivity**, slope.  
 Page 96, l. 24. **reluctancy**, unwillingness.  
 Page 96, l. 32. **devotion**, worshipping God; prayer; piety.  
 Page 97, l. 1. **eked**, added to or increased  
 Page 97, l. 23. **watch-coat**, the heavy coats worn by sailors when  
 on watch or on the lookout  
 Page 98, l. 23. **indifferently**, tolerably; passably.  
 Page 98, l. 29. **pent-house**, a small building or shed projecting  
 from a main building or wall.  
 Page 99, l. 1. **posture**, state or condition.  
 Page 99, l. 15. **memorandum**, something to be remembered.  
 Page 99, l. 26. **terra firma**, the continent as distinguished from  
 the island.  
 Page 101, l. 2. **discretion**, prudence.  
 Page 102, l. 2. **double the point**, to pass or sail round the point.  
 Page 102, l. 8. **grappling**, a small anchor with several claws  
 or arms.  
 Page 102, l. 25. **eddy**, a current running back from the main  
 stream and causing a kind of whirlpool.  
 Page 102, l. 34. **pilot**, a guide.  
 Page 103, l. 2. **sluice of a mill**, the stream flowing through the  
 sluice-gates which regulate the flow of water.  
 Page 103, l. 8. **paddlers**, or paddles, the short broad oars used to  
 propel a canoe.  
 Page 103, l. 25. **meridian**, the part of the heavens which the sun  
 crosses at mid-day.  
 Page 104, l. 11. **frigate**, here means the canoe, but at the time  
 this story was written a frigate was a war-ship carrying twenty-eight to  
 sixty guns.  
 Page 105, l. 25. **sociable**, companionable.  
 Page 106, l. 21. **filthy**, badly shaped.  
 Page 107, l. 2. **flay**, to strip off the skin.

- Page 108, l. 14. **sagacious**, quick to perceive or discern.  
 Page 108, l. 15. **tractable**, easily taught; docile.  
 Page 109, l. 12. **tethered**, fastened in such a manner as to allow freedom for feeding or grazing.  
 Page 110, l. 2. **essays**, trials; attempts.  
 Page 110, l. 19. **equipage**, outfit.  
 Page 110, l. 35. **spatter-dashes**, leggings or gaiters. From this word we get the modern term "spats."  
 Page 111, l. 5. **frog**, a loop.  
 Page 111, l. 16. **Mulatto-like**, of the colour of a Mulatto, the offspring of black and white parents.  
 Page 111, l. 18. **equinox**, the word here means the equator, the imaginary line encircling the earth midway between the poles.  
 Page 113, l. 13. **tolerable**, moderately good in size.  
 Page 113, l. 25. **squab**, a well-stuffed couch or cushion.  
 Page 115, l. 4. **apparition**, a ghost or spectre.  
 Page 115, l. 25. **chimera**, a wild fancy.  
 Page 115, l. 29. **delusion**, an error; a false belief.  
 Page 116, l. 23. **similitude**, likeness; resemblance.  
 Page 116, l. 30. **vapours**, a nervous weakness, producing strange thoughts.  
 Page 119, l. 6. **rational**, intelligent; reasonable.  
 Page 120, l. 28. **cannibal**, one who eats human flesh.  
 Page 121, l. 9. **degeneracy**, the fall from a nobler nature, the process of becoming base or low in habits.  
 Page 121, l. 24. **consolation**, comfort.  
 Page 122, l. 20. **reflection**, the throwing back of the rays of light from a bright surface.  
 Page 122, l. 28. **essayed**, tried.  
 Page 123, l. 9. **tinder-box**, literally a box containing tinder, that is any material which would take fire readily from a spark usually produced by striking a flint and steel together. Before the introduction of matches, about the close of the eighteenth century, the tinder-box, together with the flint and steel and sulphur-tipped splints of wood, were in very general use for obtaining "a light."  
 Page 123, l. 10. **wild-fire**, a composition made from materials which readily take fire.  
 Page 123, l. 10. **pan of the lock of a musket**, the part containing the train of powder placed between the charge and the ignition, or firing point.  
 Page 123, l. 29. **nauseous**, loathsome; displeasing.  
 Page 123, l. 29. **venomous**, poisonous.  
 Page 124, l. 29. **capitulate**, to yield or surrender under certain conditions.  
 Page 125, l. 1. **articulately**, distinctly; clearly.  
 Page 126, l. 16. **extremity**, greatest distress.  
 Page 128, l. 12. **sedate**, quiet.  
 Page 129, l. 4. **premeditate**, to think or meditate upon beforehand.  
 Page 129, l. 15. **perturbation**, disquiet or uneasiness of mind.  
 Page 129, l. 35. **trice**, probably from the word "thrice," hence the meaning—in the time one could count three; instant.  
 Page 134, l. 2. **quarter**, the part of a ship's side from the mainmast to the stern.

Page 134, l. 6. **bow-sprit**, the spar projecting over the bows of a ship.

Page 134, l. 27. **hold**, the part of a ship in which the cargo is stowed.

Page 136, l. 2. **doubloon**, an almost obsolete Spanish gold coin worth 33s. to 35s.

Page 136, l. 3. **a pound weight of gold**, equivalent to about £50.

Page 138, l. 11. **barbarous**, brutal; savage.

Page 139, l. 25. **expedition**, speed; haste.

Page 143, l. 23. **comely**, pleasing in appearance; graceful.

Page 143, l. 32. **vivacity**, liveliness.

Page 144, l. 1. **dun**, of a dark colour.

Page 146, l. 2. **jerkin**, a short jacket or waistcoat with sleeves.

Page 150, l. 21. **unfeigned**, real; sincere.

Page 152, l. 10. **draught and reflux**, the flowing in and out of the tide.

Page 152, l. 11. **Oroonoko**, the river Orinoco, which flows chiefly through Venezuela, the most northerly state of South America. Its total length is 1550 miles, or seven times the length of the Thames; of its many mouths seven are navigable; half-way to the sea it is four miles wide. The waterway mainly used by ships varies in width from three and three-quarter miles to twenty-three miles.

Page 152, l. 14. **Trinidad**, the most southerly of the British West Indian Islands. It was discovered by Columbus on his third voyage in 1498, and the Spaniards effected a settlement on it in 1532. It fell into possession of the British in 1797.

Page 152, l. 23. **St. Martha**, for St. Martin, one of the most northerly of the Leeward chain of islands. It now belongs to the French and Dutch.

Page 152, l. 30. **cruelties of the Spaniards**. Mexico was conquered in 1521 by Cortes, and Peru by Pizarro in 1533-38. In each case the conquerors committed many gross cruelties, and practised many base deceptions in attaining their ambitious ends.

Page 153, l. 20. **hanger**, a short sword curved at the point.

Page 158, l. 16. **fustic**, a West Indian tree formerly much used as a dye. The Nicaragua wood referred to is very probably logwood, a product of the country and a well-known dyewood.

Page 160, l. 4. **jibbed**, shifted from one side or tack to another to catch the wind.

Page 163, l. 9. **fetched a compass**, went round in a circuit; made a detour.

Page 166, l. 17. **Christianus**, Latin word for Christian.

Page 166, l. 22. **Espagnole**, a Spaniard.

Page 169, l. 9. **ecstasy**, excessive joy.

Page 169, l. 9. **filial affection**, the love of a son for his parent.

Page 172, l. 35. **interpreter**, one who translates or explains the language of two or more persons who are unacquainted with each other's speech.

Page 174, l. 17. **Rio de la Plata** (Plata is the Spanish for silver), an estuary on the east coast of South America; it is 140 miles wide at its mouth. On the south bank is the city of Buenos Ayres, and on the north Monte Video.

Page 174, l. 17. **Havana**, or Havannah, the capital of the Island of Cuba, which is now an independent republic.

- Page 175, l. 8. **inherent**, inborn and unchanging.
- Page 175, l. 14. **New Spain**, the parts of America then occupied by Spaniards.
- Page 175, l. 18. **candour**, openness; without disguise.
- Page 176, l. 14. **Christian Colonies of America**. These powers and possessions about the year 1700 were:—  
*Britain*, New England Colonies (Virginia, 1607, Massachusetts, Maryland, etc.), Hudson's Bay Territory (1670), Guayana (or Guiana), and the islands ~~Newfoundland~~, Barbadoes, St. Kitts (1628), Antigua, Montserrat, and Jamaica (1655).  
*Spain*, Mexico, Peru, Chili, New Granada, Cuba, and Florida  
*France*, St. Lawrence district with its capital Quebec; part of Louisiana near the mouth of the Mississippi; Cayenne, and the islands of Martinique and Guadaloupe.  
*Portugal*, Brazil.  
*Dutch*, Manhattan Island (present site of New York) and adjoining mainland; Guayana (Guiana).  
*Sweden*, a small settlement on the Delaware river.
- Page 177, l. 14. **indefatigable**, unwearied; unceasing in effort.
- Page 177, l. 29. **Alicante**, a town on the east coast of Spain; it is the third seaport in the kingdom, and famous for its wines and grapes.
- Page 182, l. 9. **outrageous**, furious, injuring by violence.
- Page 182, l. 10. **insolent**, rude and overbearing.
- Page 182, l. 31. **quicksand**, a sandbank which changes its position.
- Page 184, l. 5. **uncouth**, odd.
- Page 184, l. 31. **mutinied**, risen against authority in the army or on board ship.
- Page 186, l. 34. **prejudice**, injury or harm of any kind.
- Page 187, l. 19. **incorrigible**, bad beyond reform.
- Page 187, l. 24. **legitimates**, makes lawful.
- Page 188, l. 1. **animated**, enlivened.
- Page 188, l. 22. **abhorrence**, shrinking from with horror.
- Page 188, l. 24. **Jamaica**, the most important of the British West Indian Islands. Conquered by the British in 1655.
- Page 190, l. 1. **desperation**, disregard of danger.
- Page 192, l. 30. **conspiracy**, a banding together for an evil purpose.
- Page 194, l. 7. **pinioned**, bound by fastening the arms.
- Page 196, l. 29. **stratagem**, a trick; a plan for deceiving an enemy.
- Page 197, l. 10. **to a tittle**, exactly; to a nicety.
- Page 199, l. 4. **lamentable**, sad; pitiful.
- Page 199, l. 5. **enchanted**, in the power of witches or spirits.
- Page 192, l. 23. **ambuscade**, a hidden or concealed attacking force.
- Page 200, l. 9. **generalissimo**, an Italian word for the chief general of an army or of separate armies.
- Page 200, l. 9. **lieutenant-general**, the one next in rank to the general.
- Page 200, l. 15. **parley**, a talk or conference with an enemy in war time.
- Page 200, l. 18. **capitulate**, surrender.
- Page 201, l. 10. **at discretion**, without conditions.

- Page 201, l. 22. **expostulated**, reasoned earnestly with because of their wrong-doings.
- Page 202, l. 4. **fiction**, a false or imaginary story.
- Page 202, l. 6. **intercede**, to plead for one.
- Page 202, l. 22. **project**, a plan; scheme.
- Page 202, l. 31. **dismal**, gloomy; depressing.
- Page 203, l. 11. **engagement**, promise.
- Page 203, l. 15. **imprecations**, solemn oaths.
- Page 203, l. 29. **hostages**, prisoners kept by an enemy as pledges for the fulfilment of a treaty.
- Page 204, l. 29. **garrison**, soldiers guarding a fortress.
- Page 205, l. 11. **hatches**, the doors covering the openings from one deck to another or into the hold.
- Page 205, l. 14. **scuttle**, a hatchway or opening in the deck of a ship.
- Page 208, l. 12. **Madeira**, the largest of a group of islands in the North Atlantic, about 390 miles from the coast of Morocco. It belongs to Portugal. At present it is much frequented by invalids because of its excellent climate. Its chief export is wine bearing the name of the island.
- Page 209, l. 1. **refractory**, unmanageable; unruly.
- Page 209, l. 4. **malefactors**, criminals.
- Page 209, l. 34. **taken in the fact**, taken when they were in reality pirates and acting as such.
- Page 212, l. 13. **amendment**, reform.
- Page 212, l. 14. **whipped and pickled**, an old but very cruel method of punishment; after the whipping and when the flesh was raw, brine was put on the bruised places, causing intense pain.
- Page 212, l. 25. **relics**, mementoes or souvenirs.
- Page 213, l. 2. **barco-longo**, longboat. Barco is the Spanish word for boat. See note p. 11, l. 11.

## QUESTIONS

1. Describe in your own words the shipwreck in the Yarmouth Roads.
2. On shipboard what is meant by taking an observation? What instruments are used, and why?
3. Give an account of Crusoe's first trading adventure, and explain how the result of this voyage led to his after troubles.
4. Explain the meaning of the following terms, and make sentences containing at least two of them:—Anchor had come home; strike the topmasts; tided it up the river; sea-room, a lee-shore; sprung a leak; kept a large offing; crowded to the utmost.
5. Write an account of the encounter with the Sallee rover.
6. Why did traders visit the coast of Guinea? What parts of the coast now belong to Britain, and what are the chief articles of commerce?
7. Briefly mention the incidents which occurred after the escape from Sallee and arrival in Brazil.
8. Why did European sailing vessels bound for South America first make for the Cape Verd Islands?
9. Give an account of Crusoe's life in Brazil. How did he "act the fool to his own interests" when in that country.
10. What is the value of:—A piece of eight; a doubloon; a Brazilian ducat; an ounce of gold.
11. Clearly explain the following nautical terms:—Mainsheet; sprit-sail-yard; quarter; yards; shoulder-of-mutton sail; buoy; foretop-sail; forecastle; steerage; hatchway.
12. Make a sketch of a two-masted sailing ship and include as many as you can of the things mentioned in the previous question: also show—the bowsprit, anchor and chains, the helm, the topmasts and the rigging.
13. Describe Crusoe's second shipwreck and his escape from drowning.
14. Draw a rough sketch of the Atlantic Ocean, and mark on it all the places mentioned in this story.
15. Write a life of Daniel Defoe.
16. It has been stated that the story of Robinson Crusoe is "an emblem of the life of the author." As far as you can, show that this statement is accurate.
17. Give the meaning of the following words and phrases and make sentences containing each one:—Subsistence; procuration; magazine, coup de grâce; W. by S. sun; Savanna; magistrate, freight.
18. Give instances of where Crusoe acted with resource, fore-

thought, and determination, and also where the opposite qualities were shown.

19. What considerations guided Crusoe in fixing the position of his dwelling? Describe what he called his "castle," and how it was fortified.

20. Mention incidents in the story which prove the truth of the proverb, "Necessity is the mother of invention."

21. How was Crusoe able to raise two crops of corn in one year? What is the proper time for sowing seed in such a climate and why?

22. Contrast the climate of the southern West Indies with that of England.

23. Tell in your own words what is related in the story of the making of earthenware; the baking of the first loaf of bread; and the construction of baskets.

24. Give an account of the finding of "Friday."

25. "Gratitude is no inherent virtue in the nature of man." Explain this sentence and state under what circumstances it was used in the story.

26. Describe the inhabitants of the Caribbean Sea. How did they differ from the African negro?

27. How might Crusoe have provided himself with food and clothing if he had obtained nothing from the ship?

28. Describe the hero of the story in his home-made clothes as he took his daily walks abroad.

29. What difficulties had to be overcome in raising the first crop of corn on the "barren island"? What old English practice is referred to in this connection?

30. Show that it was not altogether a misfortune for our "wrecked mariner" to have been unskilled in many ways, and short of proper tools, and to spend a great amount of time and labour in making even simple things.

31. What European nations had settlements in America when this story was written? Name the settlements of each, and state the causes which induced these nations to add to their foreign possessions.

32. Describe the characters of the sea captains mentioned in the story, and account for the similarity in their outstanding traits.

33. Give an account of the capture of the mutineers and of the re-taking of the English ship.

34. Briefly sketch the life and character of "Friday."

35. Show from his story that Defoe possessed great skill in word-painting from nature, and of investing the commonest incidents with a charm of reality.

36. Mention other works written by Defoe, and give an account of any two of them which treat of different subjects.

THE END
